DONALD W. SELDIN
Louis G. WELT

Secretariat
Congress Manager

Mrs. HELENA B. LEMP
Scheduled under the general sponsorship of the
International Society of Nephrology

Officers 1963-66

President
President Elect
Outgoing President
1st Vice-President
2nd Vice-President
3rd Vice-President
General Secretary
Treasurer
Associate Treasurer

CLAUS BRUN (Denmark)
JOHN P. MERRILL (USA)
JEAN HAMBURGER (France)
PIERRE P. LAMBERT (Belgium)
KENzo OSHIMA (Japan)
FRANçois C. REUBI (Switzerland)
JEAN L. FUNCK-BRENTANO (France)
LUIGI MIGONE (Italy)
THOMAS KARGER (Switzerland)

Sponsored in the United States by

Renal Section, Council on Circulation, American Heart Association

Chairman
Vice-Chairman

JOHN P. MERRILL, Renal Section
STANLEY E. BRADLEY, Renal Section

Cooperating Societies

American Federation for Clinical Research
American Medical Association
American Society for Artificial Internal Organs
American Urological Association
Scientific Advisory Board of the
National Kidney Foundation
Washington, D. C. Heart Association

Supported in part by grants from

The National Heart Institute (HE 09701-01)

and

The National Institute of Arthritis and Metabolic Diseases (AM 10523-01)
National Institutes of Health, U.S. Public Health Service

and from

The National Science Foundation (GB-5375)

Officers of Previous Congresses

1960-Evian, France

M. R. S. MACH, President
JEAN HAMBURGER, Vice-President
GABRIEL RICHE
Secretary-Generals
JEAN MARIE COTTET

1963-Prague, Czechoslovakia

JAN BROD, President
JIRI JIRKA, Secretary-General

Officers of the International Society of Nephrology

Elected September 30, 1966, for 1966--1969

(Executive Committee)

President
Outgoing President
President Elect
Preface

A congress is a coming together. Like any 'happening', there is no accurate quantitative measurement for either its ingredients or its impact. If a congress is successful, one can choose to underline the depth and breadth of its planning, the diversity of its scope, the admixture of talented guests, the quality of presentation, the status of the science behind the presentation, the level of excellence in the particular scientific
field, the interplay of personalities, the geographical setting, and even the weather. Judging from comments received, the III International Congress of Nephrology was a success. We hope that success is not measured merely by the 2134 scientists registered, the 624 abstracts submitted, or the 75 invited papers and 224 free communications presented. We hope that these tangible items are outweighed by the intangibles—the new ideas appreciated, the constructive criticisms received, the new directions indicated, the new friendships created, and the old ones confirmed. The Congress served as a much needed worldwide inventory of the 'state of the art' of nephrology with its related basic and clinical components. It demonstrated the rapidity with which progress has been made in this remarkable new field of medicine.

In the beginning neither President BERLINER nor myself was in favor of publishing a Proceedings. The lead time for preparing presentations for international congresses is usually so long that publications are often dated or repetitious of already published work. In the end our minds were changed, as they should be, by the evidence at hand: the quality and breadth of the symposium presentations which represented a remarkable cross-section of the entire range of nephrology and the only currently available inventory of the field of nephrology as of 1966. The dramatic advances in dialysis and transplantation were matched by equally important additions in the basic fund of knowledge in related physiology, morphology, bacteriology, pharmacology, and immunology. The challenge of the kidney had obviously been a stimulating force in clinical investigation in the three years since Prague. So we have proceeded with these Proceedings which contain all but one of the invited presentations which comprised the symposia at the Congress. We have divided them into three volumes, roughly designated as Physiology; Morphology, Immunology, Urology; and Clinical Nephrology. Those who were not able to attend the Congress and who have special interests may obtain the material of their choice from the publisher. For those who registered for the Congress, we hope that these three volumes will recall the happy and fruitful days of September, 1966.

For their work and cooperation we wish to express our sincere gratitude to the individual volume editors, Drs. JOSEPH S. HANDLER, ROBERT H. HEPTINSTALL, and E. LOVELL BECKER, to our Congress Manager, Mrs. HELENA B. LEMP, and to our publisher. Most of all,
we wish to thank the authors, who deserve the real credit for writing these Proceedings of the III International Congress of Nephrology.

GEORGE E. SCHREINER, M. D.
Secretary-General
Coordinating Editor

Index

III International Congress of Nephrology
Washington, D. C. 1966

Volume 2-Morphology, Immunology, Urology

I. Electron Microscopy

ERICSSON, J. L. E. (Stockholm):
Electron Microscopy of the Normal Tubule

KIMMELSTIEL, P.; OSAWA, G. (Oklahoma City, Okla.) and BÉRES, J. (Milwaukee, Wisc.):
Some Glomerular Changes by Electron Microscopy with Predominant Mesangial Reaction 17

SPARGO, B. H. and FORLAND, M. (Chicago, Ill.):
The Differential Diagnosis of Glomerular Ultrastructural Lesions 33

Electron Microscopy of the Glomerular Basement Membrane of the Rat Kidney 45

II. Congenital Anomalies

EKSTROM, T. (Eskilstuna); ENGFELDT, B. (Uppsala); LAGERGREN, C. and LINDVALL, N. (Stockholm):
Medullary Sponge Kidney 54

CULP, D. A. (Iowa City, Iowa):
Congenital Anomalies of the Ureter 65

EDWARDS, D. and SMITH, J. C. (London):
Congenital Anomalies of the Lower Urinary Tract Associated with Renal Disease 83

m. Experimental Renal Disease

DIXON, F. J. (La Jolla, Calif.):
The Pathogenesis of Immunologically Induced Nephritis 97

PFEIFFER, E. F. and FEDERLIN, K. (Frankfurt):
Experimental Chronic Glomerulonephritis. Role of Nephritogenic Cells and Circulating Kidney Fixing Antibodies in its Immunologic Mechanism. HEPTINSTALL, R. H. (Baltimore, Md.):

Experimental Pyelonephritis UEDA, Y.; SAKAI, O. and TAKASU, T. (Tokyo):
A Study on Experimental Pyelonephritis: Effect of E. coli Endotoxin in Chronic Pyelonephritis

IV. Immunology

HOWIE, J. B.; HELEYER, B. J.; CASEY, T. P. and AARONS, I. (Dunedin):
Renal Disease in Autoimmune Strains of Mice

HEYMANN, W. (Cleveland, Ohio):
Experimental Analogues of Human Nephropathies

Index XI

V. Renal Biopsy

KINCAID-SMITH, PRISCILLA (Melbourne, Vict.):
The Clinical Value of Renal Biopsy

Classification des glomerulo-nephrites en pratique biopsique

PIRANI, C. L. and POLLAK, V. E. (Chicago, Ill.):
Longitudinal Studies of Renal Biopsies

VI. Hereditary Nephropathies

DAVIES, H. E. F. (Cardiff):
Renal Tubular Acidosis

FETTERMAN, G. H.; FABRIZIO, NANCYS. and STUDNICKI, FRANCES M. (Pittsburgh, Pa.):
The Study by Microdissection of Structural Tubular Defects in Certain Examples of the Hereditary Nephropathies

ROYER, P.; HABIB, RENEE et LECLERC, FLORENCE (Paris):
L'hypoplasie renale bilaterale avec oligomeganephronie

VII. Toxic Nephropathy

Clinical Aspects and Pathology of Toxic Nephropathy

BENGTSSON, ULLA (Goteborg):
Analgesic Nephropathy-Chronic Pyelonephritis
An Epidemiological Study of Analgesic Abuse 300
GALLE, P. (Paris):  
Microanalyse des inclusions minerales dein 306

VIII. Obstructive Uropathy

RICHES, E. (London):  
Chairman's Opening Remarks 320
KIIL, F. and KJEKSHUS, J. (Oslo):  
The Physiology of the Ureter and Renal Pelvis 321
LEGRAIN, M. (Suresnes); BITKER, M. (Paris) and Kuss, R. (Suresnes):  
Obstructive Nephropathy in Adults.336
BOYCE, W. H. (Winston-Salem, N. C.):  
The Renal Tubule in the Genesis of Renal Calculi 354

XII Index

Volume 1-Physiology

I. Progress in Renal Physiology

MOREL, F. (Sceaux):  
Current Concepts in Renal Physiology 1

II. Electrolyte Transport in Isolated Membranes

LEAF, A. (Boston, Mass.):  
On the Functional Structure of the Transport System in the Toad Bladder 18
EDELMAN, I. S. and FIMOGNARI, GRACE M. (San Francisco, Calif.):  
Biochemistry of the Action of Aldosterone on Sodium Transport 27
Electrophysiological Studies on Single Nephrons 35

III. Renal Electrolyte Transport

ULLRICH, K. J. (Berlin-Dahlem):  
Renal Transport of Sodium 48
GIEBISCH, G.; KLOSE, RUTH M. (New York, N.Y.) and MALNIC, G. (Sao Paulo):  
Renal Tubular Potassium Transport 62
RECTOR, F. C. Jr.; CARTER, N. W. and SELDIN, D. W. (Dallas, Tex.):  
The Renal Transport of Hydrogen Ion 76
IV. Control of Sodium Excretion

WARDENER, H. E. DE (London):
The Effect of Intravenous Infusions on the Urinary Excretion of Sodium 86
GOTTschALK, C. W. and LASSITER, W. E. (Chapel Hill, N. C.):
A Review of Micropuncture Studies of Salt and Water Reabsorption in the Mammalian Nephron 99
LEYSSAC, P. P. and BOESEN, EGIL (Copenhagen):
Interdependence Between Glomerular Filtration and Tubular Reabsorption in the Process of Proximal Salt and Water Turover 110

V. Acid-Base Balance

BLACK, D. A. K. (Manchester):
Introductory Remarks 121
PITTS, R. F. and STONE, W. J. (New York, N.Y.):
Renal Metabolism and Excretion of Ammonia 123
RICHEt, G.; ARDAILLOU, R. et AMIEL, C. (Paris):
Les phospholipides, source alimentaire d’ions H+ 136
SCHWARTZ, W. B. (Boston, Mass.):
Role of Chloride in Acid-Base Balance 148
HASTINGS, A. BAIRD (La Jolla, Calif.):
Intracellular pH: Introductory Remarks 158

Index XIII

VI. Renal Circulation

THURAU, K. (Munich):
Nature of Autoregulation of Renal Blood Flow 162
BARGER, A. C. and HERD, J. A. (Boston, Mass.):
Study of Renal Circulation in the Unanesthetized Dog with Inert Gases:
Extern31 Counting 174
AUkLAND, K. (Oslo):
Study of Renal Circulation with Inert Gas; Measurements in Tissue 188

VII. Angiotensin and Aldosterone

Mechanisms Regulating Aldosterone Secretion During Sodium Deficiency 201
DAVIS, J.O.; JOHNSTON, c.l.; HARTROFT, P.M.; HOWARDS, S.S. and WRIGHT, F.S. (Columbia, Mo.):
The Phylogenetic and Physiologic Importance of the Renin-Angiotensin-Aldosterone System 215

Renin and Blood Pressure 226

VIII. Diuretics

SELDIN, D. W.; EKNOYAN, G.; SUKI, W. and RECTOR, F. C. Jr. (Dallas, Tex.):
The Physiology of Modern Diuretics 240

DEETJEN, P. (Munich):
Micropuncture Studies of Diuretics in Rats 250

Micropuncture Studies of Diuretics in Dogs 260

Effect of Mercurial Diuretics and Thiazide Diuretics on Electrolyte Transport and the ATPase of Renal Cortex 269

The Clinical Use of Diuretic Agents 278
