Research and Clinical Studies in Headache

An International Review

Vol. 2

Editor in Chief

Arnold P. Friedman, M.D.
New York, N.Y.

Editorial Board

M. Critchley, London
T. Dalsgaard-Nielsen, Copenhagen
S. H. Frazier, New York
J.R. Graham, Boston (Mass.)
H. Heyck, Berlin
P. Kalló, Helsingborg
E. C. Kunkle, Portland (Maine)
J.W. Lance, Sydney
R.J.L. Pluvinage, Paris
G.F. Poch, Buenos Aires
H. Rome, Rochester (Minn.)
F. Sicuteri, Florence

With 25 figures and 17 tables

BASEL (Switzerland) S. KARGER NEW YORK

Research and Clinical Studies in Headache

An International Review
Table of Contents

Pathogenesis of Migraine
H. Heyck (Berlin)

I. Primary Etiological Factors 2
II. Pathogenesis of Attack Symptoms 6
A. Pain 6
Personal Research 7
Arteriovenous shunts as specific vessel changes during a migraine attack.10
Results 10
Conclusions 11
B. Cerebral Symptoms of Migraine 19
Comment 23
Conclusions 24
References 26

The Possible Relationship of Serotonin to the Migraine Syndrome
M. Anthony, Herta Hinterberger and J.W. Lance (Sidney)
Vascular Reactions in Migraine 29
Neural Control of Scalp Blood Vessels in Migraine 31
Humoral Control of Cranial Vessels in Migraine 32
Physiological Effects of Serotonin 35
The Effect of Serotonin on the Cranial Vessels of Man 36
Changes in Plasma Serotonin During the Migraine Attack 38
Lack of Change in Total Plasma Serotonin After Stressful Procedures 42
The Effect of Injected Reserpine 42
The Effect of Injected Serotonin 43
Platelet Uptake and Release of Serotonin 44
Chronic Post-Traumatic Headache
Jean Nick and Christine Sicard-Nick (Paris)

Introduction 116

Part I: Material—Definition—Incidence 117
I. Material 118
II. Definition 118
III. Incidence 119

Part II: Analytical Study of Chronic Post-Traumatic Headaches 121
Basis of the Analysis 121
I. Localized Unilateral Headaches Resulting from Direct Impact on all Superficial and Deep Structures of the Head (Cervical Traumas Excluded) 123
   A. Arterial Type 123
   B. Localized Headache of Venous Origin 131
   C. Neuralgic Cephalalgia 132
   D. Other Types of Localized Post-Traumatic Cephalalgia 133

Table of Contents VII

II. Headache Related to Cervical Traumatisms 135
   A. The Causal Traumatism 135
   B. Immediate Manifestations of Cervical Traumas 137
   C. The Type of Late Headache 138
   D. Clinical Data 139
   E. Radiologic Data 141
   F. Mechanisms of Headache of Cervical Origin 142
   G. Therapy 144

III. Traumatic Headaches of a Psychical Origin 145
   A. The Causal Traumatism 145
   B. Semeiological Study of the Headache 147
   C. Clinical Objective Data 149
   D. The Patient’s Personality in Connection with his Surroundings 151
   E. The Role of Damage Compensation 153
   F. Mechanism 154
   G. Treatment 155

Part III: General Remarks 157
I. Incidence of Intricate Mechanisms 157
II. Comparisons of Different Types of Accidents Resulting in Different Types of Cephalalgias 159
III. Do Other Pain Mechanisms Exist in Chronic Post-Traumatic Headaches? 160
   A. The Role of Scars and Adherences of the Leptomeninges 160
   B. The Role of Elevated Intracranial Pressure 160
   C. The Role of Depressed Intracranial Pressure 161
IV. Pain Mechanisms of Early Headaches 161
A. Lesions of the Superficial Soft Tissues: Bruise or Hematoma if There
is no Bruise 162
B. Cervical Dislocations 162
C. Other Mechanisms Belonging Only to the Early Stage 162
D. Does the Psychical Factor intervene in Early Headache? 163

Summary 164
References 165

Psychoanalytic Aspects of Head Pain
Bernard D. Fine (New York, N. Y.) 169

The Psychotherapy of Headache
S. H. Frazier (Houston, Tex.)

Classifications of Headache 195
I. Vascular Headache of Migraine Type, Classical Migraine 196
II. Other Migraine Variants 197
III. Cluster Headache 197
IV. Muscle Tension Headache 197
V. Atypical—Mixed Variety of the Above Groups 198

Historical Data 198
Psychological Aspects 200

Treatment 203
Diagnostic Procedure 203
Roles of Doctor and Patient in Psychotherapy 204
Treatment Elements 205
