**Guidelines for Authors**

Acta Cytologica is a bimonthly published journal that aims to cover all aspects within the area of both clinical cytology and cytopathology. It further the understanding of cytopathologic processes and facilitates the translation of current research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 cytology societies around the world, Acta Cytologica evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlation. The journal features Original Papers (Fine Needle Aspiration, Gynecologic Cytopathology, Nongynecologic Cytopathology, Techniques, Molecular Techniques), Novel Insights from Clinical Practice (formerly Case Reports), Letters to the Editor and Reviews. Criteria for acceptance are quality, originality, and clarity. Acta Cytologica will not consider papers that are either preliminary or purely descriptive. Reports on clinical cases are accepted only if they provide novel insight into unresolved problems of cytology and cytopathology. All articles are subject to editorial review.

**Submission**

Original papers written in English are considered. Manuscripts should be submitted online using the on-line submission website at [www.karger.com/acym](http://www.karger.com/acym) (the preferred word-processing package is MSWord®). Before submitting your manuscript, you are encouraged to read the detailed guidelines at [www.karger.com/acym](http://www.karger.com/acym)_guidelines for specific directions as how to get a manuscript ready for submission. If you should have any problems with your submission, please contact the editorial office. Marluce Bibbo, MD S. Karger AG Editorial Office 'Acta Cytologica' P.O. Box CH–4009 Basel (Switzerland) Tel. +41 61 306 1357 Fax +41 61 306 1434 E-Mail acy@karger.ch

**Conditions**

All manuscripts must be accompanied by a covering letter signed on behalf of all authors verifying that all the authors were active participants. Assurance should be given that the manuscript is original and not under simultaneous consideration for publication in another journal. Please provide complete financial disclosure information. Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see N Engl J Med 1997;336:309–315). All articles will undergo an in-depth peer-review process. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Acta Cytologica and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the authors' responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. Signed permission forms from the copyright holders and original authors for all previously published tables or figures must be provided.

**Sections**

Original Paper (Fine Needle Aspiration, Gynecologic Cytopathology, Nongynecologic Cytopathology, Techniques, Molecular Techniques): Submitted manuscripts should be fully documented reports of original research. They must describe significant and original observations. Review: Potential authors are asked to contact the Editor-in-Chief before submitting a paper in order to avoid clashes with other pending reviews. Letter to the Editor: Letters to the Editor concerning articles published in Acta Cytologica may be submitted for publication. They should not be more than one printed page in length. If accepted, the authors of the articles concerned will be given the opportunity to reply. Novel Insights from Clinical Practice (formerly Case Reports): the publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on 'Established facts' (what is already known) and 'Novel insights' (what new information has been found) should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation.

**Arrangement**

General: Manuscripts should be written in English and be as concise as possible. The length of the text should be limited to approximately 3,000 words, pages numbered consecutively, starting with the title page, and continuing in the following order: abstract and key words, body text, references, figure legends and tables. Use generic names of drugs when possible. For any trade name cited, capitalize the first letter, and include the manufacturer's name and location (city, state/province, country). Express weights and measures in metric values. Acknowledge any presentation at a national or international medical society and any substantive financial support.

Title page: The first page of each paper should indicate the title, the authors' names, the institute(s) where the work was conducted, and a short title for use as running head. Limit the number of authors to 6. If more than 6 authors contributed significantly to the article, the editorial office will consider including their names upon request.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as an e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential.

Abstract: Each paper needs an abstract limited to 200 words structured as follows: Objective, Study design, Results and Conclusions. For Novel Insights from Clinical Practice the headings should be: Background, Case and Conclusion. Address the study's power to detect a difference if the research identified important variables that lacked a statistically significant difference.

Footnotes: Footnotes should be avoided. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Materials and Methods: Acknowledge that the original research was approved by the local institutional review board. Clearly state the method of any randomization, blinding and selection of specific statistical tests. Explain dropouts/exclusions and confounding variables.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and a figure; a legend, also prepared on a separate page. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for both monochrome and color prints. Do not provide crop marks. Each illustration must be labelled with its number and the first author's name. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling (final size), line art drawings one of 800–1,200 dpi. Do not modify a low-resolution image by increasing the dpi. Figure files should not be embedded in a document file but submitted separately. All illustrations must include the original magnification and the stain employed, and clearly identify from each plate. Avoid tables in which the data could be included in the text in a few sentences.

References: In the text identify references by Arabic numbers [in square brackets]. Material submitted for publication but not yet accepted should be noted as 'unpublished data' and not be included in the reference list. The list of references should include only those publications which are cited in the text. In general, avoid listing unpublished data or manuscripts, personal communications, websites and non-peer-reviewed publications. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org). Authors using EndNote® may choose the format setting for Intervirology for the correct format of references.

Examples

(b) Papers published only with DOI numbers: The authors were active participants.

**Color Illustrations**

For all manuscripts accepted, authors will be charged CHF 500.00 for each color page published in the print version of the journal. Several color illustration may be placed onto one color page. When the illustration appears in black and white in the printed version, the authors will not be charged a fee. In the online version all figures submitted in color will appear in color at no charge to the author. Referring to colors in the text and figure legends should be avoided. We recommend using symbols, instead of color, for charts and graphs.

**Ethics**

Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's committee on human research and thus meets the standards of the Declaration of Helsinki in its revised version of 1975 and its amendments of 1983, 1989, and 1996 (KAMA 1997;277:925–926). Information suitable to
Guidelines for Authors

reveal the subject’s identity is to be avoided. Further, authors should also state that animal experiments conform to institutional standards. Copies of these guidelines and policy statements must be available for review by the editors if necessary.

Conflict of Interest
All forms of funding and support, including that from companies, as well as any potential competing financial interests should be acknowledged in the cover letter to the editors when applicable. The statement has to be listed at the end of the article.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™
Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3000.–, which is a permissible cost in a grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/FAQ.htm#a1.

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copy-editing and design improvements as well as citation links.

Copy Editing
All manuscripts accepted for publication by Karger are subject to copy editing. Changes introduced by the copy editor and/or questions will be marked in the manuscript as being handled by the copy editor and/or questions will be marked in the manuscript so please be sure to check the proofs against the manuscript. The copy edited manuscript will be returned along with the proofs.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author. No page proofs are supplied.

Reprints
An order form and a price list are sent with the proofs. Orders submitted after the release of an article in print are subject to considerably higher prices.

A comprehensive and well-illustrated monograph on rare tumors

FNA Cytology of Ophthalmic Tumors

Editors
Charles V. Biscotti
Arun D. Singh

This comprehensive and well-illustrated volume in the outstanding Monographs in Clinical Cytology series examines the spectrum of ophthalmic cytology including uveal, retinal, and orbital tumors. It includes historical perspectives, current indications, surgical techniques, and practical aspects of the cytological preparation of ophthalmic fine needle aspiration samples. The importance of a close collaboration between cytologists and ophthalmologists in the field of ophthalmic tumors is emphasized. The monograph presents high-quality illustrations accompanied by very informative legends that reveal the details of the clinical-cytological correlation evident in many of the cases managed by the authors. It presents a complete spectrum of ophthalmic tumors covering uveal melanoma, uveal metastasis, intraocular lymphoma, and orbital tumors. Recent innovations in the instrumentation and use of digital cytology in fine needle aspiration biopsy are also reviewed.

This publication is an excellent reference text on rare tumors. It is highly recommended reading for ophthalmic pathologists, cytologists, and oncologists.

Contents

Preface

Chapter 1
History, Indications, Techniques and Limitations: Singh, A.D.; Pelayes, D.E.; Brainard, J.A.; Biscotti, C.V.

Chapter 2
Cytological Preparation: Brainard, J.A.; Biscotti, C.V.

Chapter 3
Uveal Metastases: Biscotti, C.V.; Singh, A.D.

Chapter 4
Uveal Lymphoma: Chute, D.J.; Biscotti, C.V.; Singh, A.D.

Chapter 5
Uveal Melanoma: Diagnostic Features: Biscotti, C.V.; Singh, A.D.

Chapter 6
Uveal Melanoma: Prognostication: Turell, M.E.; Tubbs, R.R.; Biscotti, C.V.; Singh, A.D.

Chapter 7
Vitreous Biopsy: Specimen Preparation and Interpretation: Coupland, S.E.

Chapter 8

Chapter 9
Fine Needle Aspiration Cytology in Orbital Tumors: Seregard, S.; Tani, E.

Chapter 10

Author Index
Subject Index
Pathobiology offers a valuable platform for the publication of high-quality original research into the mechanisms underlying human disease. Aiming to serve as a bridge between basic biomedical research and clinical medicine, the journal welcomes articles from scientific areas such as pathology, oncology, anatomy, virology, internal medicine, surgery, cell and molecular biology, and immunology. Published bimonthly, Pathobiology features original research papers and reviews on translational research. The journal offers the possibility to publish proceedings of meetings dedicated to one particular topic.

Selected contributions
Erythropoietin: A Hormone with Multiple Functions: Lombardero, M. (Lugo); Kovacs, K. (Toronto, Ont.); Scheithauer, B.W. (Rochester, Minn.)
Differential Diagnoses of Systemic Mastocytosis in Routinely Processed Bone Marrow Biopsy Specimens: A Review: Horny, H.-P. (Ansbach); Sotlar, K. (Munich); Valent, P. (Vienna)
Inter- and Intra-Biobank Networks: Classification of Biobanks: Shickle, D.; Griffin, M.; El-Arifi, K. (Leeds)
Cystic Fibrosis Transmembrane Conductance Regulator Can Export Hyaluronan: Schulz, T. (Münster); Schumacher, U. (Hamburg); Prante, C. (Bad Oeynhausen); Sextro, W. (Hamburg); Prehm, P. (Münster)
Mutations of Lysophosphatidic Acid Receptor Genes in Human Osteosarcoma Cells: Okabe, K.; Hayashi, M.; Fujii, M. (Higashiosaka); Honoki, K.; Mori, T. (Kashiwara); Fukushima, N.; Tsuchida, H. (Higashiosaka)
297  Usefulness of Discriminant Analysis Using Nuclear Three-Dimensional Analysis in Atypical Cells Prepared from Bronchial Brushing Cytology Cases That Are Cytologically Challenging

Molecular Techniques

304  Molecular Diagnosis and Species Identification of Mucosal Leishmaniasis in Iran and Correlation with Cytological Findings
Shirian, S. (Shiraz/Münster); Oryan, A.; Hatam, G.-R.; Daneshbod, K.; Daneshbod, Y. (Shiraz)

Novel Insights from Clinical Practice

221 Systematic Review, Meta-Analysis and Randomized Controlled Trials in Cytopathology
AbdullGaffar, B. (Dubai)

228 Fine Needle Aspirate of Autoimmune Pancreatitis (Lymphoplasmacytic Sclerosing Pancreatitis): Cytomorphologic Characteristics and Clinical Correlates
Holmes, B.J.; Hruban, R.H.; Wolfgang, C.L.; Ali, S.Z. (Baltimore, Md.)

233 New Terminology for Intrauterine Endometrial Samples: A Group Study by the Japanese Society of Clinical Cytology
Yanoh, K. (Suzuka); Hirai, Y. (Ariake); Sakamoto, A. (Mitaka); Aoki, D. (Tokyo); Moriya, T. (Kurashiki); Hiura, M. (Matsuyama); Yamawaki, T. (Ise); Shimizu, K. (Osaka); Nakayama, H. (Yokohama); Sasaki, H. (Kashiwa); Tabata, T. (Tsu); Ueda, M. (Osaka); Udagawa, Y. (Toyoake); Norimatsu, Y. (Tobe)

242 Gardnerella, Trichomonas and Candida in Cervical Smears of 58,904 Immigrants Participating in the Dutch National Cervical Screening Program

247 Detection of High-Grade Lesions on Cell Blocks from Residual Fluids of Pap Smears Diagnosed as Low-Grade Abnormalities: A Preliminary Pilot Study
Catteau, X.; Simon, P.; Noël, J.-C. (Brussels)

251 Population-Based Prevalence of Abnormal Cervical Cytology Findings and Local Risk Factors in Ibadan, Nigeria: Implications for Cervical Cancer Control Programs and Human Papilloma Virus Immunization
Thomas, J.O.; Ojemakinde, K.O.; Ajayi, I.O.; Omidbodun, A.O.; Fawole, O.I.; Oladepo, O. (Ibadan)

259 Body Mass Index and Outcome of ASC-H-Interpreted Cervical Smears in Postmenopausal Women
Ahn, S.; Lee, Y.-Y.; Sung, J.-Y.; Lee, J.J.; Oh, Y.L.; Sung, C.O.; Song, S.Y. (Seoul)

266 Management of Palpable but Radiologically Occult Breast Abnormalities
Sundara Rajan, S.; White, J.; Peckham-Cooper, A.; Lane, S.; Lansdown, M. (Leeds)

271 Vegetable Cell Contaminants in Urinary Bladder Diversion Cytology Specimens
Quiroga-Garza, G. (Houston, Tex.); Nassar, D.; Khalbuss, W.E.; Monaco, S.E.; Pantanowitz, L. (Pittsburgh, Pa.)

277 Cytological Assessment of Healing Palatal Donor Site Wounds and Grafted Gingival Wounds after Application of Ozonated Oil: An Eighteen-Month Randomized Controlled Clinical Trial
Patel, P.V.; Kumar, S.; Vidy, G.D. (Mysore); Patel, A. (Varanasi); Holmes, J.C. (Dublin); Kumar, V. (Mysore)

285 Does Mitosis-Specific Marker Phosphohistone H3 Help the Grading of Upper Tract Urothelial Carcinomas in Cell Blocks?

289 Comparison of Breast Carcinoma Prognostic/Predictive Biomarkers on Cell Blocks Obtained by Various Methods: Cellient, Formalin and Thrombin

Cover illustration
Immunohistochemical stain for estrogen receptor performed on (top left) Cellient cell block, (top right) formalin cell block, (bottom left) thrombin cell block, and (bottom right) paraffin embedded tissue. Each was interpreted to have a total Allred score of 8 (proportion = 5 of 5; intensity = 3 of 3). Original magnification x 400. From Gorman et al., p. 289.
