Psychiatric symptoms are common in the neurological and geriatric care of patients with Parkinson's disease. This book assembles short reviews from experts in the field to chart the various psychiatric syndromes known in Parkinson's disease, their presentation, etiology and management. Presented are special topics on epidemiology of psychiatric symptoms, affective disorders and apathy, early cognitive impairment through to dementia, visuo-perceptual dysfunction, psychotic disorders, sleep disturbances, impulse disorders and sexual problems. Further, rarely discussed issues, such as the relationship between somatoform disorders and parkinsonism are reviewed. This publication is essential reading for old age psychiatrists, gerontologists and neurologists who work with patients suffering from Parkinson's disease. In addition, health practitioners who deal with senior patients, as well as scientists who need a quick update on the progress in this important clinical field will find this volume a helpful reference.

Contents

Preface
Epidemiology of Psychiatric Symptoms in Parkinson's Disease: Leentjens, A.F.G.
Depression, Apathy and Anxiety Disorders: Brockman, S.; Jayawardena, B.; Starkstein, S.E.
Apathy in Parkinson's Disease: Leroy, I.; David, R.; Robert, P.
Disorders of Visual Perception in Parkinson's Disease and Other Lewy Body Disorders: Collerton, D.; Mosimann, U.P.; Archibald, N.
Psychosis and Parkinson's Disease: Jakel, R.J.; Stacy, M.A.
Sleep in Parkinson's Disease and Dementia with Lewy Bodies: Ferman, T.J.; Boeve, B.F.
An Update on Impulse Control Disorders in Parkinson’s Disease: Voon, V.; Mehta, A.R.
Parkinson's Disease with Dementia: Taylor, J.-P.; O'Brien, J.T.
Somatoform Disorders in Parkinson's Disease and Dementia with Lewy Bodies: Onofri, M.; Thomas, A.; Bonanni, L.; di Giannantonio, M.; Gambi, F.; Sepe, G.
Drug-Induced Parkinsonism and Abnormal Involuntary Movements: Ritchie, C.W.
Psychopathology

International Journal of Descriptive and Experimental Psychopathology, Phenomenology and Psychiatric Diagnosis

KARGER

Printed in Switzerland on acid-free and non-aging paper (ISO 9706) by Reinhardt Druck, Basel
Appears bimonthly: 1 volume per year (6 issues)
Guidelines for Authors

Psychopathology

‘Psychopathology’ addresses scientists who work on descriptive psychopathology in clinical contexts, or with experimental methods in neuropsychology and experimental psychopathology, or on conceptual framing of psychopathological findings for understanding pathogenesis and for validation of diagnosis and classification. They may include an interdisciplinary approach to other medical and biological fields or to the humanities. Psychopathology does not only invite reports on medical research but also wants to address psychopathology as refer to pathological phenomena or work within clinical settings. The central field of interest is the convergence of clinical phenomena, experimental findings, and conceptualisations. This would also include describing pathogenetic mechanisms of disturbed neuropsychological functions which allows remodelling and evaluation of psychotherapeutic tools.

Types of Papers

Psychopathology’ accepts papers on the following sections: Original Paper, Review, Case Report, Short Report (up to 8 manuscript pages). Reviews may contain overviews, meta-analyses and conceptual papers based on a literature overview; Original Papers contain data generated by the authors; Case Reports will only be accepted if they stimulate novel functional insights or classificatory concepts; Short Reports will also be restricted to relevant issues of scientific debate.

Submission

Only original papers written in English are considered and should be submitted using the online submission website at: www.karger.com/psp

Should you experience any problems with your submission, please contact: Shirin.Neidlein@med.uni-heidelberg.de

Editorial Office ‘Psychopathology’
Zentrum für Psychosomatische Medizin
Klinik für Allgemeine Psychiatrie
Universität Heidelberg
Vedstr. 4

Tel. +49 6221 56 7308
Fax +49 6221 56 5477

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of ‘Psychopathology’ and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement

Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head. A short title, the authors' names, the institute where the work was conducted, and a short title for use as running head.

Abstract: The abstract should not exceed 30 lines and should be structured as: Background, Sampling and Methods, Results, and Conclusions (including study limitations).

Methods: Sampling should be described in detail so that possible selection biases may be discussed. Methods should be reported in a manner enabling easy replication.

Results: The results should be described precisely and must be separated from the discussion.

Discussion: The discussion should move along the same lines as the results and should discuss the relevant literature regarding consistencies and inconsistencies as well as elucidate on the theoretical and practical implications of the results. Further research perspectives may be addressed, e.g. concerning clarification of inconsistencies with the literature.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 x 233 mm) or provide crop marks. Electronically submitted bw/half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800 – 1200 dpi.

Color illustrations: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legend.

Print edition: Up to 2 color illustrations per page can be integrated within the text at CHF 800.– per page.

References: In the text, identify references by Arabic numerals (in square brackets). Material submitted for publication but not yet accepted should be noted as ‘unpublished data’ and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus System. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theobaldes TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™

With this option the author can choose to make his article freely available online against a one-time fee of CHF 3000.–. This fee is independent of any standard charges for supplementary pages, color images etc. which may apply. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central (PMC) immediately upon publishing. It usually receives a PMCID within approximately a month and will appear in PMC after 12 months. For those selecting our premium Author’s Choice™ service, the usual embargo will be overridden, accelerating the accessibility of your work. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/policy.htm

Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institutional servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Page Charges

There is no page charge for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.–. The allotted size of a paper is equal to approx. 14 manuscript pages (including tables, illustrations and references).

Proofs

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints

Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

For over 40 years the Karger Gazette has been distributed to a growing audience worldwide. Published once a year in newspaper format, it highlights advances in biomedicine and clinical practice, introduces personalities, portrays research institutes and chronicles milestones in the history of Karger Publishers in a lively and readable style. With invited contributions by experts from all over the world, each issue is devoted to a special topic of current interest.

In the latest issue, read free articles on the causes of the aging process, why aging stops in later adult life, the quiet epidemic of Alzheimer’s Disease, internet use by seniors, and more.

We are pleased to announce the 15th Congress of the European Society for Dermatology and Psychiatry which will take place on 6-8 June 2013 in Roskilde.

The theme of the ESDaP 2013 Conference is **Mind the skin – the hard facts** which reflects that the conference will deal with many aspects of the challenging interface between the skin and the mind, from neuroimmunology to the psychosocial and cultural aspects of appearance. The varied programme is aimed at attracting participants from numerous backgrounds, while maintaining a focus on the clinical consequences of psychodermatological problems.
The neurobiological approach to behavior and mental disorders

The biological approach to mental disorders continues to yield innovative findings of clinical importance, particularly if methodologies are combined. This journal collects high quality empirical studies from various experimental and clinical approaches in the fields of Biological Psychiatry, Biological Psychology and Neuropsychology. It features original, clinical and basic research in the fields of neurophysiology and functional imaging, neuropharmacology and neurochemistry, neuroendocrinology and neuroimmunology, genetics and their relationships with normal psychology and psychopathology. In addition, the reader will find studies on animal models of mental disorders and therapeutic interventions, and pharmacoelectroencephalographic studies. Regular reviews report new methodologic approaches, and selected case reports provide hints for future research. Neuropsychobiology is a complete record of strategies and methodologies employed to study the biological basis of mental functions including their interactions with psychological and social factors.

Sexual Dysfunction: Beyond the Brain-Body Connection

Editor
Richard Balon

During the last years human sexuality has been the focus of interest and study by various disciplines. In this volume a multidisciplinary team of international experts discuss contemporary issues of human sexuality from updates on diagnosis to the management of various sexual dysfunctions. Reviews of the management of several female sexual dysfunctions, the impact of cancer on sexual desire and function as well as the newest trends in sex therapy; androgen deprivation treatment of sexual behavior and autogynephilia are discussed in detail. Further, the complex interplay between the field of human sexuality and the Internet, psychological and cultural aspects of infertility are reviewed.

A large amount of clinical material on topics rarely covered in other volumes will prove invaluable reading to clinicians from various disciplines such as psychiatry, psychology, urology, gynecology, sexology and sex therapy.

Contents

Update on Diagnoses of Sexual Dysfunctions: Controversies Surrounding the Proposed Revisions of Existing Diagnostic Entities and Proposed New Diagnoses: Balon, R.; Wise, T.N.

Sexual Desire and Arousal Disorders in Women: Lean, E.; Both, S.

Female Orgasmic Disorder: Rellini, A.; Clifton, J.

Developments and Trends in Sex Therapy: Meana, M.; Jones, S.

The Impact of Cancer on Sexual Function: Morreale M.

The Impact of Sexual Trauma on Sexual Desire and Function: McCarthy, B.; Farr, E.

The Complexity of Internet Sexuality: Daneback, K.; Ross, M.W.

Autogynephilia: An Underappreciated Paraphilia: Lawrence, A.A.

Psychological and Cross Cultural Aspects in Infertility and Human Sexuality: Pacheco Palha, A.; Lourenço, M.F.
Substance abuse and behavioral addictions

European Addiction Research

Selected contributions

- Effectiveness of Therapeutic Communities: A Systematic Review: Malivert, M.; Fatséas, M.; Denis, C.; Langlois, E.; Auriacombe, M. (Bordeaux)
- Simultaneous versus Delayed Treatment of Tobacco Dependence in Alcohol-Dependent Outpatients: Nieva, G.; Ortega, L.L.; Mondon, S.; Ballbé, M.; Gual, A. (Barcelona)
- Effects of Pregabalin on Subjective Sleep Disturbance Symptoms during Withdrawal from Long-Term Benzodiazepine Use: Rubio, G. (Madrid); Bobes, J. (Oviedo); Cervera, G. (Valencia); Torán, A. (Palencia); Pérez, M.; López-Gómez, V.; Rejas, J. (Madrid)
- Photoelectric Stimulation of Defined Ear Points (Smokex-Pro Method) as an Aid for Smoking Cessation: A Prospective Observational 2-Year Study with 156 Smokers in a Primary Care Setting: Breivogel, B. (Mannheim); Vuthaj, B. (Alzey); Krumm, B.; Hümel, J. (Mannheim); Cornell, D. (Hagerstown, Md.); Diethl, A. (Mannheim/Braunschweig)
- Cannabis Use Patterns and Their Association with DSM-IV Cannabis Dependence and Gender: Noack, R.; Höfler, M.; Lueken, U. (Dresden)

Commentaries

www.karger.com/hde

Traditionally, science and religion have often been viewed in competition, with the belief that rational, scientific thought wins out in the end. The authors of this volume provide compelling arguments that suggest that this replacement model does not hold up. Rather, recent psychological research suggests that forms of reasoning, even forms believed to be in conflict, such as supernatural and scientific thought, often coexist in the minds of both children and adults. The focus of this issue is on exploring how and when individuals endorse beliefs that might be construed as stemming from a number of highly different and potentially conflicting worldviews and it provides important new ways of characterizing cognitive development.

The issue should be read by researchers interested in development and education. It is valuable reading for anthropologists and philosophers interested in the role of culture in cognition and the development of knowledge more generally. Educators may find this issue relevant for considering obstacles/barriers to teaching particular scientific concepts.
