**Guidelines for Authors**

Acta Cytologica is a bimonthly published journal that aims to cover all aspects within the area of both clinical cytology and cytopathology. It further the understanding of cytologic diagnostic processes and facilitates the transmission of current research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 cytology societies around the world, Acta Cytologica evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlation. The journal features Original Papers (Fine Needle Aspiration, Gynecologic Cytopathology, Nongynecologic Cytopathology, Techniques, Molecular Techniques), Novel Insights from Clinical Practice (formerly Case Reports), Letters to the Editor and Reviews. Criteria for acceptance are quality, originality, and clarity. Acta Cytologica will not consider papers that are either preliminary or purely descriptive. Reports on clinical cases are accepted only if they provide novel insight into unresolved problems of cytology and cytopathology. All articles are subject to editorial review.

**Submission**

Only original papers written in English are considered. Manuscripts should be submitted online using the online submission website at [www.karger.com/acy](http://www.karger.com/acy) (the preferred word-processing package is MSWord®). Before submitting your manuscript, you are encouraged to read the detailed guidelines at [www.karger.com/acy](http://www.karger.com/acy)_guidelines for specific directions as how to get a manuscript ready for submission. If you should have any problems with your submission, please contact the editorial office:

Kari J. Syrained  
S. Karger AG  
Editorial Office ‘Acta Cytologica’

CH-4009 Basel (Switzerland)  
Tel. +41 61 306 1357  
Fax. +41 61 306 1434  
E-Mail acy@karger.com

**Conditions**

All manuscripts must be accompanied by a covering letter signed on behalf of all authors verifying that all the authors were active participants. Assurance should be given that the manuscript is original and not under simultaneous consideration for publication in another journal. Please provide complete financial disclosure information. Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see N Engl J Med 1997;336:309–315). All articles will undergo an in-depth peer-review process. Submission of an article for publication conveys the understanding that the corresponding author is responsible for all previously published tables or figures and that the study protocol has been approved by the local institutional review board. Clearly state the method of any randomization, blinding and selection of specific statistical tests. Explain dropouts/exclusions and confounding variables.

**Sections**

Original Paper (Fine Needle Aspiration, Gynecologic Cytopathology, Nongynecologic Cytopathology, Techniques, Molecular Techniques): Submitted manuscripts should be fully documented reports of original research. They must describe significant and original observations.

Review: Potential authors are asked to contact the Editor-in-Chief before submitting a paper in order to avoid clashes with other pending reviews.

Letter to the Editor: Letters to the Editor concerning articles published in Acta Cytologica may be submitted for publication. They should not be more than one printed page in length. If accepted, the authors of the articles concerned will be given the opportunity to reply.

Novel Insights from Clinical Practice (formerly Case Reports): the publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on 'established facts' (what is already known) and 'novel insights' (what new information has been added) should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation.

**Arrangement**

General: Manuscripts should be written in English and be as concise as possible. The length of the text should be limited to approximately 3,000 words, pages numbered consecutively, starting with the title page, and continuing in the following order: abstract and key words, body of text, references, figure legends and tables. Use generic names of drugs when possible. For any trade name cited, capitalize the first letter, and include the manufacturer, name and location (city, state/province, country). Express weights and measures in metric values. Acknowledge any presentation at a national or international medical society and any substantive financial support.

Title page: The first page of each paper should indicate the title, the authors’ names, the institute(s) where the work was conducted, and a short title for use as running head. Limit the number of authors to 6. If more than 6 authors contributed significantly to the article, the editorial office will consider including their names upon request.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as an e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential.

Abstract: Each paper needs an abstract limited to 200 words structured as follows: Objective, Study design, Results and Conclusions. For Novel Insights from Clinical Practice the headings should be: Background, Case and Conclusion. Address the study’s power to detect a difference if the research identified important variables that may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the authors’ responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. Signed permission forms from the copyright holders and original authors for all previously published tables or figures must be provided.

**Color Illustrations**

For all manuscripts accepted, authors will be charged CHF 500.00 for each color page published in the print version of the journal. Several color illustration may be placed onto one color page. When the illustration appears in black and white, the version will not be charged a fee. In the online version all figures submitted in color will appear in color at no charge to the author. Referring to colors in the text and figure legends should be avoided. We recommend using symbols, instead of color, for charts and graphs.

**Ethis**

Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute’s committee on human research and thus meets the standards of the Declaration of Helsinki in its revised version of 1975 and its amendments of 1983, 1989, and 1996 [JAMA 1997;277:925–926]. Information suitable to
Guidelines for Authors

reveal the subject’s identity is to be avoided. Further, au-
tors should also state that animal experiments conform
to institutional standards. Copies of these guidelines and
policy statements must be available for review by the edi-
tors if necessary.

Conflict of Interest
All forms of funding and support, including that from
companies, as well as any potential competing financial
interests should be acknowledged in the cover letter to
the editors when applicable. The statement has to be listed
at the end of the article.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers
for articles. A DOI number will be printed on the title
page of each article. DOIs can be useful in the future for
identifying and citing articles published online without
volume or issue information. More information can be
found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data
that are not necessary for the scientific integrity and con-
cussions of the paper. Please note that all supplementary
files will undergo editorial review and should be submit-
ted together with the original manuscript. The Editors
reserve the right to limit the scope and length of the sup-
plementary material. Supplementary material must meet
production quality standards for Web publication with-
out the need for any modification or editing. In general,
supplementary files should not exceed 10 MB in size. All
figures and tables should have titles and legends and all
files should be supplied separately and named clearly. Ac-
ceptable files and formats are: Word or PDF files, Excel
spreadsheets (only if the data cannot be converted prop-
erly to a PDF file), and video files (.mov, .avi,.mpeg).

Author’s Choice™
Karger's Author's Choice™ service broadens the reach
of your article and gives all users worldwide free and full
access for reading, downloading and printing at www.
karger.com. The option is available for a one-time fee of
CHF 3000.–, which is a permissible cost in a grant allo-
cation. More information can be found at www.karger.
com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates
under the NIH Public Access Policy that final, peer-re-
viewed manuscripts appear in its digital database within
12 months of the official publication date. As a service to
authors, Karger submits the final version of your article
on your behalf to PubMed Central. For those selecting
our premium Author's Choice™ service, we will send
your article immediately upon publishing, accelerating
the accessibility of your work without the usual embargo.
More details on NIH's Public Access Policy are available at

Self-Archiving
Karger permits authors to archive their pre-prints (i.e.
pre-refereeing) or post-prints (i.e. final draft post-refer-
eeing) on their personal or institution’s servers, provid-
ed the following conditions are met: Articles may not be
used for commercial purposes, must be linked to the pub-
lisher’s version, and must acknowledge the publisher's
copyright. Authors selecting Karger’s Author’s Choice™
feature, however, are also permitted to archive the final,
published version of their article, which includes copy-
editing and design improvements as well as citation links.

Copy Editing
All manuscripts accepted for publication by Karger are
subject to copy editing. Changes introduced by the copy
editor and/or questions will be marked in the manuscript
so please be sure to check the proofs against the manu-
script. The copy edited manuscript will be returned along
with the proofs.

Proofs
Unless indicated otherwise, proofs are sent to the cor-
responding author and should be returned with the least
possible delay. Alterations made in proofs, other than the
correction of printer's errors, are charged to the author.
No page proofs are supplied.

Reprints
An order form and a price list are sent with the proofs.
Orders submitted after the release of an article in print
are subject to considerably higher prices.

For over 40 years the Karger Gazette has been distributed
to a growing audience worldwide. Published once a year
in newspaper format, it highlights advances in biomedici-
ne and clinical practice, introduces personalities, por-
trays research institutes and chronicles milestones in the
history of Karger Publishers in a lively and readable style.
With invited contributions by experts from all over the
world, each issue is devoted to a special topic of current
interest.

In the latest issue, read free articles on the causes of the
aging process, why aging stops in later adult life, the quiet
epidemic of Alzheimer's Disease, internet use by seniors,
and more.

Conference Dinner - Aria at the Opera House Point, Saturday 19 October 2013

Tutorial - 22 - 25 October 2013

PROFERRED PAPERS to be submitted to:
national.office@cytology-asc.com
Gain expert perspective from today’s innovators:

Discoverer of numerous U.S. patents, recipient of several prominent research awards, Dr. James G. Fujimoto, principal investigator at MIT presents the Leopold Koss Lecture.

“CSI Meets Cytology” will be presented as the New Frontiers Lecture, by Dr. Bryan K. Knight of Queensland, Australia.

“CLIA ’88 and Cytopathology: How Was Our Practice Affected?” will be the title of our Current Issues in Cytology session this year. Dr. Diane Davey will moderate panelists: Dr. Marshall Austin, Dr. George Birdsong and Ms. Sue Zaleski.

In celebration of the 25th anniversary of CLIA ’88, investigative journalist, Walt Bogdanich, will present the Guest Lecture on his work at the Wall Street Journal on workload recommendations, immediately following Current Issues in Cytology.

“HPV Testing” is our Hot Topic session, moderated by Dr. George Birdsong.

Dr. Kristen Atkins moderates the State of the Art Symposium on “Guiding the Cells - The Cytologist’s Role in Procurement, Diagnosis, and Molecular Studies of Lung Carcinomas and Mesotheliomas.”

“Molecular Diagnostics in Cytology — Current Aspects and Future Considerations” will be the topic of Innovations and Trends in Medicine, with Dr. Jane Gibson moderating a panel of faculty.

Diagnostic Cytology Seminar co-moderated by Dr. Mary K. Schwartz and Ms. Donna K. Russell, with panelists Dr. Yener Erozan, Dr. Rodolfo Laucirica, Dr. Savitri Krishnamurthy, and Ms. Maria A. Friedlander.

Strategies in Cytopathology Education will contain the new ACGME accreditation requirements affecting cytopathology program directors, in one session, as two parts. Strategies in Cytotechnology Education discusses the hot topic of “Entry-Level Competencies,” along with “Gyn Self-Assessment.”

American Society of Cytopathology
100 West 10th Street, Suite 605 • Wilmington, DE 19801
Phone: (302) 543-6583 • Fax: (302) 543-6597 • Email: asc@cytopathology.org

Program Highlights:
- Thyroid Ultrasound FNA Sessions
- Challenges in Cytomorphology: Sessions I & II
- Hot Topic – HPV Testing
- ASC Foundation FUNdraisers: SK Walk/Run & Art Auction
- Career Planning and Growth Session

Scientific Sessions include…
- Platform and Poster Presentations
- State of the Society Address
- Papanicolaou Address
- Current Issues in Cytology
- Guest Lecture
- State of the Art Symposium
- Innovation & Trends in Medicine
- Leopold Koss Lectureship
- Diagnostic Cytology Seminar

Plus more events…
- Gathering for 1st Time Attendees
- ASC President’s Welcome Reception
- Video Microscopy Tutorials
- Workshops
- Panel Luncheon Seminars
- Roundtable Discussions
- Presidents’ Rounds
- Award Presentations
- Scientific and Technical Exhibits

Continuing Medical Education (CME): The American Society of Cytopathology is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. ASC Foundation Recognition Award: The American Society of Cytopathology designates this educational activity for a maximum of 59.25 AMA PRA Category 1 credits. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Continuing Medical Laboratory Education (CME): The ASC designates these activities for a maximum of 59.25 Continuing Medical Laboratory Education (CME) credit hours. The CME credit hours meet the continuing education requirements for the ASCP Board of Registry Certification Maintenance Program. This program is also approved for continuing education credits in the State of Florida and the State of California.

American Board of Pathology Maintenance of Certification (MOC): The 61st Annual Scientific Meeting will have up to 90 courses available to help fulfill the MOC requirements mandated by the American Board of Pathology Maintenance of Certification (MOC) program. Self-Assessment Modules (SAMs): The 61st Annual Scientific Meeting will offer 56 additional sessions (maximum of 31.75 credits) requiring completion of (SAM) to test knowledge. The two “Challenges in Diagnostic Cytomorphology” sessions, all Video Microscopy Tutorials, Workshops, Panel Luncheon Seminars and select Scientific Sessions qualify for SAMs.
22. Fortbildungstagung für Klinische Zytologie München

Hotel Hilton Park, München

Wissenschaftliche Leitung: Prof. Dr. Ulrich Schenck, FIAC
Institut für Pathologie, TU München
in Zusammenarbeit mit

• European Federation of Cytology Societies, EFCS
• Deutsche Gesellschaft für Zytologie, DGZ
• Bayerische Landesärztekammer

Endorsed by International Academy of Cytology, IAC

• Fortbildung für zytologisch tätige Ärztinnen und Ärzte, Assistentinnen und Assistenten
• Vorträge, Diskussionen und Rundtischgespräche zu aktuellen Themen des Fachgebiets
• Umfangreiche Industrieausstellung

Human papillomaviruses (HPV) are a heterogeneous and still growing virus family. Topical research results on the replication cycle and carcinogenic mechanisms allow a better understanding of current prevention strategies. Written by leading experts, this volume of Monographs in Virology provides up-to-date information on the prevention of papillomavirus-induced cancers by prophylactic antiviral vaccines and early detection of precancerous lesions.

A major section covers the tremendous clinical burden due to HPV infections: genital warts and laryngeal papillomas, the most notorious cervical cancer, but also further anogenital and tonsillar cancer, the incidence of which increased steeply during the last decades. Additionally, a section on prevention addresses the subject cytology – new concepts of biomarker development, detection of HPV DNA and RNA as well as their use in primary screening for early detection of precancerous lesions. Finally the book closes with a topical discussion of the most intriguing primary prevention of HPV infection by vaccination.

As new perspectives for the prevention of HPV-related neoplasia raised great public interest, this book will be of value to clinicians and practitioners in gynecology, dermatology, urology and ENT, to pathologists, laboratory physicians, medical students, and public health authorities.

Contents

Foreword: Pfister, H.

Virology and Pathogenesis: Pfister, H.

Epidemiology of Mucosotropic Papillomaviruses: Gissmann, L.

Clinical Aspects of Low-Risk HPV Infections

Condylomata Acuminata: Gross, G.

Recurrent Respiratory Papillomatosis: Wittekindt, C.; Wagner, S.; Klussmann, J.P.

Clinical Aspects of High-Risk HPV Infections

Cervical Cancer and Intraepithelial Neoplasia: Schneider, A.; Köhler, C.; Chiantera, V.; Vercellino, F.

Cancer and Intraepithelial Neoplasia of the Vulva and Vagina: Petry, K.U.

Penile Cancer and Penile Intraepithelial Neoplasia: Gross, G.F.

Anal Cancer and Intraepithelial Neoplasia: Wieland, U.; Kreuter, A.

Tonsillar Cancer: Klussmann, J.P.; Wagner, S.; Wittekindt, C.

Diagnosis for Early Detection

Cytology: Ikenberg, H.

Concepts of Biomarker Development: von Knebel Doeberitz, M.; Vinokurova, S.; Reuschenbach, M.

Detection of Human Papillomavirus DNA and RNA: Ikenberg, H.

Human Papillomavirus Testing in Primary Screening for Cervical Cancer: Petry, K.U.

Primary Prevention by Vaccination: Kaufmann, A.M.; Gissmann, L.

Author Index

Subject Index
The symptom of chronic constipation is often caused by a series of intestinal diseases, which can be reliably diagnosed histopathologically by histochemical techniques and consequently treated by surgical intervention. The following publication is the second and completely revised edition of Pathology of Chronic Constipation in Pediatric and Adult Coloproctology published in 2005, and introduces several new diseases and figures.

It includes characteristics of classical and ultrashort Hirschsprung’s disease as well as total intestinal aganglionosis and hypoganglionosis. New diseases such as intestinal neuronal dysplasia, desmosis coli, leiomyopathy, architectural malformation, and stretching lesions of muscularis propria are critically discussed. Atrophic desmosis is also covered. This new and frequently observed degeneration of muscularis propria in Crohn’s disease, sigmoid diverticulitis, and other inflammatory intestinal diseases causes focal aperistalsis, frequently interpreted as scar stenosis.

Histopathology of Chronic Constipation provides a comprehensive overview of intestinal alterations which cause chronic constipation. It is therefore of special interest to diagnostic pathologists, clinicians, pediatric and abdominal surgeons, coloproctologists, and gastroenterologists.

Contents

Foreword
Preface
Introduction
Histopathological Diagnosis
• Enzyme Histochemical Differential Diagnosis in Chronic Constipation
• Functional Histochemical Differential Diagnosis in Colonic Motility Disorder

Different Colon Diseases with Chronic Constipation
• Pathogenesis of Hirschsprung’s Disease
• ‘Swiss-Roll Technique’
• Intraoperative Evaluation of the Myenteric Plexus
• Ultrashort Hirschsprung’s Disease
• Total Aganglionosis of the Colon
• Hypoganglionosis of the Colon
• Immaturity of the Enteric Nervous System in Childhood
• Intestinal Neuronal Dysplasia Type A
• Intestinal Neuronal Dysplasia Type B
• Ganglioneuromatosis. Multiple Endocrine Neoplasia 2B (MEN 2B)
• Desmosis Coli
• Architectural Malformation of the Muscularis Propria
• Degenerative Leiomyopathy: A Rare Disease

A Laboratory Guide to Histopathological Diagnosis of Intestinal Motility Disorders
• The Most Important Technical Factors for Optimal Pathohistological Results
• Recommendations for Taking Mucosal Biopsies in Chronic Constipation
• Instructions for Transportation of Colorectal Biopsies or Surgical Specimens

Preparation of Cryostat Sections from Biopsies and Colorectal Specimens
• The Problem of Section Thickness
• Preparation ofIncubation Media for Daily Routine of Enzyme Histochemical Reactions

Immunohistochemical Techniques of Paraffin Sections in the Diagnosis of Gut Dysmotility

Orders may be placed with any bookshop, subscription agency, directly with the publisher or through a Karger distributor.
This monograph presents a detailed description of outstanding cytopathological lesions of the female genital tract. Twelve international experts in the cytopathology of glandular lesions cover the complete spectrum of this challenging subject.

Genital glandular lesions, both benign and malignant, are an appealing field of cytopathology. Malignant lesions of the endocervix and endometrium are becoming more common all over the world, compared to squamous cell carcinoma. In situ and invasive endocervical adenocarcinoma, endometrial adenocarcinoma and endometrial hyperplasias are presented in this book. Additionally ovarian lesions focusing data obtained from detailed intraoperative studies and other areas of the genital tract, such as the vulva and fallopian tube, which are less known and thus have seen fewer publications, are also shown.

The impact of the Bethesda System, as well as basic and ancillary techniques in the study of glandular lesions complete the monograph.

This book will be of great use to cytopathologists, pathologists and cytotechnologists and to students of these specialties as it deals with the most common areas of their daily work.
