Contents - Inhalt

Introduction. By P. Kallos. 1
Allergy in Children. By M. Murray Peshkin. 21
Critical Evaluation of Diagnostic Tests for Sensitization in Infancy and
Childhood. 22
Bronchial Asthma. 53
Hay Fever. 97
Vasomotor Rhinitis. 115
Allergic Eczema. 116
Gastrointestinal Allergy. 124
Urticaria, Angioneurotic Edema and Erythema Multiforme . 127
Migraine. 128
Physical Allergy. 129
Allergic Pulmonary Infiltration. 130
Management of the Preallergic Child. 133
Life Situations Affecting the Allergic Child. 136
Bibliography. 139

Bronchial Asthma. By Leon Unger. 142
Definition and Introduction. 142
Etiology. 144
Anatomy. 153
Pathology of Bronchial Asthma. 157
Diagnosis of Bronchial Asthma. 169
Prevention of Asthma in Children of Allergic Parents. 172
Specific Treatment of Bronchial Asthma. 179
Hyposensitization (Desensitization). 188
Non-Specific Treatment of Bronchial Asthma. 200
Bibliography. 220

Bronchial Asthma Due to Food Allergy. By Albert H. Rowe • 222
Characteristics of Bronchial Asthma Due to Food Allergy . 223
Bronchial Asthma in Childhood. 226
Bronchial Asthma in Adults Between 15 and 55 Years. 231
Bronchial Asthma in Patients over the Age of 55 . 234
Determination of Food Allergy and other Causes of Bronchial Asthma . 238
Skin Testing. 241
Leucopenic Index and Pulse Rate. 242
Trial Diet. 243
The Standardized Cereal-Free Elimination Diet for the Study of Food
Allergy in Bronchial Asthma. 244
Comments on and Directions for Use of the Cereal-Free Elimination Diet 249
Cereal-Free Elimination Diet for Infants. 251
Formula for Soy Milk. 252
Strained Meat Formula (Rowe) - A Substitute for Cow's Milk . 253
Meals Eaten Away From Home. 254
Lunches Carried to Work. 255

Other Elimination Diets. 255
Digestive Intolerances for Foods. 258
Time Necessary to Use the Elimination Diets. 258
The Necessity of Physical Examinations and all Indicated Laboratory
Work to Rule out other Pathology, and other Causes of Bronchial
Symptoms. 259
The Addition of Foods after the Development of Relief from Elimination
Diets. 259
Maintenance of Nutrition and Weight with the Elimination Diet 261
Requirements for Good Results with Elimination Diets. 262
Unrelieved Bronchial Asthma. 264
Manifestations of Allergy Due to Food and other Allergies . 264
Other Manifestations of Allergy in Patients with Bronchial Asthma . . 266
Time for Symptoms to Develop after the Ingestion of an Allergenic Food 267
Desensitization to Foods. 269
Recognition and Control of Inhalant Allergy. 269
Drug and Infectant Allergies. 272
Treatment. 273
Bibliography. 274

The Infective Factor in Asthma and Rhinitis.
By David Harley. 276
Uses and Limitations of the Dermal Test with Extrinsic Allergens . 277
The Interpretation and Significance of Positive Reactions . 279
Relative Importance of Sensitization to Extrinsic and to Bacterial
Allergens. 282
Bacterial-Sensitization, Focal Infection, and the Toxic Focus . 283
Pathogen-Selective Culture. 285
Vaccine Therapy. 286
Relief of the Toxic Load on the Colon . . 287
Bibliography. 289

Die Pneumometrie. Eine Methode zur quantitativen Beurteilung
asthmatischer Zustände.
Von F. Wy13 und W. Hadorn. 290
Einleitung. 290
Messung des Exspirationsstoßes.291
Beschreibung des Pneumometers. 295
Eigenschaften des Differenzdruckmanometers. 299
Vergleich der Werte des alten Pneumometers mit denen des neuen Modells 302
Kann aus dem Pneumometerwert auf den Bronchialwiderstand geschlossen
werden?. 302
Praktische Ausführung der Pneumometrie und Genauigkeit der Methode 309
Die Pneumometrie unter physiologischen Bedingungen. 309
Cardio-Vascular Allergy. By Joseph Harkavy. 334

I. Reactions in Sensitized Tissue. 334
II. Site of Antigen-Antibody Reaction. 337
III. Mechanisms of the Allergic Reaction. 339
IV. Factors in the Development of the Vascular Shock Tissue in Man . 343
   a) Heredity. 343
   b) Non-Specific Factors. 344
   c) Bacterial Toxins, Shwartzman Phenomenon. 345
V. Significance of the Shwartzman Phenomenon . 346
   a) Local Hemorrhagic Reactions in Man. 348
VI. Allergic Manifestations in the Vascular System. 350
   1. Capillaries. 350
   2. Cardio-Vascular System. 351
      a) Tobacco Allergy. 352
      b) Pharmacological Action of Tobacco. 352
      c) Role of Nicotine. 353
      d) Tobacco Skin Reactions in Normal Smokers and Non-Smokers 354
VII. Significance of Tobacco Allergy in Cardio-Vascular Diseases . . 355
   1. Peripheral Vascular Disease. 356
      a) Thrombo-Angiitis Obliterans. 356
      b) Borderline Cases of Thrombo-Angiitis Obliterans . 359
   2. Cardiac Disease. 359
      a) Arrhythmias, Extrasystoles, Simple Tachycardia, auricular
         Fibrillation. 359
      b) Angina Pectoris and Coronary Artery Disease . 359
VIII. Cardio-Vascular Manifestations Due to Foods, Infections and Phy-
   1. Peripheral Vessels. 362
      a) Migrating Phlebitis Due to Food Allergy. 362
      b) Migrating Phlebitis Due to Infection. 362
   2. Heart. 362
      a) Paroxysmal Tachycardia and Extrasystoles Due to Food Allergy 363
      b) Auricular Fibrillation and Angina Pectoris Due to Foods, etc. 363
c) Extrasystoles, Tachycardia and Angina Pectoris Due to Physical Factors, Cold, Heat and Effort. 364
d) Angina Pectoris Due to Pollen. 364
e) Angina Pectoris Due to Drugs. 365
f) Angina Pectoris Due to Immune Serum and Typhoid Vaccine 366

3. Discussion. 367

IX. Cardio-Vascular Manifestations Due to Bacterial Hypersensitivity 368
1. Clinical Manifestations. 368
2. Cardiac and Serous Membrane Manifestations. 371
3. Necropsy Findings. 373
4. Discussion. 375

X. Periarteritis Nodosa and Eosinophilic Myocarditis. 377

XI. Discussion and Summary. 381

Bibliography. 384

Chemical Investigations on Ergot Alkaloids. By Arthur Stoll 388

I. Introduction. 388
II. Botanical. 389
III. Historical. 391
IV. Chemistry of the Ergot Alkaloids. 393
  a) Introduction. 393
  b) Lysergic Acid and Isolysergic Acid. 397
  c) Stereochemistry of Lysergic Acid. 401
  d) Ergobasine. 404
  e) Alkaloids of the Ergotamine Group. 407
     1. Ergotamine. 410
     2. Ergosine. 414
  f) Alkaloids of the Ergotoxine Group. 415
     1. Ergocristine. 420
     2. Ergokryptine. 421
     3. Ergocornine . 422
  g) Partially Synthetic Derivatives (of the Lysergic Acid Series) 423
     1. Introduction. 423
     2. Amide-like, Partially Synthetic Derivatives. 424
     3. Dihydroderivatives of Natural Alkaloids of Ergot . 428
V. Concluding Remarks. 431
Bibliography. 432

Allergy, the Autonomic Nervous System and Ergot Alkaloids. By E. Rothlin and R. Bircher. 434

Introduction. 434
I. Allergy, the Autonomic Nervous System and Autonomic Drugs 436
1. Allergy and Histamine 436
2. Allergy and the Cholinergic System 440
3. Allergy and the Adrenergic System 440
4. Allergy and Amphotonia 442

II. Pharmacology of Ergot Alkaloids 447
A. Central Nervous Action 450
1. Actions on the Centres Regulating the Circulation 450
   a) Heart 450
   b) Circulatory Reflexes 450
   c) Vasomotor Centre 451
2. Central Sedative Effect 453
B. Peripheral Functions 455
1. Cardiac Effects 455
2. Other Peripheral Functions 457
   a) Manifest in all Conditions 457
   b) Latent Peripheral Effects 464

C. The Antihistaminic and Antianaphylactic Actions of the Ergot Alkaloids 466
1. Antihistaminic Actions 466
2. Antianaphylactic Actions 469

III. The Treatment of Certain Allergic Diseases with Natural and hydrooenated alkaloids of ergot 471

Conclusions 476
Bibliography 478

The Use of Ergot Derivatives in Prophylaxis and Therapy of Migraine By Paul Kallos and Liselotte Kallos-Deffner 485
Bibliography 499

Drug Allergy By Ethan Allan Brown 500
Bibliography 529

Sedormid Purpura: An Immunological Study of a Form of Drug Hypersensitivity By /. F. Ackroyd (With Plate I) 531
Introduction 531
Case Reports 533
Methods 536
Experimental Work 538
Action of Sedormid in Reducing Clot Retraction 538
Action of Sedormid in Causing Abnormally Rapid Lysis of Platelets During Coagulation. 541
Evidence that the Effect of Sedormid in Reducing Clot Retraction is Due to the Action of a Factor in the Plasma. 544
Evidence that the Effect of Sedormid on Clot Retraction is Due Solely to its Lytic Action on Platelets During Coagulation. 547
Agglutination and Lysis of Platelets by Sedormid in Fluid Blood . . 549
The Minimum Concentration of Sedormid Required to Cause a Reduction in the Number of Free Platelets in the Plasma . 551
The Quantitative Estimation of Platelet Lysis by Sedormid . . . 554
Complement Fixation by Sedormid. 555
Evidence that the Lysis of Platelets by Sedormid is Due to the Action of a Factor in the Serum. 556
Failure of Sedormid to Fix Complement in the Absence of Platelets 558
Fixation of Guinea-Pig Complement by Sedormid. 559
Failure of Sedormid to Fix Complement in the Presence of Red and White Cells but in the Absence of Platelets. 560
Action of Sedormid on Platelets in the Absence of Complement 561
Action of Sedormid on the Capillaries. 562
Intradermal Testing with Sedormid. 563
Patch Testing with Sedormid. 563
Discussion. . 566
Summary. . 569
Acknowledgements. 572
Bibliography. 572
