This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of oncology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed. The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the entire growing collection of case reports, further facilitating the retrieval of specific information.

Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.
Guidelines for Authors

Submission
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/uin
or as e-mail attachment (the preferred word-processing package is MS Word) to the Editorial Office:
uin@karger.ch
S. Karger AG
Editorial Office 'Urologia Internationalis'
P.O. Box
CH-4009 Basel (Switzerland)
Tel. +41 61 306 1424
Fax +41 61 306 1434

The manuscripts should be accompanied by a signed cover letter addressing the points below. A signed copyright transfer of the copyright from the author to the publisher must be submitted upon acceptance (please see submission website).

Conditions
All manuscripts are subject to peer review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Urologia Internationalis and may not be re-produced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Cover Letter
It must include statements on the following points:
1. All authors have made a significant contribution to the findings and methods in the paper.
2. All authors have read and approved the final draft.
3. Financial or commercial interest must be acknowledged.
4. The work has not already been published and has not been submitted simultaneously to any other journal.
5. The corresponding author takes on the above responsibilities with his/her signature.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. As defined, plagiarism is a case in which a paper reproduces another work with at least 25% similarity, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 800 × 223 mm) or provide crop marks. Electronically submitted b/w half-tone and color illustrations must have a resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately (for detailed instructions, see http://www.karger.com/uin).

Case Reports should include the most important clinical details and not exceed 1,000 words. One table and two figures may be included. References should be limited to ten.

Letters to the Editor must include matters of interest to urologists and not exceed 500 words.

Color illustrations:
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure captions.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.00 per page.

References: In the text identify references by Arabic numerals (in square brackets). Material submitted for publication must not yet be accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples:
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg). A signed copyright transfer of the copyright from the author to the publisher must be submitted upon acceptance (please see submission website).

Author's Choice
Karger's Author's Choice service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
With the added advantage of being citable much earlier than in print, Authors selecting Karger's Author's Choice feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Page Charges
There are no page charges for original papers of 3 or fewer printed pages (3,000 words including tables, illustrations and references) or for case reports with 2 or fewer printed pages. Each extra complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 8 manuscript pages double-spaced (including tables, illustrations and references). The inability to pay charges for extra pages will not prejudice publication of the paper. This will be decided by the Editors.

Proofs
PDF proofs will be sent to the corresponding author and should be returned with the least possible delay.

E-pub First
All articles are published electronically ahead of print with a DOI number and are supplemented later with the definitive reference of the printed version. The articles become available immediately after the authors' approval to publication, in print. Authors can influence the time of appearance by self-archiving their article, which includes copyediting and design improvements as well as citation links.

Reprints
Order form and price list is sent with the pdf proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

15 - 18 June 2015
Annual Meeting
The British Association of Urological Surgeons

- Early booking registration fees end at 12 noon (BST) on Friday 29th May 2015
- Book now to qualify for the lower rates!
- Delegate registration will close at 10.00 (BST) on Friday 12th June 2015
- Online booking and the meeting programme is available at www.baus.org.uk

KEY FEATURES
Meetings (Monday 15th June) of the Sections of:
- Academic Urology
- Andrology & Genito-Urethral Surgery
- Female, Neurological & Urodynamic Urology

Office of Education Teaching & Skills Courses
International Day (Thursday 18th June)
Top speakers from the AUA and IBUS

Medical and Trade Exhibition Guest Lectures
BAUS Guest Lecture - Dr Jerome Groopman & Dr Pamela Hartzband
BJU International Guest Lecture - Professor Hendrik Van Poppel
The Urology Foundation Guest Lecture - Dr Inderbill S. Gill
Prostate Cancer UK Guest Lecture - Dr Martin Sanda

State of the Art Paper and Poster Presentations
Sponsored Satellite Sessions
Astellas Eli Lilly & Co. Olympus

Social Programme
Welcome Reception Mon 15th June The Exhibition Hall
Conference Dinner Wed 17th June Manchester Town Hall

All conference content, speakers and timings are correct at time of publication. The Organisers cannot be held responsible for changes due to circumstances beyond their control, including the withdrawal of speakers from the programme, for any reason.

'A collection of extraordinary essays'

GOTTFRIED SCHATZ
A MATTER OF WONDER
What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

GOTTFRIED SCHATZ
A Matter of Wonder
What Biology Reveals about Us, Our World, and Our Dreams
Translated by A. Shields
XII + 190 p., 2 color fig., hard cover, 2011
CHF 29.– / EUR 21.50 / USD 29.00

Recent discoveries in experimental and clinical research have led to impressive advances in our knowledge of the genetic and environmental mechanisms governing sex determination and differentiation, their evolution as well as the mutations or endocrine and metabolic abnormalities that interfere with normal gonadal development. Sexual Development provides a unique forum for this rapidly expanding field. Its broad scope covers all aspects of genetics, molecular biology, embryology, endocrinology, evolution and pathology of sex determination and differentiation in humans and animals. It publishes high-quality original research manuscripts, review articles, short reports, case reports and commentaries. An internationally renowned and multidisciplinary editorial team of three chief editors, ten prominent scientists serving as section editors, and a distinguished panel of editorial board members ensures fast and author-friendly editorial processing and peer reviewing.

Selected contributions
- Novel PCR Assay for Determining the Genetic Sex of Mice: McFarlane, L.; Truong, V.; Palmer, J.S.; Wilhelm, D. (Brisbane, Qld.)
- New Genetic Abnormalities in Non-21α-Hydroxylase-Deficiency Congenital Adrenal Hyperplasia: Martin, M.; Najera, N.; Garibay, N.; Malancio, L.M.; Martinez, T.; Rivera, J.; Rivera, M.; Queipo, G. (Mexico City)
- Variable Loss of Functional Activities of Androgen Receptor Mutants in Patients with Androgen Insensitivity Syndrome: Elfferich, P.; van Royen, M.E.; van den Akker, E.L.T. (Rotterdam); Lusher, S.J. (Amsterdam); Bosch, R. (Oss); Bunch, T.; Hughes, I.A. (Cambridge); Houtsmuller, A.B. (Rotterdam); Cools, M. (Ghent); Faradz, S.M.H. (Semarang); Bisschop, P.H.; Bunch, M.C.M. (Amsterdam); Oostdijk, W. (Leiden); Brüggenwirth, H.T.; Brinkmann, A.O. (Rotterdam)
- Insights into the Evolutionary History of the X-Linked Sex Reversal Mutation in Mus minutoides: Clues from Sequence Analyses of the Y-Linked Sry Gene: Veyrunes, F.; Perez, J. (Montpellier); Paintsil, S.N.C. (Accra); Fichet-Calvet, E. (Hamburg); Britton-Davidian, J. (Montpellier)
- Follistatin Is an Early Player in Rainbow Trout Ovarian Differentiation and Is Both Colocalized with Aromatase and Regulated by the Wnt Pathway: Nicol, B.; Yano, A.; Jouanno, E.; Guérin, A.; Postier, A.; Guiguen, Y. (Rennes)
- Sex Determination in Insects: Variations on a Common Theme: Bopp, D. (Zurich); Saccone, G. (Naples); Beye, M. (Düsseldorf)

Concise but fully substantiated international reports of clinically oriented research into the science and current management of urogenital disorders form the nucleus of original as well as basic research papers. These are supplemented by up-to-date reviews by international experts on the state-of-the-art of key topics of clinical urological practice. Essential topics receiving regular coverage include the introduction of new techniques and instrumentation as well as the evaluation of new functional tests and diagnostic methods. Special attention is given to advances in surgical techniques and clinical oncology. The regular publication of selected case reports represents the great variation in urological disease and illustrates treatment solutions in singular cases.

Selected contributions
- Prediction of Extraprostatic Extension in Patients with Clinically Organ-Confined Prostate Cancer: Lin, S.; Zhang, Q.; Li, P.; Li, Z.; Sun, Y.; Shao, Y.; Zhang, X.; Fu, S. (Shanghai)
- Obesity and Prostate Cancer Incidence and Mortality: A Systematic Review of Prospective Cohort Studies: Golabek, T. (Otwock); Bukowczan, J. (Middlesbrough/Newcastle upon Tyne); Chłosta, P. (Cracow); Powroźnik, J.; Dobruch, J.; Borówea, A. (Otwock)
- Safe Introduction of Robot-Assisted Radical Prostatectomy after a Training Program in a High-Volume Robotic Centre: Lumen, N.; Van Praet, C.; De Troyer, B.; Fonteyne, V.; Oosterlinck, W.; Decaestecker, K. (Ghent); Mottrie, A. (Ghent/Aalst)
- Systematic Assessment of Complications and Outcome of Radical Cystectomy Undertaken with Curative Intent in Patients with Comorbidity and over 75 Years of Age: Novotny, V. (Dresden); Hakenberg, O.W. (Rostock); Frohner, M.; Zastrozow, S.; Leike, S.; Koch, R.; Wirth, M.P. (Dresden)
- Bipolar versus Monopolar Transurethral Resection of the Prostate: Results of a Comparative, Prospective Multicenter Study – Perioperative Outcome and Long-Term Efficacy: Neyen, M.; Reissigl, A. (Bregenz); Schwab, C. (St. Gallen); Pointer, J. (Bregenz); Abt, D. (St. Gallen); Bachmayer, C. (Bregenz); Schmid, H.-P.; Engeler, D.S. (St. Gallen)
International Continence Society
45th Annual Meeting
6th - 9th October 2015

Call for Abstracts open 1st March - 1st April

Although methods of urinary stone removal are becoming evermore effective, the prevalence of urolithiasis is continuously increasing. Epidemiological studies show that 5–10% of the population suffer from urinary stones. Stone removal alone is not a curative measure. Depending on the stone composition, a recurrence rate of 60–100% must be expected. Hence, analysis of the stone material and basic diagnosis of the metabolic origins of urolithiasis are imperative, as well as consistent recurrence prevention in high-risk patients. This revised and updated handbook meets these requirements. It is designed to assist clinicians and healthcare professionals by guiding them through the appropriate diagnostic examinations and the development of effective and safe plans for treatment and prevention. It takes the newest international and European guidelines for urinary stone therapy into account, and includes the latest findings in clinical and laboratory diagnosis, dietary therapy and medication. Furthermore, it offers specific solutions for the treatment of children. Its clear organization makes it a valuable and indispensable reference book, especially for urologists, nephrologists and pediatricians.
A new vision to understanding medicine

Handbook of Clinical Gender Medicine

Editors: Karin Schenck-Gustafsson (Stockholm), Paula R. DeCola, Donald W. Pfaff (New York, N.Y.), David S. Pisetsky (Durham N.C.)

In well-referenced chapters, experts cogently and concisely explain how the incorporation of gender issues into research can affect the medical understanding and treatment of heart disease, osteoporosis, arthritis, pain as well as malaria among other conditions.

This intriguing and unique medical textbook provides readers with a valuable new perspective on how to incorporate gender issues into the different branches of medicine.

www.karger.com/Gender_Medicine
Medical textbooks are mainly oriented by body systems, disease or diagnosis, yet practicing physicians are confronted with patients’ complaints in the form of symptoms, physical signs or laboratory abnormalities, from which they are expected to reach a diagnosis and proceed with treatment. This book is meant as a pragmatic text for use at the patient’s bedside. It classifies common clinical symptoms and signs, laboratory abnormalities and issues of management as they present themselves in daily practice. Special emphasis is given to new knowledge that has accumulated on the molecular pathophysiology and molecular genetics of various kidney diseases in order to deepen and strengthen the practical approach to common problems in pediatric nephrology.

Aimed at an audience of general and family practitioners, pediatricians and trainees who are not exposed on a day-to-day basis to pediatric nephrology problems, it provides a logical, concise and cost-effective approach from which they can profit and acquire medical reasoning.
Nephron comprises three sections, which are each under the editorship of internationally recognized leaders and served by specialized Associate Editors. Apart from high-quality original research, Nephron publishes invited reviews/minireviews on up-to-date topics. Papers undergo an innovative and transparent peer review process encompassing a Presentation Report which assesses and summarizes the presentation of the paper in an unbiased and standardized way.
