Paediatric Bronchoscopy

Editors
K.N. Priftis
M.B. Anthracopoulos
E. Eber
A.C. Koumbourlis
R.E. Wood

This book provides an in-depth ‘state-of-the-art’ critical review of the technique and the applications of flexible and rigid bronchoscopy to infants and children. Written by an international panel of experts, it reviews the technical aspects of the procedure, its common and highly specialized applications as well as its potential alternatives. The chapters are enhanced by a wealth of original figures. A major innovation of the book is the inclusion of online videos from actual bronchoscopies that further illustrate and elaborate on the information provided in the text. The book is addressed to paediatric pulmonologists and otolaryngologists, both experienced and in training, as well as to other personnel who are involved in the performance of the procedures. In addition, it is recommended to pulmonologists for adults and general paediatricians who need to be able to evaluate the usefulness of bronchoscopy for their patients and be aware of its limitations and potential contra-indications.

Contents

Foreword
Preface

Introduction: Bush, A.

Techniques and Technical Issues

Bronchoscopic Equipment: Balfour-Lynn, I.M.; Harcourt, J.
Sedation and Anaesthesia for Bronchoscopy: Midulla, F.; Nenna, R.
Special Procedures: Colin, A.A.; Waltz, D.A.
Flexible Fibre-Optic Bronchoscopy in the Intensive-Care Unit: Koumbourlis, A.C.
Interventional Bronchoscopy: Donato, L.; Tran, T.M.H.; Mihailidou, E.
Whole-Lung Lavage: Wood, R.E.
Virtual Bronchoscopy and Other Three-Dimensional Imaging Methods: Anthracopoulos, M.B.; Alexopoulou, E.; Kagadis, G.C.

Airway Anatomy and Abnormalities

Normal Anatomy: Wallis, C.
Congenital and Acquired Abnormalities of the Upper Airways: Eber, E.
Congenital and Acquired Abnormalities of the Lower Airways: Pohunek, P.; Boogaard, R.; Merkus, P.

Flexible Bronchoscopy in Specific Clinical Conditions

Atelectasis, Middle Lobe Syndrome and Plastic Bronchitis: Priftis, K.N.; Rubin, B.
Lung Infection in Cystic Fibrosis and Other Chronic Suppurative Lung Diseases: Davies, J.C.; Bush, A.; Hogg, C.L.
Endobronchial Tuberculosis: Dagli, E.; Gie, R.P.; Uyan, Z.S.; Gossard, P.
Chronic Cough: Masters, L.B.; Chang, A.B.
Lung Transplant Recipients and Other Immunosuppresed Patients: Benden, C.; Aurora, P.

Epilogue
A Four-Decade Perspective on Paediatric Bronchoscopy – Where Have We Come from, and Where Are We Going?: Wood, R.E.

Guidelines for Authors

Mission Statement
Medical Principles and Practice, the journal of the Kuwait University Health Sciences Centre, aims to be a publication of international repute that serves as a medium for dissemination and exchange of scientific knowledge in the health sciences.

Objectives
1. To publish original research in the health sciences.
2. To publish peer-reviewed articles of current international interest in the form of papers, solicited reviews, case reports, short communications, conference proceedings, discussion forums and letters.

Submission
Manuscripts, written in English (the preferred word-processing package is MS-Word), shall be submitted using the online submission website at:

www.karger.com/mpp

Should you experience any problems with your online submission, please contact the Editorial Office of 'Medical Principles and Practice':

mpp@hsu.edu.kw
Professor Azu Owunwanne
Editor-in-Chief, 'Medical Principles and Practice'

Fax +965 2533 3094
www.hsc.edu.kw/vpo/mpp/

Conditions
All manuscripts shall be accompanied by a cover letter from the corresponding author. Please note the Journal only corresponds with the designated author. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other journal and have not been previously published.

The corresponding author must affirm that all co-investigators have been duly credited in the manuscript either as co-authors or in the acknowledgement section. To meet the criteria of authorship, it is necessary to have taken a significant part in the overall conception and design of the research or to have participated in the acquisition, analysis and interpretation of data as well as having written initial drafts of the manuscript, and revised and contributed to the final manuscript. Simply having been a part of the research group or contributing to data collection or providing patients or analysis of tests is not sufficient to satisfy the criteria for authorship. Manuscripts must comply with the ethical standards recommended by the Helsinki Declaration. The editors realize that the use of anesthetics, analgesics and tranquilizers would defeat the purpose of some animal experiments. However, the use of painful or otherwise noxious stimuli must be carefully and thoroughly justified in the manuscript.

Like other international journals, Medical Principles and Practice regards plagiarism and self-plagiarism as unethical behaviour and potential authors are required to be vigilant in ensuring this does not occur in their manuscripts. For a useful discussion of this topic potential authors are referred to the publication by Bretag and Mahmud: Self-plagiarism or appropriate textual re-use. J Acad Ethics 2009;7:193–200.

Submission of article(s) for consideration for publication requires transfer of copyright from the author to the publisher. All authors are required to sign the Assignment of Copyright agreement to consign the comments are sent to the corresponding author. For a useful discussion of this topic potential authors are referred to the final manuscript be void if the manuscript is not accepted for publication.

Review Procedure
All submitted manuscripts are reviewed by the editors for adequacy of documentation, composition and adherence to the guidelines of the Journal. Manuscripts not submitted in accordance with these guidelines will be returned to the author for correction before review. Manuscripts considered suitable for review are sent to at least two reviewers for evaluation. All reviewers are confidential. The reviewers are asked to assess the originality, scientific merit, and design of the study, including statistical analysis, professional interest, and overall quality of the manuscript. The reviewer may recommend the manuscript be accepted as is, be revised or rejected. It is unusual for a manuscript to be accepted without revision. Deadline for submission of the revised manuscript is 3 months from the date the reviewers' comments are sent to the corresponding author. The revised manuscript is then reviewed for compliance with reviewers' recommendations and, if deemed acceptable, is edited for clarity, accuracy and style.

Arrangement
Title page: The first page shall indicate the title, authors' names, institution where the work was conducted, the date of submission and the postal address of the corresponding author. The final name shall be used. Write the last names of the authors followed by initials with no punctuation other than a comma to separate names. The final name shall be followed by a colon, then the title of the article with only the first word capitalized (lower case for the remainder of the title). The name of the journal, the year published, volume, and the complete range of pages must be listed. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Acknowledgement: Please provide on a separate page if applicable.

References
In-text Citations: References shall be numbered consecutively in the text using Arabic numerals in [square brackets].

Reference List: The order of the references in the list shall be in the order in which they are first mentioned in the text. Manuscripts accepted for publication but not yet published may be cited, but must be referred to as ‘in press’. Cite all authors unless the number exceeds 10, in which case et al. shall be used. Write the last names of the authors followed by initials with no punctuation other than a comma to separate names. The final name shall be followed by a colon, then the title of the article with only the first word capitalized (lower case for the remainder of the title). The name of the journal, the year published, volume, and the complete range of pages must be listed. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.
Examples
(b) Papers published only with DOI numbers: Theoharis TC, Boucher W, Spear K. Serenum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Tables and illustrations: Prepare each table or figure on a separate page and identify each using Arabic numerals. Tables require a heading; figures a legend, which shall be prepared on a separate page. Due to technical reasons, figures with a screen background will not be accepted. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 600–1,200 dpi. Photomicrographs shall be calibrated on the print by adding a calibration bar (e.g. bar = 1 μm). Patients shown in photographs shall have their identity concealed or provide written consent for publication. If any tables or figures submitted have been published elsewhere, written consent for republication must be obtained by the author from the holders of the copyright (usually the authors and publishers).

Color Illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

NII-Funded Research
The US National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of the article to the PubMed Central, where it will appear after a standard embargo. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/policy.htm

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: articles may not be used for commercial purposes, they must be linked to the publisher’s version, and acknowledge the publisher’s copyright.

Page Charges
There are no page charges for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equivalent to approximately 16 manuscript pages (including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are not accepted.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

A broad introduction to biostatistics that should be on the shelf of every life scientist
David E. Matthews • Vern T. Farewell
Using and Understanding Medical Statistics
4th, completely revised and enlarged edition

Contents
• Basic Concepts
• Tests of Significance
• Fisher’s Test for 2 × 2 Contingency Tables
• Approximate Significance Tests for Contingency Tables
• Some Warnings Concerning 2 × 2 Tables
• Kaplan-Meier or ’Actuarial’ Survival Curves
• The Log-Rank or Mantel-Haenszel Test for the Comparison of Survival Curves
• An Introduction to the Normal Distribution
• Analyzing Normally Distributed Data
• Linear Regression Models for Medical Data
• Binary Logistic Regression
• Regression Models for Count Data
• Proportional Hazards Regression
• The Analysis of Longitudinal Data
• Analysis of Variance
• Data Analysis
• The Question of Sample Size
• The Design of Clinical Trials
• Further Comments Regarding Clinical Trials
• Meta-Analysis
• Epidemiological Applications
• Diagnostic Tests
• Agreement and Reliability

Cardiology features first reports on original clinical, preclinical and fundamental research as well as instructive ‘Novel Insights from Clinical Experience’ and topical comprehensive reviews in selected areas of cardiovascular disease. Investigators from all over the world contribute to keep readers regularly informed of current strategies in the prevention, recognition and treatment of heart disease. Their articles not only describe but offer critical appraisals of new developments in non-invasive and invasive diagnostic methods and in pharmacologic, nutritional and mechanical/surgical therapies. Following the incorporation of the journal Heart – Drug, Cardiology has increased its coverage of issues relating to cardiovascular clinical pharmacology and drug trials. Special sections in a variety of subspecialty areas reinforce the journal’s value as a complete record of recent progress for all cardiologists, internists, cardiac surgeons, clinical physiologists, pharmacologists and professionals in other areas of medicine interested in current activity in cardiovascular diseases.
