Adipocyte, ghrelin gene-derived peptides in modulation 150, 151
Adrenocorticotropic hormone (ACTH), ghrelin effects on secretion 59–62
Aging
  ghrelin and growth hormone effects 55
  ghrelin receptor modulation studies 55, 56
Agouti-related peptide (AgRP), ghrelin effects on secretion 94
Anorexia nervosa
  ghrelin-based therapy 95
  ghrelin gene polymorphisms 29, 30
Apoptosis, ghrelin effects on tumor cells 130, 131
Arginine vasopressin (AVP), ghrelin effects on secretion 61
AZP-531, preclinical studies 163, 164
Beta-cell, see also Diabetes; Insulin
  ghrelin gene-derived peptides in modulation 147–149
  ghrelin signaling mechanisms 137–141
BIM28163
  preclinical studies 160
  therapeutic applications 56
  unacylated ghrelin studies 116–118
Brain, GHS-R1a function
  agonists in neuroprotection 10
  dopamine receptor heterodimerization 9, 10
  expression 8
Bulimia nervosa, ghrelin system gene polymorphisms 29
Cachexia
  ghrelin-based therapy 95, 96
  GHS-R1a agonist studies 11
Cancer
  cachexia, see Cachexia
  ghrelin/receptor expression in tumors overview 124
  neuroendocrine tumors
    gastro-entero-pancreatic
    neuroendocrine neoplasms 123–125
    lung 125
    pituitary adenoma 125, 126
    thyroid, adrenal, and testicular tumors 126
  nonendocrine tumors 126, 127
  tumor cell biology effects
    apoptosis 130, 131
    migration and invasion 131
    overview 129, 130
    proliferation 130
  obestatin
    expression in tumors 127–129
    tumor cell biology effects 131
Cardiomyocyte, ghrelin effects 86, 87
Congestive heart failure (CHF), ghrelin studies 83, 87, 88
Des-acyl ghrelin, see Unacylated ghrelin
Diabetes, see also Insulin
  ghrelin
    gene polymorphisms 31
    therapeutic targeting 136, 137
  ghrelin O-acyltransferase studies 21, 22
  GHSR polymorphisms 31, 32
Discovery, see History of ghrelin studies
Dopamine receptor, GHS-R1a
  heterodimerization 9, 10
Dyslipidemia, ghrelin system gene polymorphisms 32
Endothelial progenitor cell (EPC), unacylated ghrelin protection 164

Follicle-stimulating hormone (FSH), ghrelin effects on secretion 64, 65, 72, 73

Gastric acid, ghrelin in secretion 43

Ghrelin
assays 123
blocking agents 161, 162
cardioprotection, see specific conditions
food intake and energy metabolism regulation 93–95
gastrointestinal distribution 42
gene, see GHRL
history of study, see History of ghrelin studies
meal response 45, 46
neuroprotection 10
receptor, see Growth hormone secretagogue receptor
synthesis and activation 92, 93
tumor expression, see Cancer
unacylated hormone, see Unacylated ghrelin

Ghrelin O-acyltransferase (GOAT)
functional overview 7, 25, 92, 93
gene polymorphisms in eating disorders 30
history of study 3, 17–20
inhibitor therapy 162, 163
knockout mouse phenotype 21, 22
tissue distribution and expression
gastrointestinal distribution 42
overview 20, 21
reproductive tissue expression 76

GHRL, polymorphisms
anorexia nervosa 29
bulimia nervosa 29
diabetes 31
dyslipidemia 32
stature 32, 34, 35
obesity and metabolic syndrome 26–28, 33

GHS-R, see Growth hormone secretagogue receptor

Glucose metabolism, see also Diabetes; Insulin; Metabolic syndrome
ghrelin systemic effects 136
GHS-R1a in glucose homeostasis 8

Gonadotropic axis, see also Puberty
ghrelin effects
direct effects on gonads 76, 77
gonadotropin secretion in adults 64, 65, 72, 73
polycystic ovarian syndrome 77, 78
prospects for study 78, 79
metabolic control along lifespan
ghrelin function 70, 71
overview 69, 70

GPR38
function 42
history of study 2

Growth hormone (GH), ghrelin in secretion
aging effects 55
circulating ghrelin studies 53, 54
history of study 49–51
mechanisms 51–53
obestatin interactions with ghrelin 54, 55
stature studies of ghrelin system
GHRL polymorphism studies 32, 34, 35
GHSR polymorphism studies 34–37

Growth hormone secretagogue receptor (GHS-R)
assays 123
gastrointestinal distribution 43

GHSR gene polymorphisms
bulimia nervosa 29
diabetes 31, 32
dyslipidemia 32
obesity 28, 29, 33
stature 34–37

GHS-R1a
agonist studies
cardiovascular effects 10, 11
gastrointestinal motility disorders 46, 47
malnutrition and cachexia 11
thymus function 12
antagonists 159–161
brain function
agonists in neuroprotection 10
dopamine receptor
heterodimerization 9, 10
expression 8

GHS-R1b functions 7, 8

glucose homeostasis and obesity studies 8
inverse agonists 161
knockout mouse phenotype 5
reproductive tissue expression 75, 76

GHS-R1b functions 7, 8

history of study 1, 2, 6–8, 16, 17, 41, 42
motilin cross-reactivity 43
signal transduction 52, 53

tumor expression, see Cancer

GSK1614343, preclinical studies 160

Heart failure, see Congestive heart failure

Height, see Stature

Helicobacter pylori, impact on ghrelin levels 46

History of ghrelin studies
discovery 1–3, 91, 92
ghrelin O-acyltransferase 3, 17–20
growth hormone secretagogue receptor 1, 2
6–8, 16, 17, 41, 42
growth hormone secretion 49–51

Inflammation, ghrelin anti-inflammatory effects 84
Inflammatory bowel disease, ghrelin studies 44
Insulin, ghrelin effects
beta-cell signaling mechanisms 137–141
insulinostatic function 137
secretion 136
systemic effects 136
Ischemia/reperfusion injury, ghrelin protection 86

JMV2810, therapeutic applications 56

JMV2959, preclinical studies 160

Lung, ghrelin/receptor expression in neuroendocrine tumors 125
Luteinizing hormone (LH), ghrelin effects on secretion 64, 65, 72, 73

Metabolic syndrome, GHRL polymorphisms 26–28
Migrating motor complex (MMC)
ghrelin studies 45
motilin studies 44, 45
MK-0677, therapeutic applications 56

Motilin
ghrelin receptor cross-reactivity 43
history of study 41, 42
migrating motor complex studies 44, 45
receptor 42

Motivation, see Reward system

Myocardial stunning, ghrelin protection 86

Neuropeptide Y (NPY)
ghrelin effects on secretion 61, 94

reward system 106
NOXX-B-11-3, preclinical studies 161
Nucleus accumbens (NAcc), reward system 103, 106

Obesity
gghrelin O-acyltransferase studies 21, 22
gghrelin therapeutic targeting 158
GHRL polymorphisms 26–28, 33
GHS-R1a studies 8

GHSR polymorphisms 28, 29, 33
reward system and feeding 101–103

Obestatin
adipocyte modulation 150, 151
assays 123
beta-cell modulation 149
expression in tumors 127–129
tumor cell biology effects 131
gghrelin interactions in growth hormone secretion 54, 55
neuroendocrine effects 65

Pancreas, see also Beta-cell; Insulin
gghrelin/receptor expression in gastroentero-pancreatic neuroendocrine neoplasms 123–125
gghrelin system in development 145–147

Pituitary adenoma, ghrelin/receptor expression 125, 126
Polycystic ovarian syndrome (PCOS), ghrelin studies 77, 78

Prolactin (PRL), ghrelin effects on secretion 62, 63

Puberty, ghrelin control
direct effects on gonads 76, 77
experimental evidence 71, 72
expression studies 75, 76
modes and sites of action 73–75
prospects for study 78, 79

Reward system
amplification by ghrelin 108, 109
feeling
gghrelin modulation 103–107
obesity correlation 101–103
neurocircuitry of ghrelin action 103
sexual reproduction and ghrelin 107, 108

Stature
GHRL polymorphism studies 32, 34, 35
GHSR polymorphism studies 34–37

Stomach
  ghrelin distribution 42
  ghrelin function
    gastric acid secretion 43
    gastroprotection 43, 44
    motility 44, 45
  ghrelin/receptor expression in gastro-entero-pancreatic neuroendocrine neoplasms 123–125

Thyroid-stimulating hormone (TSH), ghrelin effects on secretion 63

Tumors, see Cancer

TZP-101, see Ulimorelin

Ulimorelin (TZP-101)
  clinical trials 158
  gastrointestinal motility disorder studies 46, 47
  therapeutic applications 56

Unacylated ghrelin (UAG)
  adipocyte modulation 150, 151
  beta-cell modulation 147, 148
  ghrelin antagonism
    cell studies 113, 114
    energy balance studies in animals 114, 115
    human studies 115, 116
    ghrelin receptor-independent effects 116–119
    neuroendocrine effects 65
    puberty studies 74
    receptor 12
    therapeutic prospects 119, 163–165

Uncoupling protein (UCP), ghrelin effects 149, 150

Vascular tonus, ghrelin regulation 84, 85

Vasodilatation, ghrelin induction 10, 11, 84

Ventral tegmental area, reward system 103, 106, 107

YIL-781, preclinical studies 159, 160

YIL-870, preclinical studies 159, 160
