Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text
are in accord with current recommendations and practice at the time of publication. However, in view of ongoing
research, changes in government regulations, and the constant flow of information relating to drug therapy and drug
reactions, the reader is urged to check the package insert for each drug for any change in
indications and dosage and
for added warnings and precautions. This is particularly important when the recommended agent
is a new and/or
infrequently employed drug.

Acknowledgements

This book represents the proceedings of the symposium held in Terre Haute (Indiana) on September 25, 1982. Generous financial assistance for this symposium was provided by the following organizations: International Minerals and Chemical Corporation; The UpJohn Company; Merck Sharp & Dohme; Bayer AG/Cutter/Miles; and Sandoz Pharmaceuticals. The editors express their appreciation to the publisher for continued cooperation and understanding during the preparation of this monograph. The help of Mrs. Alma Crowthers in providing secretarial assistance is gratefully acknowledged. The assistance of Mr. Cesare Bernardini (UpJohn) is also gratefully acknowledged.
