Cataract is responsible for the blip. Over 20 million people worldwide. Though operative treatment is possible, the need far outstrips current surgical capacity - less than one in five will be able to have surgery. Why cataract occurs, how frequently it occurs, and how its onset or progress might be checked are among the questions dealt with in this volume.

This publication contains papers presented at the 4th International Cataract Epidemiology Meeting held in Melbourne, Australia. The great variety of interesting material included reflects the wide range of interests of clinicians and researchers in this fascinating field. The volume concentrates on cataract pathogenesis and includes current methods for the classification of cataracts, study guidelines and the results of epidemiological studies. It is important reading for ophthalmologists and epidemiologists concerned with cataract.

KARGER
Printed in Switzerland
on acid-free paper by
Ophthalmologica

Submission: Only original papers written in English, French or German are considered and should be sent to:
S. Karger AG
Editorial Department Ophthalmologica
P.O. Box
CH-4009 Basel (Switzerland)

Manuscripts should be submitted fourfold (with three sets of illustrations of which one is an original), typewritten double-spaced on one side of the paper, with a wide margin.

Conditions: All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Ophthalmologica and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the authors responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement
Title page: The first page of each paper should indicate the title (main title underlined), the authors names, and the institute where the work was conducted. A short title for use as running head as well as the full address of the author to whom correspondence should be sent are also required.

Full address: The exact postal address complete with postal code must be given at the bottom of the title page. Please also supply Phone, Fax, and E-mail numbers.

Key words: For indexing purposes, a list of 3-10 key words in English is essential.

Abstract: Each paper needs an abstract in English of
up to 10 lines.

Summary: Papers written in either French or German must be accompanied by a summary in the same language of not more than 10 lines.

Small type: Paragraphs which can or must be set in smaller type (case histories, test methods, etc.) should be indicated with a p (petit) in the margin on the left-hand side.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 181 x 223 mm) or provide crop marks. On the back of each illustration, indicate its number, the authors name, and top with a soft pencil.

Color illustrations: Up to 6 color illustrations per page can now be integrated with the text at the reduced price of CHF 600.- /DEM 660.- /USD 545.00 per page. Color illustrations are reproduced at the authors expense.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as unpublished data and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Cite all authors, et al is not sufficient. Abbreviate journal names according
to the Index Medicus system. (Also see
International Committee of Medical Journal Editors:
Uniform requirements for manuscripts submitted
to biomedical journals. Br Med J 1988;
296: 401-405.)

Examples
(a) Papers published in periodicals. Kauffman HF,
van der Heide S, Beaumont F, Blok H, de Vries K:
Class-specific antibody determination against Aspergillus
fumigatus by means of the enzyme-linked
immunosorbent assay. III. Comparative study: IgG,
gA, IgI ELISA titers, precipitating antibodies and
IgE binding after fractionation of the antigen. Int
(b) Monographs: Matthews DE, Farewell VT: Using
and Understanding Medical Statistics. Basel, Karger,
1985.
(c) Edited books: Hardy WD Jr, Essex M: FeLV-induced
feline acquired immune deficiency syndrome:
A model for human AIDS; in Klein E (ed):
Acquired Immunodeficiency Syndrome. Prog Allergy.

Further details: Authors may consult our leaflet
Rules for the Preparation of Manuscripts, available
on request from the Publisher, S. Karger AG,
P.O. Box, CH-4009 Basel (Switzerland).

Page charges: There is no page charge for papers of
3 or fewer printed pages (including tables, illustrations
and references). Each additional complete or
partial page is charged to the author at CHF 245.-/DEM
290.- /USD 196.00. The allotted size of a
paper is equal to approx. 8 manuscript pages (including
tables, illustrations and references).

Galley proofs: Unless indicated otherwise, galley
proofs are sent to the first-named author and should
be returned to the publisher with the least possible
delay. Alterations made in galley proofs, other than
the correction of printers errors, are charged to the
author. No page proofs are supplied.

Reprints: Order forms and a price list are sent with
the galley proofs. Orders submitted after the issue is
printed are subject to considerably higher prices.
Allow five weeks from date of publication for delivery of reprints.

Drug Dosage

The authors and the publisher have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy and drug reactions, the reader is urged to check the package insert for each drug for any change in indications and dosage and for added warnings and precautions. This is particularly important when the recommended agent is a new and/or infrequently employed drug.
