ISBN 3-8055-3704-2

Drug Dosage
The authors and publisher have exerted every effort to
ensure that drug selection and dosage set forth in this text
are in accord with current recommendations and practice
at the time of publication. However, in view of ongoing
research, changes in government regulations, and the
constant flow of information relating to drug therapy and
drug reactions, the reader is urged to check the package
insert for each drug for any change in indications and dosage
and for added warnings and precautions. This is particularly
important when the recommended agent is a new and/or infrequently employed drug.

Acknowledgments

The author would like to express his heartfelt thanks to Professor H. Obwegeser, the Director of the Clinic for Maxillo-Facial Surgery of the Zrich University Hospital, for the constant encouragement he has received from him over the years in carrying out his investigations in the field of oral pathology. Unless otherwise stated, all the X-rays and clinical pictures presented in this study have been provided by Professor Obwegeser, and the author is particularly grateful to him for having made them available.

The assistance provided by PD Dr. H. Sailer, from the same Clinic, in discussing a number of clinical questions arising from the case histories used here is also greatly appreciated.

Special thanks must go to Bettina Fest for her tireless efforts in typing and retyping the numerous German and English drafts of this book. Her spirit of cheerful and unflagging cooperation and the meticulous care with which she has worked have been invaluable.

Although the author photographed the histological material presented here himself, he is deeply indebted to Hannes Naef a photographer at the Institute for Pathology of the Zrich University Hospital, not only for his expert technical advice, but also for the dispatch with which he developed and printed the illustrative material presented here.

The author’s special appreciation is gladly tendered to Nicholas MacCabe, who translated the original German manuscript into English. That the author’s ideas and arguments have been faithfully and accurately presented is due not only to Mr. MacCabe’s
extensive knowledge of both the languages, but also to the interest and enthusiasm he has shown in his work, his grasp of the arguments put forward and the cooperative spirit he has shown in discussing every aspect of this book.

Finally, the author would like to thank his publishers for their amiable, helpful and professional approach to the preparation of this book.
