Adenoidectomy, velopharyngeal insufficiency
risks 3
Anterior tonsillar pillar 3

Carotid artery, superiorly based pharyngeal
flap anatomy 51
Cine MRI, see Magnetic resonance
imaging

Double-opposing Z-plasty, see Furlow double-
opposing Z-plasty

Eustachian tube 1

Furlow double-opposing Z-plasty
anesthesia 69
complications 68
contraindications 69
historical perspective 67
indications 69
materials 69
outcomes 67, 68
patient evaluation 69
pearls 73
postoperative care 72
procedure 70–72
setup 70

Golding-Kushner scale, velopharyngeal
closure 21–23

Hamulus 3

Injection pharyngoplasty, revision surgery
73

Levator veli palatini 1

Magnetic resonance imaging, cine MRI of
velopharyngeal insufficiency
costs 32
limitations 29, 31, 32
overview 28
patient selection 28, 29
pearls 32
technique 29–31
Minimally clinically important difference,
responsiveness testing 34, 35, 38

Nasal endoscopy
advantages 12
costs 32
emerging technologies 24, 25
Golding-Kushner scale of velopharyngeal
closure 21–23
historical perspective 18
indications 19
limitations 24
pearls 25
reliability studies 23, 24
surgical candidates 23
technique 20, 21
tolerance in children 19, 20
Nasometry, velopharyngeal insufficiency
assessment 11

Obstructive sleep apnea
assessment after velopharyngeal
insufficiency surgery 86
sphincter pharyngoplasty
complication 59, 60
contraindication 60
superiorly based pharyngeal flap
contraindication 52
risks 51
surgical correction
  flap takedown 87, 88
  port size increase 87, 88
Obturator/speech aid prosthesis, see
  Prosthetics, velopharyngeal insufficiency

Palatal lift, see Prosthetics, velopharyngeal insufficiency
