Introduction 1
PAUL KALLÓS, Helsingborg

Recent Developments in Immunofluorescence (with colour plates I and II) 9
W. PAGE FAULK, Geneva and W. HIIMANs, Rijswijk

I. Introduction 9
II. Fluorochromes, Antisera, and Conjugates 10
A. Fluorochromes 10
B. Antisera 11
C. Conjugates 13
III. Light Source and Filters 18
A. Light Source 18
B. Filters 20
IV. Illuminating Systems 27
A. Dark Field 27
B. Epiillumination 28
V. Quantitative Immunofluorescence 30

Cell-Cell Interactions in Antibody Production 40
H.N. CLAMAN, Denver, Col. and D.E. MosIER, Boston, Mass.

Introduction 41
I. In vivo Cell-Cell Interactions 42
A. General Background. Antibody Synthesis and the Role of the Thymus and of Phagocytic Cells 42
B. Early Experiments Showing a Requirement for More than One Cell in vivo 43
C. Characteristics of Co-Operating Thymus-Derived Cells 45
   1. Origin and Distribution 45
   2. Identification 46
   3. Reactivity 46
   4. Specificity 47
D. Characteristics of Co-Operating Marrow-Derived Cells 48
   1. Origin, Distribution and Identification 48
   2. Reactivity 48
   3. Specificity 49
   4. Co-Operating Cells in the Rabbit of Marrow Origin 49
E. The Carrier Effect 50
F. Synthesis of the Carrier Effect and the Two-Cell System 51
G. Role of the Macrophage in vivo 54
I1. In vitro Cell-Cell Interactions 56
   A. Early in vitro Experiments Suggesting Cell-Cell Co-Operation 56
      1. Antigen Processing 56
      2. Direct Macrophage-Lymphocyte Interaction 56
      3. Thymus Cell Co-Operation in vitro 56
   B. Techniques for Cell Culture 57
      1. Special Requirements 57
      2. Advantages and Limitations 58
C. Characteristics of Co-Operating Adherent Cells 58
   1. Requirement for Adherent Cells 59
   2. Are Adherent Cells Required for All Antigens ? 59
   3. Properties of Adherent Cells 60
      4. Adherent Cell Function 60
D. Characteristic of Co-Operating Non-Adherent Cells 61
   1. Requirement for Two Non-Adherent Co-Operating Cells 61
   2. Co-Operation of Non-Adherent Cell-Equivalent Populations 62
   3. Properties of Co-Operating Non-Adherent Cells 62
      a) Morphology 62
      b) Density 62
      c) Radiation Sensitivity 63
      d) Thymus Derivation 63
      e) Precursor Cells 64
      f) Site of Tolerance Induction 64
   4. Function of Co-Operating Non-Adherent Cells 64
E. Adherent-Non-Adherent Cell Co-Operation in vitro 64
F. Summary of the Evidence for Co-Operation of Three Cell Types in vitro 65
**Structure and Function of Immunoglobulin A**

T.B. Tomnsci, Buffalo, N.Y. and H.M. GREY, Denver, Col.
