Epilogue
A Four-Degree Perspective on Paediatric Bronchoscopy - Where Have We Come from, and Where Are We Going?: Wood, R.E.

Author Index / Subject Index

Includes 48 online videos

This book provides an in-depth “state-of-the-art” critical review of the technique and the applications of flexible and rigid bronchoscopy to infants and children. Written by an international panel of experts, it reviews the technical aspects of the procedure, its common and highly specialized applications as well as its potential contraindications. The chapters are enriched by a wealth of original figures. A major innovation of the book is the inclusion of online videos from actual bronchoscopies that further illustrate and elaborate on the information provided in the text. The book is addressed to paediatric pulmonologists and otolaryngologists, both experienced and in training, as well as to other personnel who are involved in the performance of the procedure. In addition, it is recommended to pulmonologists for adults and general paediatricians who need to be able to evaluate the usefulness of bronchoscopy for their patients and be aware of its limitations and potential contra-indications.

Selected contributions

Analysis of Hearing Preservation and Facial Nerve Function for Patients Undergoing Vestibular Schwannoma Surgery: The Middle Cranial Fossa Approach versus the Retrosigmoid Approach - Personal Experience and Literature Review: Belinchon, A.; Roosli, C.; Belinchon, A.; Rivas, G.; Cistulli, E.; Sava, H.; Emile
Partial Deafness Treatment with the Nuclear Stylus: Research Array Cochlear Implant: Skarzynski, H.; Lemos, O.; Kowalski, M.; Pomeranc, M.; Skarzynski, P.H. (Torun, Poland)
Vertebral Artery Involvement by Tympanojugular Paragangliomas: Management and Outcomes with a Proposed Addition to the Fisch Classification: Sivalingam, S.; De Donato, G.; Falzone, L.; Fillione, L.; Pizzaro, F.; Pizzaro, M.

Guidelines for Authors

Submission

Only original papers written in English should be submitted using the online submission website at:

www.karger.com/orl

Should you experience any problems with your submission, please contact the Editorial Office at:

orl@karger.ch

Bert W. O'Malley, Jr. M.D.
S. Karger AG
Editorial Office ORL
PO Box
CH–4009 Basel (Switzerland)
Tel. +41 61 306 1359
Fax +41 61 306 1434

Suggested reviewers: Please list four complete mailing and e-mail addresses of potential reviewers for your manuscript. The reviewers you suggest should not be 'ORL' Editorial Board members, should not have been co-authors or co-workers over the past 3 years nor should they be persons working in the same institution as yourself or any of the co-authors.

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publisher. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of 'ORL' and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflicts of Interest

Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Types of Papers

Editorial Review

Original Paper

High Impact Report

Case Report

How I do it

Letter to the Editor

High Impact Reports

Authors may also submit contributions to the new section 'High Impact Reports'. Papers should focus on novel and exciting translational and clinical research, should comprise no more than four printed pages incl. 3 figures and 20 references and should be submitted explicitly for this section. An expedited publication time of 8 weeks after acceptance is intended.

Reviews

are either invited, or may be submitted for consideration. Invited reviews, if accepted, are not subject to page charges. The recommended length is 6 printed pages (approx. 16 manuscript pages).

Letter to the Editor

Letters are only accepted if they directly concern articles previously published in this journal and clinical subjects related to the matters discussed. The editor reserves the right to submit copies of such letters to the authors of the articles concerned prior to publication in order to permit them to respond in the same issue of the journal. Letters should have a maximum of one printed page (350–420 words, up to 8 references).

Case Report

The publication space available for case reports is very limited. The journal only considers case reports with significant new insights, specific diagnostic methodology or with an extremely unusual and memorable course.

Arrangement

Title page: The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract in English of not more than 150 words. The abstract is of utmost importance. It should contain the following information: purpose of the study, procedures, results, conclusions and message of the paper.

Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be stored in separate files. Tables require a heading and figures a legend, also in a separate file. When possible, group several illustrations in one block for reproduction (max. size 180 × 223 mm) or provide crisp marks. B/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1200 dpi.

Color illustrations

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.– per page.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as 'unpublished data' and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K; Secret leukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Author's Choice

Karger's Author's Choice service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3000.–, which is a permissible cost in grant allocation. More information can be found at www.karger.com/author_choice.

Supplementary Material

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/policy.htm

Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institutional servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Page Charges

There are no page charges for papers of 4 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 650.–. The allotted size of a paper is equal to approx. 12 manuscript pages (double-spaced, including tables, illustrations and references).

Proofs

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints

Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Third International Congress on Salivary Gland Diseases
22–23 March, 2012, Geneva, Switzerland

MAIN TOPICS
• Saliva diagnostic
• Xerostomia
• Autoimmune sialadenitis
• Pleomorphic adenoma – extent of surgery
• Parotidectomy technique and refinements
• Salivary gland carcinoma

SPECIAL LECTURES
• Saliva - basic sciences update
• Sialadenitis: IgG4 and beyond
• Salivary gland regeneration
• Salivary gland proteomics
• Salivary gland Imaging

ABSTRACTS
Deadline for abstracts:
January 23, 2012

Vincent Vander Porten  Leuven, Belgium
Toshio Yoshihara  Tokyo, Japan
Peter Zbären  Bern, Switzerland

SPECIAL LECTURES
• Saliva - basic sciences update
• Sialadenitis: IgG4 and beyond
• Salivary gland regeneration
• Salivary gland proteomics
• Salivary gland Imaging
The 9th Congress of the European Laryngological Society in Helsinki, Finland

June 13–16, 2012

The main topics: laryngeal imaging, swallowing disorders and human papilloma virus in the larynx. A faculty of experts will also share their knowledge of early laryngeal carcinoma, glottal insufficiency, neurolaryngology and altering or restoration of voice. Part of the scientific program is targeted to top professionals. Elements for continuing medical education, especially designed for general otolaryngologists and residents, however, play a significant role.

The abstract submission will be open until Feb 1, 2012. Please, visit the congress website: www.confedent.fi/els2012 or the web site of the society www.elsoc.org
17th World Congress for Bronchology and Interventional Pulmonology

17th World Congress for Bronchoesophagology

“In the pursuit of excellence in bronchoscopy”

June 15 – 18, 2012
Cleveland, Ohio, USA

Atul C. Mehta, MD
President
17th WCBIP

Thomas Rice, MD
President
17th WCBE

Symposium Topics

- Bronchial Thermoplasty
- Early Diagnosis of Lung Cancer
- Diagnosing Pulmonary Nodules
- Bronchoscopy in Pediatric Patients
- What a Bronchoscopist Should Know About Bronchomalacia
- Bronchoscopy in Lung Transplantation
- Bronchoscopy in Emerging Countries
- Education in Bronchoscopy
- Non-Invasive Staging of Lung Cancer
- Recent Advances in Bronchoscopy

- Safety and Quality in Bronchoscopy
- Endobronchial Ultrasound
- Controversies in Interventional Pulmonology
- Cost-Effectiveness in Interventional Pulmonology
- Current Status of TBNA
- Interventional Pulmonology
- Current Status of Pleuroscopy
- Endobronchial Stents
- Percutaneous Dilatational Tracheostomy

- Radiographic Bronchoscopic Correlation
- Surgical Management of Airway Lesions
- Clinical Challenges in Interventional Pulmonology
- Modes of Endobronchial Radiation
- Thermal Ablation and Cryotherapy of Endobronchial Lesions
- Anesthesia for Bronchoscopy: Techniques and Controversies
- Endoscopic Management of Laryngotracheal Disorders
- Endoscopic Management of Emphysema

This activity is designed for pulmonologists, thoracic surgeons, otolaryngologists, gastroenterologists, anesthesiologists, respiratory therapists, physicians under training, and other interested health care professionals.

This activity has been approved for AMA PRA Category 1 Credit™.

EUROGIN conferences have become a worldwide reference in the area of HPV related diseases. In 2012 the meeting includes a special forum on the growing impact of HPV related head and neck cancers:

**Human Papillomavirus and Head and Neck Cancer Forum**

**Program Committee**

**Coordination:** H. Mehanna (UK)

**Members:** A. Chaturvedi (USA), M. Gillison (USA), J. Lacau St. Guily (France), L. Licitra (Italy), S. Syrjänen (Finland), M. Tommasino (France)

HPV induced oropharyngeal cancer is one of the fastest rising cancers in many countries. This new disease entity appears to have significantly better survival outcomes. However, important questions arise regarding its natural history, diagnosis, patient counselling and the best management regimens.

The HPV and Head and Neck Forum extends over 3 days and includes the following key features:

1. Seminar on Human Papillomavirus (HPV) and Head and Neck Cancer on July 9, 2012 (14:00 – 17:00)
   This is a specialized half-day seminar offering state-of-the art scientific information for clinicians with a special interest in HPV infections and related HN diseases.

The program of this seminar is adapted to the clinical practice of the participants and includes:

2. Several scientific sessions on HPV and head and neck cancers, including:
3. EUROGIN Consensus Session (Roadmap 2012):
   Cervix and head and neck HPV associated cancers
4. Presentation of original papers as oral communications or posters
5. In addition, the EUROGIN 2012 congress offers a unique platform for global networking with high-level HPV experts.

**CME (Continuing Medical Education)**

EUROGIN 2012 is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) for a maximum of 21 hours of European external CME credits. EACCME credits can be converted to AMA PRA Category 1 Credits™.

**EUROGIN 2012 Congress Presidents:** Xavier Bosch (Spain); Silvia Franceschi (France); Stina Syrjänen (Finland)

**EUROGIN Scientific Director:** Joseph Monsonego (France)

Abstract submission deadline: February 28, 2012

www.eurogin.com/2012

or contact us by email: admin@eurogin.com/peter.mattonet@eurogin.com
In May 2012, the 11th International Congress of the European Society of Pediatric Otorhinolaryngology will be organized in Amsterdam, one of the most colourful cities in the world. The congress will bring together clinicians and researchers from all over the world who are dedicated to the many aspects of Pediatric Otorhinolaryngology.

The theme of ESPO2012 will be ‘Pediatric Otorhinolaryngology: from experience-based to evidence-based practice’. In contrast to this lengthy title, we have decided to make this a ‘short, sharp’ meeting of two and a half days, concentrating on the exchange of recent clinical insights and innovative scientific ideas. The programme will include state-of-the-art plenary lectures, panel discussions, (digital) posters, workshops and telemedicine sessions, selected presentations from submitted abstracts. Ample opportunity will be provided for interactive discussions.

The symposium will take place at the Grand Hotel Krasnapolsky in the very heart of old Amsterdam. The name of the city is synonymous with history, art, culture, and friendly open citizens, and thus attractive to everyone.

We look forward to welcoming you in Amsterdam in May 2012.

Anne Schilder, Chairman  
Hans Hoeve, Vice chairman

A Matter of Wonder
What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.
Implantable Bone Conduction Hearing Aids

Editors
Martin Kompis
Marco-Domenico Caversaccio

Contents
Preface: Kompis, M.; Caversaccio, M.-D.
Introduction and Basics
Historical Background of Bone Conduction Hearing Devices and Bone Conduction Hearing Aids: Mudry, A.; Tjellström, A.
Acoustic and Physiologic Aspects of Bone Conduction Hearing: Stenfelt, S.
Overview over Different Systems
The Ponto Bone-Anchored Hearing System: Westerkull, P.
Partially Implantable Bone Conduction Hearing Aids without a Percutaneous Abutment (Otomag): Technique and Preliminary Clinical Results: Siegert, R.
Surgical Aspects
Surgery for the Bone-Anchored Hearing Aid: Arnold, A.; Caversaccio, M.-D.; Mudry, A.
Paediatric Baha: McDermott, A.-L.; Sheehan, P.
Complications of Bone-Anchored Hearing Devices: Wazen, J.J.; Wycherly, B.; Daugherty, J.
Audiological Aspects
Audiological Results with Baha® in Conductive and Mixed Hearing Loss: Pflüger, F.; Caversaccio, M.-D.; Kompis, M.
Bone-Anchored Devices in Single-Sided Deafness: Stewart, C.M.; Clark, J.H.; Niparko, J.K.
Challenges and Recent Developments in Sound Processing for Baha®: Flynn, M.C.
Bone-Anchored Hearing Aids versus Conventional Hearing Aids: Banga, R.; Lawrence, R.; Reid, A.; McDermott, A.-L.
Outlook
The Future of Bone Conduction Hearing Devices: Hökanson, B.
