Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

Contents

Preface ................................................................. 1

Action of Neurotransmitters and Hormones on the Developing Nervous System

Treatment in Behaviour and Brain Structures ...................... 11
Afferent Neurons ............................................ 29
Honegger, P. (Lausanne): Nerve Growth Factor-Sensitive Brain Neurons in Culture ............................................................ 36
Atterwill, C.K; Kingsbury, A.E.; Balazs, R. (London): Effect of Thyroid Hormone on Neural Development in vitro .................................. 50
Meisami, E. (Berkeley, Calif.): Postnatal Development of Spinal Cord in the Normal and Hypothyroid Rat .......................................... 62
Vaccari, A. (Genova): Effects of Dysthyroidism on Central Monoaminergic Neurotransmission ............................................... 78

Contents

Drugs in Brain Development

Richards, J.G. (Basel); Schlumpf, M.; Lichtensteiger, W (Zrich); Mhler, H. (Basel): Ontogeny of Benzodiazepine Binding Sites in Fetal Rat Brain: An in vitro Autoradiographic Study ............................................. 111
Shoemaker, W.J.; Baetge, G.; Azad, R.; Sapin V.; Bloom, F.E. (San Diego, Calif.): Effect of Prenatal Alcohol Exposure on Amine and Peptide Neurotransmitter Systems ................................................. 130
Taylor, A.N.; Branch, B.J.; Kokka, N.; Poland, R.E. (Los Angeles, Calif.): Neonatal and Long-Term Neuroendocrine Effects of Fetal Alcohol Exposure ....... 140
Slotkin, T.A. (Durham, N.C.): Effects of Perinatal Exposure to Methadone on Development of Neurotransmission: Biochemical Bases for Behavioral Alterations ............................................. 153
Zagon I.S.; McLaughlin, P.J. (Hershey, Pa.): Behavioral Effects of Prenatal Exposure to Opiates ................................................. 159

Maternal Environment and Central Neurotransmitters in the Early Organization of the Gonadal Axis
Ward, I.L. (Villanova, Pa.): Effects of Maternal Stress on the Sexual Behavior of Male Offspring ............................ 169
Herrenkohl, L.R. (Philadelphia, Pa.): Prenatal Stress May Alter Sexual Differentiation in Male and Female Offspring ......................... 176
Weisz, J. (Hershey, Pa.): Influence of Maternal Stress on the Developmental Pattern of the Steroidogenic Function in Leydig Cells and Steroid Aromatase Activity in the Brain of Rat Fetuses ......................... 184
Ward, O.B.; Jr.; Orth, J.M.; Weisz, J. (Villanova, Pa./Hershey, Pa.): A Possible Role of Opiates in Modifying Sexual Differentiation .............. 194
Piva, F.; Limonta, P.; Martini, L. (Milano): Brain Opioid Peptides and the Control of Prolactin Secretion: Neonatal Organization .............. 201
Stumpf, W.E.; Sar, M. (Chapel Hill, N.C.); Reisert, I.; Pilgrim Ch. (Ulm): Estrogen Receptor Sites in the Developing Central Nervous System and Their Relationships to Catecholamine Systems ...................... 205
Lichtensteiger, W; Schlumpf, M.; Davis, M.D. (Zrich): Catecholamines and Nicotine in Early Neuroendocrine Organization ..................... 213

Contents VII
