Regulation and Functional Significance of T-Cell Subsets
Chemical Immunology
Vol. 54
Series Editors
Frank W. Fitch, Chicago, Ill.
Kimishige Ishizaka, La Jolla, Calif.
Peter J. Lachmann, Cambridge
Byron H. Waksman, New York, N.Y.

Chemical Immunology
Formerly published as ‘Progress in Allergy’
Founded 1939 by Paul Kallós
Bibliographic Indices
This publication is listed in bibliographic services, including Current Contents® and Index Medicus.
Drug Dosage
The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.

Contents
Programming of Lymphocyte Responses to Activation:
in the Lewis Rat 61
The Role of CD4+ and CD8+ Cells in the Pathogenesis of EAE 62
CD4+ T Cells 62
CD8+ T Cells 63
The Spontaneous Recovery Phase of EAE in Lewis Rats 64
The Importance of Genetic Variation in the Stress Response 65
The Time Period in EAE for Which the Adrenal Glands Play Their Essential
Regulatory Role 65
The Refractory Phase of EAE 66
Suppression not Anergy 66
Nature of the Suppressive Mechanism 66
Prevention of EAE by Targeting the Encephalitogenic Peptide to B Cells 67
Acknowledgements 68
References 68
Postthymic Differentiation of CD4 T Lymphocytes:
Naive Versus Memory Subsets and Further Specialization
among Memory Cells
Horgan, K.J.; Tanaka, Y.; Shaw, S. (Bethesda, Md.) 72
Introduction 72
Naive and Memory Cells 73
Complexity Beneath the Surface 76
Naive and Memory Cells; Phenotype and Function 78
What Is the Biochemical Basis of the Differential Responsiveness9 81
Contents VII
Tissue Localization 83
What Are the Recirculation Patterns and Sites of Activation of Naive Cells? 84
Disease States 85
CD8 Naive and Memory Cells 86
Further Specialization among Memory Cells 87
How Do We Interpret the Foregoing Results? 88
Acknowledgements 92
References 92
Murine CD4+ T- Cell Subsets Generated by Antigen-Independent
and Dependent Mechanisms
Introduction 103
Murine CD4+ T- Cell Subsets in the Thymus and Periphery Defined by 6C10 and
3G11 Expression 104
Cell Differentiation and Cell Surface Molecule Expression: Antigen-Independent
Progression in the Thymus and Periphery 106
Thymus 106
Spleen 107
Presence of Cell Subsets in the Thymus and Periphery with Unique Cell Surface Phenotype and Cytokine Profiles 108
3G11- Cells in the Thymus (Mth4) 108
3G11- Cells in Periphery (Fr. III and IV) 109
3G11- Cell Subsets (Thyl, Fr. III and IV) Are Generated by Antigenic Selection 110
Higher Endogenous Gene Usage by the 3G11- Cell Subsets of TCR Chain Transgenic Mice 111
Summary: CD4+ Subsets in Relation to the Cell Differentiation and Maturation Pathways 112
Epilogue 114
Acknowledgments 114
References 114
Induction, Regulation and Function of T-Cell Subsets in Leishmaniasis
Liew, F.Y. (Glasgow)
Heterogeneity of CD4 T Cells 117
Leishmaniasis 119
Host-Protective Immune Response 120
Suppression of Host-Protective Immunity 122
Functional Relationship of Th1 and Th2 Cells 123
Preferential Induction of Th1 and Th2 Cells 125
Effector Mechanism of Th1 and Th2 Cells 126
References 129
Contents VIII
Biological Role of Helper T-Cell Subsets in Helminth Infections
King, C.I. (Cleveland, Ohio); Nutman, T.B. (Bethesda, Md.) 136
Introduction 136
Cytokine Regulation of the Immune Responses - IgE, Eosinophilia, and Mastocytosis 137
IgE 137
Eosinophilia 138
Mastocytosis 139
Biological Role of CD4+ Subsets in Animal Models 140
Evidence for CD4+ Subsets in Humans 142
T-Cell Clones 142
T-Cell Clones without Defined Specificity 143
Direct Determination of Th Subsets by Immunoplaque Assays 148
Functional Significance CD4+ Subpopulations in Human Helminth Infections 150
Filariasis 150
Schistosomiasis 153
Mechanisms Involved in Determining Th Subset Differentiation 154
The Role of Antigen Structure 154
Antigen Presentation 155
