Guidelines for Authors

International Archives of Allergy and Immunology

Submission

Only papers written in English are considered. Detailed Online Submission Instructions with a link to the Submission Website are at http://www.karger.com/iaa/. Before submitting your manuscript, you are encouraged to review the detailed guidelines at www.karger.com/iaa_guidelines for specific directions as how to get a manuscript ready for submission. If you should have any problems with your submission, or should you feel the need to submit the paper in a non-electronic form, please contact the editorial office:

Prof. Dr. R. Valeta
Editor-in-Chief
S. Karger AG

Fax +41 61 306 1434
E-Mail eieberherk@karger.ch

Mailing address for courier deliveries only:
Allschwilerstr. 10
CH-4055 Basel (Switzerland)

Original papers: Submitted manuscripts should be fully documented reports of original research. They must describe significant and original observations to be critically evaluated and, if necessary, repeated.

Short communications: These manuscripts should not contain more than 2 printed pages (i.e., 6,460 characters per page), including an abstract, essential references and not more than 3 tables or figures. Such communications should represent complete, original studies and should be arranged in the same way as full-length manuscripts.

Novel Insights from Clinical Practice (formerly Case Reports): The publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on 'Established facts' (what is already known) and 'Novel insights' (what new information has been gained) are required and should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation. The manuscript should be presented with an abstract (unstructured, max. 200 words), followed by introduction, case report and discussion. Maximum 3 figures.

Review articles, minireviews, opinion articles, controversies and commentaries: Authors who wish to contribute a manuscript to one of these categories should contact the Editor-in-Chief. Minireviews should be focused, brief reports on topics of current interest. Commentaries should offer a more personalized perspective on a topic that will be of interest to the general readership. All contributions to these categories will be subject to Editorial review.

Letters to the Editor concerning work published in the journal may be submitted. They should not exceed 2 manuscript pages including one table or figure.

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. A cover letter with the name, address, and telephone and telex numbers of the corresponding author must accompany each manuscript. This letter must include a statement that affirms that all authors agree with the submission. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of International Archives of Allergy and Immunology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. One of the criteria considered in reviewing manuscripts is the proper treatment of animals. In particular, the use of painful or otherwise noxious stimuli must be carefully and thoroughly justified. Papers that do not meet these criteria will not be accepted for publication.

Conflict of Interest

Authors are required to disclose any sponsorship or funding arrangements, including that from companies, funding arrangements, including that from companies, relating to their research. All authors should disclose any possible conflicts of interest in the cover letter to the editor and at the end of the article.

Plagiarism Policy

Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Arrangement

Manuscripts should be written in English and be as concise as possible. Be sure to display line numbers (1, 2, 3, and so forth) in the left margin of the manuscript (line numbering can be added from the Page Setup or Format menu of word processing programs). The line numbering should be continuous throughout the entire manuscript, from the title page through to the final page (i.e., do not begin numbering from 1 again at the top of each page).

Title page: The first page of each paper should indicate the title, the authors’ full names, affiliations and e-mail addresses, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as an e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Provide on a separate page an abstract of not more than 250 words. This abstract should consist of four paragraphs, labeled Background, Methods, Results, and Conclusions. They should briefly describe, respectively, the problem being addressed in the study, how the study was performed, the salient results, and what the authors conclude from the results.

The text should be arranged in the following sections: Introduction, Material and Methods, Results, Discussion, Acknowledgement, References.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typeset at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 x 223 mm) or provide crop marks. Each illustration must be labeled with its number and the author’s name. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling (final size), line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately (see detailed instructions at www.karger.com/iaa/).

Color illustrations

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.– per page.

Abbreviations: Avoid overuse of abbreviations. Introduce an abbreviation only when the same term occurs three or more times.
References: In the text identify references by Arabic numerals (in square brackets). Material submitted for publication but not yet accepted should be noted as ‘unpublished data’ and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theoharis TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Full address: The exact postal address complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as your e-mail address.

Reference Management Software: Use of EndNote® is recommended for easy management and formatting of citations and reference lists (format setting: Intervirology).

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be used in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™
Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.Karger.com. The option is available for a one-time fee of CHF 3000.–, which is a permissible cost if the data cannot be converted properly to a PDF file, and video files (.mov, .avi, .mpeg).

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits your manuscript on your behalf to PubMed Central (PMC) immediately upon publication. It usually receives a PMCID within approximately a month and will appear in PMC after 12 months. For those selecting our premium Author’s Choice™ service, the usual embargo will be overridden, accelerating the accessibility of your work.

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copypasting and design improvements as well as citation links.

Page Charges
There are no page charges for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.–. The allotted size of a paper is 5 printed pages (6,460 characters per page), which is equal to approx. 14 manuscript pages including tables, illustrations and references.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

The forum for innovative research in virology

Intervirology
International Journal of Basic and Medical Virology

Editor-in-Chief
U.G. Liebert, Leipzig

Editor for Japan/S.E. Asia
O. Hino, Tokyo

Intervirology covers progress in both basic and clinical virus research, and aims to provide a forum for the various disciplines within virology. Issues publishing original papers alternate with thematic issues, focusing on clearly defined topics. This thematic concentration serves to make timely reviews, research reports and controversy easily accessible to both specialists in the field and those who want to keep track of the latest developments outside their own area of interest. In addition to original papers, regular issues publish short communications and letters to the editor to provide readers with a forum for the exchange of ideas and comments. The scope encompasses work on the molecular biology of human and animal viruses, including genome organization and regulation, and the structure and function of viral proteins. The pathogenesis, immunology, diagnosis, epidemiology, and prophylaxis and therapy of viral diseases are considered.

Selected contributions

- Genotypic Analysis of Epstein–Barr Virus Isolates Associated with Nasopharyngeal Carcinoma in Northern China: Cui, Y.; Wang, Y.; Liu, X.; Chao, Y.; Xing, X. (Qingdao); Zhao, C. (Pittsburgh, Pa.); Liu, C.; Luo, B. (Qingdao)
- Evidence of Hepatitis E Virus Exposure among Seronegative Healthy Residents of an Endemic Area: Husain, M.M.; Srivastava, R. (Lucknow); Akondy, R. (Atlanta, Ga.)
- Aggarwal, R. (Lucknow); Jameel, S. (New Delhi); Naik, S. (Lucknow)
- Quantitative Determination of Hepatitis C Core Antigen in Therapy Monitoring for Chronic Hepatitis C: Moscato, G.A. (Pisa); Giannelli, G. (Bari); Grandi, B.; Pieri, D.; Marsi, O.; Guarducci, I.; Batini, I. (Pisa); Altomare, E. (Foggia); Antonacci, S. (Bari); Capria, A.; Pellegrini, G. (Pisa); Sacco, R. (Foggia/Pisa)
- Increased Neutralizing Antibody Response after Simultaneous Immunization with Leucogen and the Feline Leukemia Virus Transmembrane Protein: Langhammer, S.; Fiebig, U.; Kurth, R.; Denner, J. (Berlin)
- Expression of E1E2 on Hepatitis C RNA-Containing Particles Released from Primary Cultured Human Hepatocytes Derived from Infected Cirrhotic Livers: Ndongo, N. (Lyon); Selliah, S. (Montréal, Qué.); Berthillon, P. (Lyon); Raymond, V.-A. (Montréal, Qué.); Tropeo, C. (Lyon); Bilodeau, M. (Montréal, Qué.); Petit, M.-A. (Lyon)
- High Expression of Vascular Endothelial Growth Factor in EV71-Infected Patients Does Not Originate from EV71-Infected Cells: Huang, S.-C.; Raghavaraju, G.; Liu, H.-S. (Tainan)
- Prevaccination Distribution of Human Papillomavirus Types in Italian Women with High-Risk Lesions and Cervical Neoplasia: De Francesco, M.A.; Gargiulo, F.; Schreiber, C.; Ciravolo, G.; Salinaro, F.; Manca, N. (Brescia)
