Technological Advances in the Treatment of Type 1 Diabetes
Technological Advances in the Treatment of Type 1 Diabetes

Volume Editors

Daniela Bruttomesso  Padua
Giorgio Grassi  Turin

43 figures, 30 in color, and 27 tables, 2015
Contents

VII Preface
Grassi, G. (Torino)

Glycemic Control

1 Glucose Control in Diabetes: Targets and Therapy
Bolli, G.B.; Porcellati, F.; Lucidi, P.; Fanelli, C.G. (Perugia)

11 Pregnancy and Diabetes
Lapolla, A.; Dalfrà, M.G. (Padua)

23 Management of Hyperglycemia in Hospitalized Patients: Critical Care Setting
Grassi, G. (Torino); Bonomo, M. (Milano)

31 Management of Hyperglycemia in Hospitalized Patients: Noncritical Care Setting
Pichardo-Lowden, A.R. (Hershey, Pa.)

Home Blood Glucose Monitoring

47 Self-Monitoring in Diabetes: When and How Much?
Pintaudi, B.; Nicolucci, A. (Santa Maria Imbaro)

63 Interfering Factors in Quality of Glucose Measurement
Hellman, R. (Kansas City, Mo.)

Continuous Glucose Monitoring

81 Continuous Glucose Monitoring: Professional and Real Time
Zisser, H.; Lane, J.E.; Shivers, J.P. (Santa Barbara, Calif.)

99 Real-Time Continuous Glucose Monitoring in Children and Adolescents
Battelino, T.; Dovč, K.; Bratina, N. (Ljubljana)

110 Real-Time Continuous Glucose Monitoring in Adult Outpatients
Bonomo, M. (Milano); Grassi, G. (Torino); Di Bartolo, P. (Ravenna); Maran, A. (Padova)

Preface

All technologies, including the most innovative, are always built on other existing technologies and adapted to new targets. The progress is relentless and unstoppable, like the evolution of living species. As in other fields, medical technology is presently experiencing a momentous time.

This review aims to provide an update of developments that promise to revolutionize the treatment of diabetes. It concerns hospital and outpatient care, intensive insulin therapy, blood glucose monitoring, and innovative steps towards the construction of a real artificial pancreas. ‘Better care of diabetes through technology’ could be the motto of this review.

We thank all of our colleagues who contributed to the book, but our thoughts are for the patients who, we hope, will benefit from the developments reported here.

Giorgio Grassi, MD, Turin
