Subject Index

Actinic keratoses, intense pulsed light treatment 117, 118
Alexandrite laser indications
  basal cell carcinoma 82
  Kaposi's sarcoma 81
  keratosis pilaris 81, 82
  leg telangiectasia 80, 81
  port-wine stain 80
  overview 78
  safety 80
Anesthesia, laser therapy 35, 36
Angiofibroma, pulsed dye laser for tuberous sclerosis facial angiofibroma treatment 62
Angiokeratoma, intense pulsed light treatment 113
Argon laser
  equipment 21
  histology 22
  large lesion treatment 22
  nonvascular lesion treatment 33
  overview 20
  port-wine stain treatment 28, 29
  postprocedure care 36, 37
  settings 21
  side effects 22–24
  spider vein treatment 31
Arteriovenous malformation (AVM), clinical features 50
Atopic dermatitis, intense pulsed light treatment 113
AVM, see Arteriovenous malformation
Basal cell carcinoma
  alexandrite laser treatment 82
  intense pulsed light treatment 117, 118
Blistering, see Vesiculation
Bowen disease, intense pulsed light treatment 117, 118
Bruising, see Purpura
Cherry angioma
  clinical features 56
  diode laser treatment 88
  intense pulsed light treatment 108
  KTP laser treatment 70
  laser selection 31, 56
  Nd:YAG laser treatment 101
Classification, vascular lesions 43–45
Copper vapor laser
  equipment 24
  histology 25
  infantile hemangioma treatment 32
  nonvascular lesion treatment 33
  overview 24
  port-wine stain treatment 29
  postprocedure care 37
  settings 24, 25
  side effects 25, 26
Corticosteroids, hyperpigmentation treatment 124, 125
Crusting, complication prevention and management 137
Diode laser
  indications
    810-nm laser
      leg telangiectasia 84
      varicose veins 83, 84
      venous malformation 85, 86
    940-nm laser
      cherry angioma 88
      epistaxis 87
      facial telangiectasia 87
Subject Index

Eccymosis, pulsed dye laser treatment 57, 58
Edema, complication prevention and management 136, 137
Electromagnetic spectrum 3
Energy, laser 9
Erythema, diode laser treatment 87
Extravenous laser ablation, see Diode laser
Eye injury
  etiology 137, 138
  prevention 138
  safety 12, 13, 35

Fire hazards
  etiology 138
  prevention 138
  safety 13, 14
Fluence, laser 9

Granuloma, see Pyogenic granuloma

Hemangioma
  clinical features 51–54
  intense pulsed light treatment for infant hemangioma 108, 109
  laser selection for infant hemangioma 32
  Nd:YAG laser treatment 97, 98
  pulsed dye laser treatment 54
Hemoglobin, absorption curve 41, 95
Herpes simplex virus (HSV), prophylaxis 36, 135, 136
Hexascan, port-wine stain treatment 29, 30
HSV, see Herpes simplex virus
Hydroquinone
  hyperpigmentation treatment 124, 125
topical conditioning 35
Hyperpigmentation, see Postinflammatory hyperpigmentation
Hypopigmentation
  etiology 125, 126
  overview 125, 126
  pathophysiology 126, 127
  prevention 127
treatment 127, 128
Incompetent perforator veins (IPVs),
  extravenous laser ablation 90
Infantile hemangioma, see Hemangioma
Infection complications
  etiology 134, 135
  prevention 135, 136
treatment 136
Intense pulsed light (IPL)
  complications 118, 119
  hyperpigmentation treatment 125
  indications
    actinic keratoses 117, 118
    angiokeratoma 113
    atopic dermatitis 117
    basal cell carcinoma 117, 118
    Bowen disease 117, 118
    cherry angioma 109
    infant hemangioma 108, 109
    keratosis pilaris atrophicans 116
    leg veins 112, 113
    poikiloderma of Civatte 114, 115
    port-wine stain 109–111
    pyogenic granuloma 109
    scar improvement 115
    striae distensae 115, 116
telangiectasia 111, 112
venous malformation 114
warts 117
  overview 107, 108
  preprocedure considerations 118, 119
technique 118, 119
IPL, see Intense pulsed light
IPVs, see Incompetent perforator veins
Irradiance, laser 9
Kaposi's sarcoma, alexandrite laser treatment 81
Keratosis pilaris atrophicans (KPA)
  alexandrite laser treatment 81, 82
  intense pulsed light treatment 116
Keratosis rubra pilaris, KTP laser treatment 72, 73
KPA, see Keratosis pilaris atrophicans
Krypton laser
  cherry angioma treatment 31
equipment 26, 27
histology 27
KTP laser
  complications
    scarring 74
    pigment alteration 74
  indications
    acne 71, 72
    cherry angioma 70
    facial telangiectasia 68, 69
    granulation tissue 70
    keratosis rubra pilaris 72, 73
    leg telangiectasia 69
    poikiloderma of Civatte 71
    port-wine stain 67, 68
    scar improvement 70
    skin rejuvenation 71
    verruca 72
  overview 66, 67
  patient expectations 74
  postprocedure care 73, 74

Laser, see also specific lasers
  delivery modes 10, 11
  designs 8
  energy 9
  fluence 9
  historical perspective 1, 2
  irradiance 9
  physics
    chromophores 5, 6
    light properties 3, 4
    stimulated emissions 4, 5
  pulse width 9
  safety
    complications, see specific complications
    dental enamel 13
    eye 12, 13, 35
    fire and electrical hazards 13, 14
    plume and splatter hazards 14–16, 35
    selective thermolysis 11, 12
    spot size 9
  tissue interactions
    overview 6, 7
    photochemical effects 7, 8, 19, 20
  photomechanical effects 7
  photothermal effects 7, 40, 41
  wavelength effects 41

Leg veins, see also Varicose veins
  intense pulsed light treatment 112, 113
  Nd:YAG laser treatment 59, 98, 99

Lymphatic malformation, clinical features 51

Maser, historical perspective 1, 2

Methoxsalen, hypopigmentation
  treatment 128

8-Methoxypsoralen, hypopigmentation
  treatment 128

Nail Psoriasis Severity Index (NAPSI) 62

NAPSI, see Nail Psoriasis Severity Index

Nd:YAG laser
  combined wavelengths 43
  complications 103, 104
  indications
    cherry angioma 101
    hemangioma 97, 98
    leg veins 59, 98, 99
    onychomycosis 102
    port-wine stains 96, 97
    pyogenic granuloma 101
    scar improvement 102, 103
    skin rejuvenation 102
    telangiectasia 99–101
    venous lake 102
    verruca 102
  overview 94–96
  pretreatment considerations 103

Nevus simplex
  clinical features 57
  laser selection 57
  pulsed dye laser treatment 57

Onychomycosis, Nd:YAG laser treatment 102

PDL, see Pulsed dye laser

Perforator veins, see Incompetent perforator veins

Photorejuvenation, see Skin rejuvenation

Pigmentation defects, see Hypopigmentation;
  Postinflammatory hyperpigmentation

PIH, see Postinflammatory hyperpigmentation

Poikiloderma of Civatte
  intense pulsed light treatment 114, 115
  KTP laser treatment 72
Port-wine stain (PWS)
  alexandrite laser treatment 80
  clinical features 44–50
  intense pulsed light treatment 109–111
  KTP laser treatment 67, 68
  laser selection 28–30
  Nd:YAG laser treatment 96, 97
  pulsed dye laser treatment 46, 48, 49
  test patch in treatment 34
Postinflammatory hyperpigmentation (PIH)
etiology 122
  overview 122
  pathophysiology 122, 123
  prevention 123, 124
  treatment 124, 125
Psoralen, hypopigmentation treatment 128
Psoriasis, pulsed dye laser treatment 61, 62
Pulsed dye laser (PDL)
  combined wavelengths 43
  complications 63
  eccymosis treatment 57, 58
  facial ectasia treatment 55, 56
  hemangioma treatment 54
  hyperpigmentation treatment 124
  nevus simplex treatment 57
  overview 42, 43
  port-wine stain treatment 46, 48, 49
  postprocedure care 62, 63
  prospects 63
  psoriasis treatment 61, 62
  scar improvement 59
  striae distensae treatment 59
  tuberous sclerosis facial angiofibroma treatment 62
  verrucae treatment 61
Pulse width, laser 9, 42
Purpura
  etiology 129
  overview 128, 129
  pathophysiology 129, 130
  prevention 130, 131
  treatment 131
PWS, see Port-wine stain
Pyogenic granuloma
  intense pulsed light treatment 109
  laser selection 32, 33
  Nd:YAG laser treatment 101
Rejuvenation, see Skin rejuvenation
Rosacea
  clinical features 54, 55
  laser selection 55, 56
Scarring
  argon laser 22–24
  intense pulsed light treatment for improvement 115
  KTP laser treatment
    complications 74
    improvement 70
  Nd:YAG laser for improvement 102, 103
  overview 132, 133
  pathophysiology 133
  prevention 133, 134
  pulsed dye laser in treatment 59
  treatment 134
Sclerotherapy, leg veins 59
Skin rejuvenation
  KTP laser 71, 72
  Nd:YAG laser treatment 102
Spider angioma
  clinical features 56
  laser selection 56
Spider veins, laser selection 31
Spot size, laser 9, 21
Striae distensae
  intense pulsed light treatment 115, 116
  pulsed dye laser treatment 59
Sturge-Weber syndrome, port-wine stain association 46
Sunscreen, topical conditioning 35
Telangiectasia
  alexandrite laser treatment for leg telangiectasia 80, 81
  clinical features 54, 55
  diode laser treatment
    facial telangiectasia 87
    leg telangiectasia 84, 86, 87
  intense pulsed light treatment 111, 112
  KTP laser treatment
    facial telangiectasia 68, 69
    leg telangiectasia 69
  laser selection 30, 31
  Nd:YAG laser treatment 99–101
  pulsed dye laser treatment 55, 56, 58, 59
TEM, see Transverse electromagnetic mode
Test patch 34
Transverse electromagnetic mode (TEM) 10, 11
Tretinoin, hyperpigmentation treatment 124
Tuberous sclerosis, facial angiofibroma
treatment with pulsed dye laser 62

Varicose veins, see also Leg veins
diode laser treatment 83, 84
extravenous laser ablation
extravenous laser ablation 89, 90

Venous lake
clinical features 56
laser selection 56
Nd:YAG laser treatment 102

Venous malformation
clinical features 50, 51

diode laser treatment 85, 86
intense pulsed light treatment 114

Verruca
KTP laser treatment 72
Nd:YAG laser treatment 102
pulsed dye laser treatment 61

Vesiculation
overview 131, 132
prevention 132
treatment 132

Warts, intense pulsed light treatment 117
