This publication is listed in bibliographic services, including Current Contents and Index Medicus.

Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

I wish to acknowledge several people who had a hand in the creation of this monograph. Long-time friend, Theodore R. Miller, MD, not only sold me his sailboat, but more importantly and pertinently, sold me on the idea of fine needle aspiration in children. My associate, Stewart E. Wolfson, MD, provided ready consultation in the technique and interpretation of fine needle aspirations. While most of the cases in this book are derived from the files of Kosair Children’s Hospital, I wish to thank those who generously allowed me to access their cases: Joseph J. Buchino, MD, Blaise E. Favara, MD, Ron Jaffe, MD, James E. Dimmick, MD, Donald Kmetz, MD, Susanne R. Taylor, MD, Paul E. Wakely, Jr., MD and Mohini Warick, CT (ASCP).

I am particularly grateful to my colleague Oraib Yacoub, MD for her help and understanding during the preparation of this manuscript. Special thanks to Carole Vogler, MD and Douglas Ackerman, MD for their critical review and helpful suggestions. Mr. Michael Eisenback and Ms. Barbara Beckman were responsible for developing and printing the many illustrations. Sharon Corder and Andrea Spalding typed the many revisions and still managed to smile. I also thank George Wied and S. Karger publishers for their patience.

Finally, I have enjoyed a great deal of support from my family - Kathie, Susan, Mary Elizabeth, Louis, Michael, and Nancy.
