Oropharyngeal dysphagia is a major complaint among many patients suffering from neurological diseases as well as in the elderly. Its severity ranges from moderate difficulty to complete inability to swallow, and it may give rise to clinically relevant complications such as aspiration pneumonia, malnutrition and/or dehydration, impaired quality of life, and death. However, despite its high prevalence and even though it would be very cost-effective to avoid complications by adequate treatment, dysphagia is still severely underdiagnosed.

The contributions in this book present and discuss state-of-the-art diagnostic methods, treatment, and care of dysphagia patients, putting special emphasis on a multidisciplinary approach. A variety of clinical specialists will find this publication a most valuable addition to their library, including nurses, speech-language pathologists, dieticians, nutritionists, gastroenterologists and related specialties.

See the journal website for contents
Aims and Scope
The journal focuses on human nutrition and metabolism and related areas, including experimental studies and basic science that can inform human nutrition science. We welcome manuscripts describing observational and intervention studies as well as basic science reports on the topics of foods, diets and dietary supplements, nutrigenomics and genetics related to metabolism, on energy metabolism, macro- and micronutrients including vitamins and minerals, biofunctional compounds, dietetics, obesity, clinical nutrition, social science and economic aspects related to nutrition and metabolism. Laboratory-based science may include descriptions of relevant experimental models. In addition to Original Papers, the journal will publish Review Articles on topical subjects, Systematic Reviews, short Commentaries and Viewpoint articles that may address current controversies, short Meeting Reports, Letters to the Editor, and Announcements/Society News. The journal will also publish Supplements with proceedings from internationally relevant conferences on nutrition and metabolism.

Submission
Manuscripts written in English are considered and should be submitted online at www.karger.com/anm

Authors may suggest up to four Referees who have expert knowledge on the subject. Suggested Referees should not be from the same institution, not have published with the authors during the last 5 years, and should not be prejudiced.

Should you experience problems with your submission, please contact:

Prof. Dr. B. Koletzko
Div. Metabolic and Nutritional Medicine
Dr. von Hauner Children's Hospital
Ludwig-Maximilians-University of Munich
Lindwurmstrasse 4
D–80337 Munich (Germany)
Tel. +49 89 5160 2826
E-Mail ANM@med.uni-muenchen.de

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the journal. Submission of an article for publication but not yet accepted should be noted as ‘unpublished data’ and not be included in the reference list. In these announcements/Society News, the journal will also publish Supplements with proceedings from internationally relevant conferences on nutrition and metabolism.

Types of Articles
The journal consists of the following sections:

Original Papers are full-length research papers which will be considered for the journal. Articles cover topics relevant to clinical studies. Basic and experimental work appear only if directly related to clinical issues (max. 2,500 words).

Review Articles/Systematic Reviews are comprehensive, state-of-the-art papers of important clinical problems. Reviews may be invited by the Editor or they may be unsolicited views (max. 5,000 words).

Commentaries and Viewpoint of an editorial nature may be submitted to the journal. In these communications, usual manuscript subdivisions do not apply, and a summary statement is not needed; however, a very brief reference list may be included (max. 500 words).

Meeting Reports are brief summaries of scientific meetings in the field of nutrition and metabolism. Authors should write a letter to the Editors inquiring about potential interest before submitting the paper (max. 1,500 words).

Letters to the Editor are encouraged if they directly concern articles previously published in this journal or clinical subjects related to the matters discussed. The editor reserves the right to submit copies of such letters to the authors of the articles concerned prior to publication in order to permit them to respond in the same issue of the journal (max. 500 words).

Editorials are usually invited by the Editor (max. 1,000 words). Please send suggestions to the Editor.

Authors are referred to the uniform requirements for manuscripts submitted to biomedical journals (http://www.icmje.org/ethical_author.html) for further guidance.

Conflicts of Interest
Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Ethics
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Plagiarism Policy
Plagiarism is misrepresenting somebody else's published intellectual work-product as your own (Note, this definition excludes 'self-plagiarism'). In short, it is a misuse of source material. Whether intentional or unintentional, plagiarism is a serious violation of the Israel Journal of Nutrition and Metabolism policy. Periodically, manuscripts are screened for plagiarism and if your manuscript is found to be consistent with what the Editors define as plagiarism prior to review of the manuscript then:

1) it will be rejected without review and the author(s) notified as such with a chance for rebuttal.

If a manuscript is found to contain evidence of plagiarism after acceptance and/or publication then:

1) the author(s) will be notified, as in the previous situation, and offered a chance for rebuttal.

If the rebuttal arguments are not found to be satisfactory, as judged by the Editors, the manuscript will be rejected and the author sanctioned from publishing additional papers in the journal for a period to be determined by the Editorial Board. The period of sanction imposed is dependent on the magnitude of plagiarism with a minimum sanction of one year.

If a manuscript already published in the journal is found to exhibit evidence of plagiarism as defined by the Editors, then we will request a retraction.

Definition of plagiarism – a 25% similarity in the Results or Discussion that exactly reproduces another paper.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential.

Abstract: Each paper needs an abstract of up to 200 words. Articles should be structured as follows:

Background/Aims: What is the major problem that prompted the study?

Methods: How was the study performed?

Results: Most important findings?

Conclusion: Most important conclusion?

Footnotes: Avoid footnotes.

Tables and illustrations: Tables are part of the text. Place them at the end of the text file. Illustration data must be stored as separate files. Do not integrate figures into the text. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.– per page.

References: In the text, identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as ‘unpublished data’ and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Guidelines for Authors
Guidelines for Authors

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™
Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3000.–, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database with in 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/FAQ.htm#a1

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Page Charges
There are no page charges for papers of 3 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.–. The allotted size of a paper is equal to approx. 10 manuscript pages (including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the first-named author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Not just for specialists...

For over 40 years the Karger Gazette has been distributed to a growing audience worldwide. Published once a year in newspaper format, it highlights advances in biomedicine and clinical practice, introduces personalities, portrays research institutes and chronicles milestones in the history of Karger Publishers in a lively and readable style. With invited contributions by experts from all over the world, each issue is devoted to a special topic of current interest.

The Aging Issue presents articles on
• the causes of the aging process
• why aging stops in later adult life
• the quiet epidemic of Alzheimer's Disease
• internet use by seniors
• and more.
