Vol. 8

Progress in Surgery

Vol. 8

Edited by
M. Allgöwer, Basel - S.-E. Bergentz, Göteborg - R.Y. Calne, Cambridge (GB)
U.F. Gruber, Basel

Contributors

41 figures, 10 tables

Basel (Switzerland) S. Karger New York

Progress in Surgery

Vol. 1: XVI + 256 p., 65 fig., 3 tab., 1961
Vol. 2: VIII + 318 p., 84 fig., 20 tab., 1962
Vol. 3: XII + 304 p., 50 fig., 1963
Vol. 4: VIII + 112 p., 20 fig., 5 tab., 1964
Vol. 5: VIII + 164 p., 118 fig., 7 tab., 1966
Vol. 6: VI + 121 p., 23 fig., 12 tab., 1968
Vol. 7: IX + 292 p., 55 fig., 36 tab., 1969

Index

Editorial: Ethical Problems of Organ Transplantation
M. Allgöwer and U. F. Gruber, Basel

I. Introduction 1
II. The Donor-Recipient Problem 2
III. The Responsibility of the Medical Profession 4

Suture Materials in General Surgery
W. G. Everett, Cambridge

I. Introduction 14
II. The Behaviour of Suture Materials 15
A. Tissue reaction to suture materials 15
B. Predisposition to infection 17
C. Sinus formation 19
D. Durability 23
E. Handling ability and knot security 23
III. Abdominal Wound Closure 24
IV. Herniorrhaphy 28
V. Gastro Intestinal Surgery 29
A. Catgut absorption in the bowel 30
B. Choice of suture material for colonic anastomosis 32
C. Gastric and biliary surgery 33
VI. Summary and Conclusions 34
VII. References 34

Suture Materials in General Surgery. A Comment
U. Brunius and B. Zederfeldt, Göteborg 38

I. Capacity to Secure Approximation of Wound Edges 38
II. Negative Influence of Sutures on the Healing Process 39
III. Clinical Application 42
IV. Summary 43
V. References 43

VI Index

Vagotomy and Drainage Procedures. The present position
A. G. Cox, London
Intra-operative Blood Flow Measurements with Electromagnetic Flowmeters
Ch. Cappelen and K.V. Hall, Oslo

I. Introduction 102
II. Principle 104
III. The Surgical Blood Flowmeter 106
IV. Selecting a Flowmeter 107
V. Application of the Probe 109
VI. Calibration of Probe and System 110
VII. 'Troubleshooting' III
VIII. Maintenance 113
IX. More Complicated Systems 114
X. The Usefulness of Volume Flow Measurements in Peripheral Arterial Surgery 116
XL Volume Flow Measurements in Shunt Operations 118
XII. Volume Flow Measurements in Organ Transplantation 118
XIII. The Instantaneous Flow Pattern 119
XIV. Implanted Probes in Man 121
XV. Special Probes 121
XVI. Conclusions 122
XVII. References 122

Significance and Limitations of Electromagnetic Blood Flowmetry
H. Meisner and K. Messmer, München

I. Introduction 124
II. Material and Method 125
III. Problems of Electromagnetic Blood Flow Measurements 126
A. Mechanical changes at the transducer 127
B. Electrical changes during flow measurements 129
1. Electrode polarisation 129
2. Interference 130
3. Gate setting 131
4. Probe insulation 132
5. Surrounding medium 132
6. Hematocrit 133
C. Alteration of flow profile 134
IV. Application of Electromagnetic Blood Flowmeters 134
A. Intraoperative blood flow measurements 135
B. Flow measurements in organ transplantation 137
Flowmetry in human cardiac transplantation 138
C. Significance of blood flow measurements in postoperative care 139
V. Conclusions 141
VI. References 141
