Endobronchial Ultrasound-Guided Transbronchial Needle Aspiration (EBUS-TBNA):
A Practical Approach

Editors
Sara E. Monaco
Walid E. Khalbuss
Liron Pantanowitz

This high-yield reference book focuses on the clinical, technical, and pathological aspects of endobronchial ultrasound-guided transbronchial needle aspiration (EBUS-TBNA). Its reviews cover all aspects of EBUS-TBNA, including the clinical perspective, technical aspects of the procedure, and cytomorphology of common and uncommon entities, as well as highlights diagnostic challenges. Each chapter features a multitude of full-color high-resolution images and includes key references to the current literature in the field. Additionally, reference tables and informative figures highlight the salient points. The book is unique in that it is written by experienced thoracic surgeons, pulmonary medicine physicians, and cytopathologists who use EBUS-TBNA in a large medical center.

This publication is of interest to individuals learning and practicing cytopathology, in addition to clinicians practicing pulmonary/thoracic medicine or surgery. In short, it provides important pearls of wisdom to create a comprehensive reference for all physicians involved with EBUS-TBNA.

Contents

- Foreword: Herth, F.J.F.
- Preface: Monaco, S.E.; Khalbuss, W.E.; Pantanowitz, L.
- Editors/Contributing Authors
- Introduction to EBUS-TBNA: Monaco, S.E.
- Clinical and Surgical Perspectives with Comparison to Other Diagnostic Modalities: Christie, N.A.
- Review of Thoracic and Mediastinal Anatomy in EBUS-TBNA: Wilson, D.O.
- Technical Aspects of Performing EBUS-TBNA: Schuchert, M.J.
- Indications and Diagnostic Performance of EBUS-TBNA: Monaco, S.E.
- EBUS-TBNA Specimen Collection and Processing: Pantanowitz, L.
- Practical Approach to the Cytological Evaluation and Adequacy Assessment in EBUS-TBNA: Monaco, S.E.
- Normal and Nonneoplastic Components: Khalbuss, W.E.
- Pulmonary Epithelial Neoplasms: Khalbuss, W.E.
- Nonpulmonary Metastatic Carcinomas: Monaco, S.E.
- Nonepithelial Neoplasms: Pantanowitz, L.
- Thymic Lesions and Neoplasms: Pantanowitz, L.
- Contamination, Background Material, and Artifacts: Monaco, S.E.

Human papillomaviruses (HPV) are a heterogeneous and still growing virus family. Topical research results on the replication cycle and carcinogenic mechanisms allow a better understanding of current prevention strategies. Written by leading experts, this volume of Monographs in Virology provides up-to-date information on the prevention of papillomavirus-induced cancers by prophylactic antiviral vaccines and early detection of precancerous lesions.

A major section covers the tremendous clinical burden due to HPV infections: genital warts and laryngeal papillomas, the most notorious cervical cancer, but also further anogenital and tonsillar cancer, the incidence of which increased steeply during the last decades. Additionally, a section on prevention addresses the subject cytology – new concepts of biomarker development, detection of HPV DNA and RNA as well as their use in primary screening for early detection of precancerous lesions. Finally the book closes with a topical discussion of the most intriguing primary prevention of HPV infection by vaccination.

As new perspectives for the prevention of HPV-related neoplasia raised great public interest, this book will be of value to clinicians and practitioners in gynecology, dermatology, urology and ENT, to pathologists, laboratory physicians, medical students, and public health authorities.

Contents

Foreword: Pfister, H.

Virology and Pathogenesis: Pfister, H.

Epidemiology of Mucosotropic Papillomaviruses: Gissmann, L.

Clinical Aspects of Low-Risk HPV Infections

Condylomata Acuminata: Gross, G.

Recurrent Respiratory Papillomatosis: Wittekindt, C.; Wagner, S.; Klussmann, J.P.

Clinical Aspects of High-Risk HPV Infections

Cervical Cancer and Intraepithelial Neoplasia: Schneider, A.; Köhler, C.; Chiantera, V.; Vercellino, F.

Cancer and Intraepithelial Neoplasia of the Vulva and Vagina: Petry, K.U.

Penile Cancer and Penile Intraepithelial Neoplasia: Gross, G.F.

Tonsillar Cancer: Klussmann, J.P.; Wagner, S.; Wittekindt, C.

Diagnosis for Early Detection

Cytology: Ikenberg, H.

Concepts of Biomarker Development: von Knebel Doeberitz, M.; Vinokurova, S.; Reuschenbach, M.

Detection of Human Papillomavirus DNA and RNA: Ikenberg, H.

Human Papillomavirus Testing in Primary Screening for Cervical Cancer: Petry, K.U.

Primary Prevention by Vaccination: Kaufmann, A.M.; Gissmann, L.

Guidelines for Authors

Acta Cytologica is a bimonthly published journal that aims to cover all aspects within the area of both clinical cytology and cytopathology. It furthers the understanding of cytopathologic processes and facilitates the translation of current research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 cytology societies around the world, Acta Cytologica evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlation. The journal features Original Papers (Fine Needle Aspiration, Gynecologic Cytopathology, Nongynecologic Cytopathology, Techniques, Molecular Techniques), Novel Insights from Clinical Practice (formerly Case Reports), Letters to the Editor and Reviews. Criteria for acceptance are quality, originality, and clarity. Acta Cytologica will not consider papers that are either preliminary or purely descriptive. Reports on clinical cases are accepted only if they provide novel insight into unresolved problems of cytology and cytopathology. All articles are subject to editorial review.

Submission
Only original papers written in English are considered. Manuscripts should be submitted online using the online submission website at www.karger.com/acy (the preferred word-processing package is MSWord®). Before submitting your manuscript, you are encouraged to read the detailed guidelines at www.karger.com/acy_guidelines for specific directions as how to get a manuscript ready for submission. If you should have any problems with your submission, please contact the editorial office:

Kari I. Syrjänen
S. Karger AG
Editorial Office 'Acta Cytologica'
P.O. Box
CH-4009 Basel (Switzerland)
Tel. +41 61 306 1437
Fax. +41 61 306 1434
E-Mail acy@karger.com

Conditions
All manuscripts must be accompanied by a covering letter signed on behalf of all authors verifying that all the authors were active participants. Assurance should be given that the manuscript is original and not under simultaneous consideration for publication in another journal. Please provide complete financial disclosure information. Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see N Engl J Med 1997;336:309–315). All articles will undergo an in-depth peer-review process. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Acta Cytologica and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the authors’ responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. Signed permission forms from the copyright holders and original authors for all previously published tables or figures must be provided.

Sections
Original Paper (Fine Needle Aspiration, Gynecologic Cytopathology, Nongynecologic Cytopathology, Techniques, Molecular Techniques): Submitted manuscripts should be fully documented reports of original research. They must describe significant and original observations.

Review: Potential authors are asked to contact the Editor-in-Chief before submitting a paper in order to avoid clashes with other pending reviews.

Letter to the Editor: Letters to the Editor concerning articles published in Acta Cytologica may be submitted for publication. They should not be more than one printed page in length. If accepted, the authors of the articles concerned will be given the opportunity to reply. Novel Insights from Clinical Practice (formerly Case Reports): the publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on ‘established facts’ (what is already known) and ‘novel insights’ (what new information has been added) should each be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation.

Arrangement
General: Manuscripts should be written in English and be as concise as possible. The length of the text should be limited to approximately 3,000 words, pages numbered consecutively, starting with the title page, and continuing in the following order: abstract and key words, body of text, figures, references, table legends and tables. Use generic names of drugs when possible. For any trade name cited, capitalize the first letter, and include the manufacturer’s country, name and location (city, state/province, country). Express weights and measures in metric values. Acknowledge any presentation at a national or international medical society and any substantive financial support.

Title page: The first page of each paper should indicate the title, the authors’ names, the institute(s) where the work was conducted, and a short title for use as running head. Limit the number of authors to 6. If more than 6 authors contributed significantly to the article, the editorial office will consider including their names upon request.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as an e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential.

Abstract: Each paper needs an abstract limited to 200 words structured as follows: Objective, Study design, Results and Conclusions. For Novel Insights from Clinical Practice the headings should be: Background, Case and Conclusion. Address the study’s power to detect a difference if the research identified important variables that lacked a statistically significant difference.

Footnotes: Footnotes should be avoided. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Materials and Methods: Acknowledge that the original research was approved by the local institutional review board. Clearly state the method of any randomization, blinding and selection of specific statistical tests. Explain dropouts/exclusions and confounding variables.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 180 × 322 mm) or provide crop marks. Each illustration must be labelled with its number and the first author’s name. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling (final size), line art drawings one of 800–1,200 dpi. Do not modify a low-resolution image by increasing the dpi. Figure files should not be embedded in a document file but submitted separately. All illustrations must include the original magnification and the stain employed, and clearly identify which are primary and which are secondary. It is recommended that authors consult with their local radiographers, photomicrographers, etc. Provide sufficient information for a table to stand alone. Avoid tables in which the data could be included in the text in a few sentences.

References: In the text identify references by Arabic numerals [square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. In general, avoid listing unpublished data or manuscripts, personal communications, web sites and non-peer-reviewed publications. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org). Authors using EndNote® may choose the format setting for Intervirology for the correct format of references.

Examples
(b) Papers published only with DOI numbers: Theshairides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000083585.

Color Illustrations
For all manuscripts accepted, authors will be charged CHF 500.00 for each color page published in the print version of the journal. Several color illustration may be placed onto one color page. When the illustration appears in black and white in the printed version, the authors will not be charged a fee. In the online version all figures submitted in color will appear in color at no charge to the author. Referring to colors in the text and figure legends should be avoided. We recommend using symbols, instead of color, for charts and graphs.

Ethics
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute’s committee on human research and thus meets the standards of the Declaration of Helsinki in its revised version of 1975 and its amendments of 1983, 1989, and 1996 [JAMA 1997;277:925–926]. Information suitable to
Guidelines for Authors

reveal the subject’s identity is to be avoided. Further, authors should also state that animal experiments conform to institutional standards. Copies of these guidelines and policy statements must be available for review by the editors if necessary.

Conflict of Interest
All forms of funding and support, including that from companies, as well as any potential competing financial interests should be acknowledged in the cover letter to the editors when applicable. The statement has to be listed at the end of the article.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice
Karger’s Author’s Choice service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in a grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting Karger’s Author’s Choice service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/FAQ.html#a1.

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice feature, however, are also permitted to archive the final, published version of their article, which includes copy-editing and design improvements as well as citation links.

Copy Editing
All manuscripts accepted for publication by Karger are subject to copy editing. Changes introduced by the copy editor and/or questions will be marked in the manuscript so please be sure to check the proofs against the manuscript. The copy edited manuscript will be returned along with the proofs.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author. No page proofs are supplied.

Reprints
An order form and a price list are sent with the proofs. Orders submitted after the release of an article in print are subject to considerably higher prices.

For over 40 years the Karger Gazette has been distributed to a growing audience worldwide. Published once a year in newspaper format, it highlights advances in biomedicine and clinical practice, introduces personalities, portrays research institutes and chronicles milestones in the history of Karger Publishers in a lively and readable style. With invited contributions by experts from all over the world, each issue is devoted to a special topic of current interest.

In the latest issue, read free articles on the famous anatomist Andreas Vesalius, his times and his ground-breaking atlas ‘De humani corporis fabrica’, and more.

JOIN MORE THAN 700 OF YOUR COLLEAGUES IN DALLAS
for a unique and engaging educational experience you won’t find anywhere else

Gain expert perspective from today’s innovators:
- Astronaut Dr. Scott Parazynski presents the New Frontiers Lecture on his experience in space as well as his climb on Mt. Everest
- Annie Griffiths presents the Leopold Koss Lecture as a humanitarian and photographer, contributing to the National Geographic and world traveler of nearly 150 countries during her illustrious career
- Two Current Issues in Cytology sessions with “Urinary Cytology Reporting Terminology and Diagnostic Criteria” moderated by Dr. Dorothy Rosenthal and Eva Wojcik, and “The Bethesda 2014 Reporting System” moderated by Dr. David Wilbur.
- Innovations and Trends in Medicine, “Recent Advances in Head and Neck (and Thyroid) Cancer Diagnosis,” with Dr. Jeffrey Krane moderating a panel of faculty
- The State of the Art Symposium, an “Update on Endocrine Cytology,” presented by Dr. Ruth Katz and panelists

Program Highlights:
- New 4-day format!
- NEW! Microscopic, Multi-headed Scope and Molecular Roundtable Sessions
- Thyroid Ultrasound FNA Course
- Focus on Diagnostic Cytomorphology: Sessions I & II
- Hot Topic: HPV Testing
- Future of Cytotechnology Session
- ASC Foundation FUNdraisers: SK Walk/Run & Art Auction
- Career Planning and Growth Session
- Strategies in Cytopathology & Cytotechnology Education Sessions
- NOW 36 Roundtable Discussions
- Plus more!

Scientific Sessions include…
- Platform and Poster Presentations
- State of the Society Address
- Papanicolaou Address
- Current Issues in Cytology
- New Frontiers Lecture
- State of the Art Symposium
- Innovation & Trends in Medicine
- Leopold Koss Lectureship
- Diagnostic Cytology Seminar

24. Arbeitstagung für klinische Zytologie

25.–29. März 2015
Waldhaus Flims Mountain Resort & Spa, CH–7018 Flims

Patronat
Schweizerische Gesellschaft für klinische Zytologie
Vereinigung Europäischer Gesellschaften für Zytologie (EFCS)

Themen

- Gynäkologische Zytologie inkl. spezielle Methoden, computerassistiertes Screening und Selbsttests
- Klinische Zytologie: Insbesondere Mamma-Zytologie, Urozytologie und Lungenzytologie, sowie Punktate der ausgewählter Organe, inkl. histopathologische Korrelation
- Neue Untersuchungsmethoden mit molekularbiologischer Ausrichtung
- Industrie-Ausstellung mit dem Update des technologischen Standards

Zu allen Themen sind neben den Vorträgen auch Workshops und themenorientierte Meetings vorgesehen.
