An international, multilingual, and intercultural look at neurogenic language and communication disorders in adults

Aphasia

Editor
Philippe F. Paquier

Diagnosis and treatment of language and communication disorders in adult aphasic patients remain a challenge of huge importance for the speech/language pathologist. In this special issue, attention is particularly directed to cultural, linguistic, educational, and psychological aspects of rehabilitation in brain-injured, language-impaired patients. Reviewing the literature and discussing their own clinical observations and research data, the authors (members of the IALP Aphasia Committee) put this comprehensive account of intervention approaches to treating language impairments in adults into an international, multilingual, and intercultural perspective. The need of designing innovative intervention strategies that aim at reducing the language and communication impairments, and, hence, at improving people's quality of life is highlighted and will allow optimization of rehabilitation programs and service delivery.

Speech/language pathologists, neurolinguists, neuropsychologists, cognitive neuroscientists, as well as health care practitioners with specialized interest in neurogenic language disorders will find this publication indispensable reading.

Contents

Editorial
• Diagnostic and Therapeutic Intervention Approaches to Acquired Neurogenic Language and Communication Disorders in Adults: Paquier, P.F.

Original Papers
• Assessment and Treatment of Aphasia in Czech: Lehečková, H.
• Current Clinical Practices in Aphasia Therapy in Finland: Challenges in Moving towards National Best Practice: Klippi, A.; Sellman, J.; Heikkinen, P.; Laine, M.
• Quality of Life after Stroke: Evaluation of the Greek SAQOL-39g: Efstratiadou, E.A.; Chelas, E.N.; Ignatiou, M.; Christaki, V.; Papathanasiou, I.; Hilari, K.
• The Effects of Age and Education on Executive Functioning and Oral Naming Performance in Greek Cypriot Adults: The Neurocognitive Study for the Aging: Constantinidou, F.; Christodoulou, M.; Prokopiou, J.
• Communicative Clusters after a Right-Hemisphere Stroke: Are There Universal Clinical Profiles?: Ferré, P.; Fonseca, R.P.; Ska, B.; Joanette, Y.
Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be sent in separate files. Tables require a heading and figures a legend, also in a separate file. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 180 x 223 mm). Black and white halftone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.– per page.

References: In the text identify references by Arabic numerals [in square brackets], Material submitted for publication but not yet accepted should be noted as 'unpublished data' and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

(d) Edited books: Hone SW, Smith RJH: Understanding Int Arch Allergy Immunol DOI: 10.1159/000063858.

Supplementary Material

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpg).

Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org

Author’s Choice

S. Karger’s Author’s Choice service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3000.–, which is a permissible cost in grant allocation. More information can be found at www.karger.com/author's_choice.

NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/policy.htm

Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice feature, however, are also permitted to archive the final, published version of their article, which includes copy-editing and design improvements as well as citation links.

Page Charges

There are no page charges for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.–. The allotted size of a paper is equal to approx. 16 manuscript pages (double-spaced, A4, including tables, illustrations and references).

Proofs

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints

Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Guidelines for Authors

Submission

Only manuscripts in English will be accepted for publication. Please submit online at:

www.karger.com/fpl

Should you experience any problems with your submission, please contact the Editorial Office at:

fpl@karger.ch

Communications for IALP NEWS should be sent to:

Dr. T. Gallagher
at the address above.

‘Folia Phoniatrica et Logopaedica’ provides a survey of international research in physiology and pathology of speech and the voice organs. Original papers published report on recent findings in the assessment of vocal functions and in the detection, therapy, and rehabilitation of speech disorders. Contributors present results of experimental investigations important for instruction and further study.

Conditions

All manuscripts are subjected to editorial peer review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration in any other language by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of ‘Folia Phoniatrica et Logopaedica’ and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflicts of Interest

Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Arrangement

Title page: The first page of each paper should indicate the title (main title underlined), the authors’ names, and the institute where the work was conducted. A translation of the full title into English and a short title for use in cross-references should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpg).

Research into spoken language has become increasingly accessible to instrumental analysis and experimental verification. They are the underpinning of Phonetic Science for the investigation of speech in communicative settings across the world’s languages. Reflecting this communicative Phonetic Science, Phonetica is an international and interdisciplinary forum that covers all aspects of the subject matter, from the phonetic and phonological descriptions of sounds and prosodies to the measuring domains of speech physiology, articulation, acoustics, and perception. Phonetica thus provides a platform for a comprehensive representation of speaker-hearer interaction in languages and dialects. Papers published in this journal report expert original work dealing both with theoretical issues and with new empirical data.
