Progress in Respiration Research

National Library of Medicine, Cataloging in Publication
International Symposium on Pulmonary Circulation (4th: 1984: Prague, Czechoslovakia)
Pulmonary circulation in chronic lung disease: experimental and clinical approach/
International Symposium on Pulmonary Circulation IV, Prague, July 4-6, 1984;
(Progress in respiration research; vol. 20)
Includes index.
1. Lung Diseases - physiopathology - congresses 2. Pulmonary Circulation - congresses
I. Widimsky, Jiri II. Herget, J. (Jan) III. Mlczo, J. (Johann) IV. Title V. Series
Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
