Heat-Shock Proteins and Gamma-Delta T Cells

Chemical Immunology

Vol. 53

Series Editors
Frank W. Fitch, Chicago, Ill.
Kimishige Ishizaka, La Jolla, Calif.
Peter J. Lachmann, Cambridge
Byron H. Waksman, New York, N.Y.

KARGER

Heat-Shock Proteins and
Gamma-Delta T Cells

Volume Editor
Celia F. Brosnan, New York, N.Y.

8 figures and 14 tables, 1992

Bibliographic Indices
This publication is listed in bibliographic services, including Current Contents and Index Medicus.

Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the
constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

Contents

Heat-Shock Proteins and Immunopathology. An Overview
Aquino, D.A.; Brosnan, C.F. (Bronx, N Y) .................. 1

Stress Proteins .................. 1
Regulation of the Stress Response .................. 2
Putative Functions .................. 3
Immune Response .................. 5
Immunopathology .................. 6
References .................. 12

Introduction .................. 17
Characteristics of the ?? T Cell Lineage .................. 18
Characteristics and Expression of Vy1.1Cy4 in Normal and Transgenic Mice . 20
Self Reactivity of Intraepithelial Lymphocytes (IELS) from Vy1.1Cy4 Transgenic Mice .................. 22
Reactivity of ly1.1Cy4+ Newborn Thymocytes and Dendritic Epidermal Cells (DEC) .................. 24
Discussion .................. 25
Mycobacterial PPD and HSPs Can Be Ligands for ?? Cells .................. 25
Hypothesis for Role of Self-Reactive ?? Lymphocytes .................. 26
Autoimmune Implications .......................... 28
References .......................... 28

Contents VI

Cytokine Production by T Lymphocytes Bearing the Gamma-Delta T Cell Antigen Receptor
Christmas, S.E. (Liverpool) ....................... 32

Introduction .......................... 32
Cytokine Production by ?? T Cells .............. 33
Interleukin-2 Production by ?? T Cells .......... 34
Production of Other Interleukins ............... 36
Production of Hematopoietic Growth Factors ........ 36
Production of Interferon and Tumor Necrosis Factor .......................... 37
Clonal Heterogeneity in Cytokine Production ......... 37
Involvement of ?? T Cells in Disease Processes .... 39
Conclusions .......................... 40
References .......................... 41

Stress Protein Autoantibodies and the Expression of Stress Proteins on the Surface of Human Gamma-Delta Cells and Other Cells of the Immune System
Winfield, J.; Jarjour, W.; Minota, S. (Chapel Hill, N.C.) ....................... 47

Introduction .......................... 47
Antibodies to Microbial Stress Proteins .......... 48
Autoantibodies to Stress Proteins ............... 49
Cell-Surface Expression of Stress Proteins ......... 51
Expression of Large Stress Proteins on T Cells ........ 51
Expression of Large Stress Protein on B Cells and Phagocytic Cells ............... 52
Surface Expression of a groEL-Related Molecule on Human ?? T Cells .... 52
Mechanism for Expression of Stress Proteins on Cell Surfaces ............... 54
Conclusion .......................... 55
References .......................... 56

T Lymphocytes Bearing Gamma-Delta Antigen Receptors in Skin
Modlin, R.L.; Lewis, J.; Uyemura, K.; Tigelaar, R.E.
(Los Angeles, Calif./New Haven, Conn.) ....................... 61

Skin-Associated Lymphoid Tissue .................... 61
?? DETC in Normal Murine Skin ..................... 62
DETC Respond to Stressed Epidermal Cells ................. 63
DETC in Sites of Contact Dermatitis ...................... 65
?? T Cells in Normal Human Skin ....................... 65
Leprosy as a Model for Studying T Cell Subsets in Response to Infection .... 66
Role of ?? T Cells in Skin Lesions of Infectious Etiology ................. 67

Contents VII

Diversity of the ?? T Cell Receptor Repertoire in Leprosy Lesions ...... 68
Human vs. Murine Skin ?? T Cells ......................... 69
Acknowledgements ..................................... 70
References ........................................... 70

The Role of Gamma-Delta T Lymphocytes in Inflammatory Muscle Disease
Hohlfeld, R. (Munich/Martinsried); Engel, A.G. (Rochester, Minn.) ...... 75
Isolation and Phenotypic Characterization of T Cell Lines from Muscle .... 77
Immunolocalization of Gamma-Delta T Cells and Heat-Shock Protein in Muscle 81
Summary and Conclusions ............................... 83
References ........................................... 84

Heat-Shock Proteins and Gamma-Delta T Cell Responses in the Central Nervous System
Aquino, D.A. (Bronx, N.Y.); Selmaj, K. (Lodz) ...................... 86
Expression of HSP70 in the Central Nervous System ...................... 86
Experimental Autoimmune Encephalomyelitis and the Stress Response ................. 87
Relationship of HSP Expression in the C'S and Gamma-Delta T Lymphocytes . 91
Analysis of TCR Gamma-Delta Cells in Culture ....................... 93
Derivation of TCR Gamma-Delta Clones from PBMC of MS Patients ............. 94
Heat-Shock Protein Expression in MS .......................... 95
HSP65 Expression by Oligodendrocytes in vitro ..................... 96
Conclusion .......................................... 97
References ........................................... 101

Gamma-Delta T Cells in Patients with Primary Immunodeficiency Syndrome: Their Function and a Possible Role in the Pathogenesis
Morio, T.; Nagasawa, M.; Yata, J. (Tokyo) ......................... 102

Introduction ........................................ 102
?? T Cells in Humans ................................. 103
T Cells Are Increased in the PBL of Patients with Primary Immunodeficiency Syndrome .......... 104
Wiskott-Aldrich Syndrome ........................................ 105
Ataxia Telangiectasia ............................................. 107
Severe Combined Immunodeficiency ........................................... 108
DiGeorge Syndrome .................................................. 110
Chediak-Higashi Syndrome ............................................. 110
Other Diseases ....................................................... 111

Contents VIII

T Cell Expansion under Athymic or Hypothymic States ...................... 113
Infections and ?? T Cell Expansion in Primary Immunodeficient Patients .... 114
Viral Infection ....................................................... 114
Mycobacterial and Bacterial Infection ...................................... 115
Heat-Shock Protein and T Cells in Primary Immunodeficiency Syndrome .... 116
Autoimmunity and T Cells in Primary Immunodeficiency Syndrome ......... 116
Conclusion ............................................................ 117
References ............................................................ 118

Murine ?? T Lymphocyte Recognition of HSP-60: A Possible Source for Bacterial Immunity or Autoimmunity
Reardon, C.L.; Born, W.; O'Brien, R.L. (Denver, Colo.) ............. 121

Introduction .......................................................... 121
HSP-60 Reactive ?? T Cells ............................................. 122
HSP Recognition by Other ?? T Cells .................................... 124
TCR Usage by HSP-60 Reactive ?? Cells .................................. 124
Distribution of HSP-60 Reactive ?? T Cells ................................. 125
Summary and Implications ................................................. 126
References ............................................................ 126

Subject Index ......................................................... 129
