Original Papers

241 Prediction of Respiratory Outcome in Extremely Low Gestational Age Infants

249 Ketamine Attenuates the ACTH Response to Hypoxia in Late-Gestation Ovine Fetus
Chang, E.I.; Wood, C.E. (Gainesville, Fla.)

258 Perfusion Index in Preterm Infants during the First 3 Days of Life: Reference Values and Relation with Clinical Variables
Alderliesten, T.; Lemmers, P.M.A.; Baerts, W.; Groenendaal, F.; van Bel, F. (Utrecht)

271 Cost Savings of Human Milk as a Strategy to Reduce the Incidence of Necrotizing Enterocolitis in Very Low Birth Weight Infants
Johnson, T.J.; Patel, A.L.; Bigger, H.R.; Engstrom, J.L.; Meier, P.P. (Chicago, Ill.)

277 Lung Deposition of Nebulized Surfactant in Newborn Piglets
Linner, R.; Perez-de-Sa, V.; Cunha-Goncalves, D. (Lund)

283 Using Measurements of Shunt and Ventilation-to-Perfusion Ratio to Quantify the Severity of Bronchopulmonary Dysplasia
Dassios, T.; Curley, A.; Morley, C.; Ross-Russell, R. (Cambridge)

289 Neuro-Imaging Findings in Infants with Congenital Cytomegalovirus Infection: Relation to Trimester of Infection

297 Infant Arterial Stiffness and Maternal Iron Status in Pregnancy: A UK Birth Cohort (Baby VIP Study)
Alwan, N.A.; Cade, J.E. (Leeds); Mc Ardle, H.J. (Aberdeen); Greenwood, D.C. (Leeds); Hayes, H.E. (Aberdeen); Ciantar, E.; Simpson, N.A.B. (Leeds)

304 CXCR4 Blockade Attenuates Hyperoxia-Induced Lung Injury in Neonatal Rats

Short Communication

266 Phase Changing Material: An Alternative Method for Cooling Babies with Hypoxic Ischaemic Encephalopathy
Thomas, N.; Chakrapani, Y.; Rebekah, G.; Kareti, K.; Devasahayam, S. (Vellore)

(Continued on inside front cover)
Letters to the Editor

256 Adequate Timely Treatment of Patent Ductus Arteriosus in Extremely Low Birth Weight Infants: An Ongoing Challenge
Meyer, S. (Homburg)

312 Why Not Use a Surfactant Test for Respiratory Distress Syndrome?
Fiori, H.H.; Fiori, R.M. (Porto Alegre)

Reply

257 The Importance of Echocardiography and an Individual Approach to Patent Ductus Arteriosus Treatment in Extremely Preterm Infants
Gudmundsdottir, A.; Johansson, S. (Stockholm); Håkansson, S. (Umeå); Norman, M. (Stockholm); Källen, K. (Lund); Bonamy, A.-K. (Stockholm)

303 Erratum

321 A Unique Story in Neonatal Research: The Development of a Porcine Surfactant
Curstedt, T. (Stockholm); Halliday, H.L. (Belfast); Speer, C.P. (Würzburg)

330 Surfactant and Noninvasive Ventilation
Blennow, M.; Bohlin, K. (Stockholm)

337 Lungs, Microbes and the Developing Neonate
Warner, B.B. (St. Louis, Mo.); Hamvas, A. (St. Louis, Mo./Chicago, Ill.)

344 Impaired Pulmonary Vascular Development in Bronchopulmonary Dysplasia
Baker, C.D.; Abman, S.H. (Aurora, Colo.)

352 The Story of Antenatal Steroid Therapy before Preterm Birth
Hallman, M. (Oulu)

Extended Abstract

358 Inhalation or Instillation of Steroids for the Prevention of Bronchopulmonary Dysplasia
Bassler, D. (Zurich)

Reviews

360 Stem Cells for the Prevention of Neonatal Lung Disease
O’Reilly, M. (Edmonton, Alta.); Thébaud, B. (Ottawa, Ont.)

365 Delivery Room Management of Term and Preterm Newly Born Infants
Saugstad, O.D. (Oslo)

372 Abstracts

384 Author Index Vol. 107, 2015

after 386 Contents Vol. 107, 2015
Neonatology

Fetal and Neonatal Research

Neonatology

Aims and Scope
This highly respected and frequently cited journal is a prime source of information in the area of fetal and neonatal physiology, biochemistry and pharmacology in fetal and neonatal life. Papers reporting results of animal studies should be based upon hypotheses that relate to developmental processes or disorders in the human fetus or neonate.

Submission
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/neo
Should you experience any problems with your submission, please contact:
neo@karger.com
S. Karger AG
Editorial Office ‘Neonatology’
P.O. Box
CH–4009 Basel (Switzerland)
All manuscripts must be accompanied by a cover letter and the copyright transfer statement with all authors’ signatures (handwritten) confirming that they agree with the publication of the paper. Names, postal and e-mail addresses of four international experts in the appropriate area of research should accompany each manuscript. Selected scientists (s) will be invited to act as referee(s). Referees suggested should not be from the same institution as the author and should have expert knowledge of the subject.

Manuscripts may be submitted to the following sections:
• Editorials
• Reviews
• Systematic Reviews and Meta-Analyses
• Original Papers
• Consensus Statements
• Short Communications
• Novel Insights from Clinical Practice
• Commentaries
• Research Briefings
• Sources of Neonatal Medicine
• Letters to the Editor

Reviews/Systematic Reviews and Meta-Analyses
Most reviews are submitted upon invitation. However, the editors are open to unsolicited reviews. Authors planning such a review are requested to contact the Editorial Office with a one page outline of the intended review.

All reviews are subject to peer review. Systematic reviews should be reported using the format of the Cochrane Neonatal Review Group (www.neonatal.cochrane.org/welcome).

Original Papers
Original articles should not exceed a printed length of five pages, i.e. generally not more than 2,500 words of text accompanied by not more than 4–6 figures or tables as well as approx. 25 references.

Original Papers – Clinical Trials
Reports of randomised clinical trials should conform with CONSORT guidelines (www.consort-statement.org/consort-statement).

Short Communications
Short reports, brief laboratory observations, and preliminary communications, can be submitted for accelerated publication under ‘Short Communications’. To qualify for rapid publication, such reports should not exceed a printed length of two pages, i.e. generally not more than 1,400 words of text accompanied by 2 figures or tables and less than 5 to 10 references.

Novel Insights from Clinical Practice
(formerly Case Reports)
The publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on ‘Established Facts’ (what is already known) and ‘Novel Insights’ (what new information has been gained) are required and should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation. The manuscript should be presented with an abstract (structured, max. 150 words), followed by introduction, case report and discussion. Maximum 2 figures or 2 tables or 1 figure and 1 table.

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Neonatology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflict of Interest: All forms of support, including that from drug companies, and any potential source of conflict of interest should be acknowledged in the cover letter to the editor when applicable. The statement will be printed at the end of the article.

Ethics: Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute’s committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Arrangement
Title page: The first page of each article should indicate the title, the author’s names, the institute where the work was conducted, and a short title for use as running head.

Line numbering: Lines should be numbered (1, 2, 3, etc.) and displayed in the left margin of the manuscript (line numbering can be added from the Page Setup or Format menu of word processing programs). The line numbering should be continuous throughout the entire manuscript (i.e., do not begin numbering from 1 again at the top of each page).

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract of up to 250 words. It should be structured as follows:

Background: What is the major motive that prompted the study?

Objectives: What is the purpose of the study?

Methods: How was the study done?

Results: Most important findings

Conclusions: Most important conclusions

Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figure legends should be supplied on a separate page. For technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 x 223 mm) or provide crop marks. Electronically submitted b/w halftone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text identify references by Arabic numerals [square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: AllFakh K, Anabrees J, Basler D: Probiotics reduce the risk of necrotizing enterocolitis in preterm infants: a meta-analysis. Neonatology DOI: 10.1159/000253684.

SI Units
SI units should be used. Listings of SI units may be found in the following publications:

Karger Gazette

125 YEARS
Karger Publishers

For over 40 years the Karger Gazette has been distributed to a growing audience worldwide. Published in newspaper format, it highlights advances in biomedicine and clinical practice, introduces personalities, portrays research institutes and chronicles milestones in the history of Karger Publishers in a lively and readable style.

The new anniversary issue celebrates Karger’s 125 years as a medical publisher. It explores the STM publishing business in the digital age, offers short portraits of Karger’s journal and book series editors, and includes interviews with three renowned scientists who talk about their careers and how they define progress.

Neonatal medicine has gone through a remarkable development through research. But, does this translate into clinical practice?

The vision for EBNEO (https://ebneo.org) is that care of all newborn infants should be based on best available evidence.

The purpose of this conference is to disseminate evidence-based neonatal medicine and to create a platform for communication between leading experts and professionals in the field of Neonatology.

This year’s conference is being hosted by The Children’s Hospital of Philadelphia.

Register today at: www.chop.edu/cme

Topics Include

- Making sense of ‘GRADE’: what to do when there is no randomized trial
- Evidence based methods of facilitating extubation
- Antenatal steroids – evidence limits to contemporary clinical practice
- Antenatal corticosteroids: where we have been and where we are going?
- What we have learned from the Swedish databases of outcomes of ELBW infants
- An evidence based approach to tracheostomy for the chronically ventilated newborn
- Why should we implement early intervention in newborns?
- Improving value in neonatal care through economic evaluations alongside RCTs
- Transitions to an extra-uterine environment - good and bad
- Making sense of the recent saturation targeting trials in extremely preterm infants
- Late and moderate prematurity: evidence to guide practice
- Is an evidence base for neonatal ethics possible and what does it look like?
- The composite outcome dilemma in newborn medicine
- What do we know about the molecular epidemiology of BPD?
- New wrinkles on meta-analysis
- An evidence based approach to probiotics in newborns

Karger Publishers – 125 Years of Experience in Medical and Scientific Publishing

Karger Publishers – independent, family-run and Swiss-based.

It is our goal to serve the global scientific community with innovative and outstanding publications in all fields of medical science. This means dedication to maintaining the highest standards of quality, as well as personalized service for authors, editors and readers.

Please order a free copy of the Karger Festschrift ‘Connecting the World of Biomedical Science’ by sending your address to 125years@karger.com.
There is no other time in life when the provision of adequate and balanced nutrition is of greater importance than during infancy and childhood. During this dynamic phase characterized by rapid growth, development and developmental plasticity, a sufficient amount and appropriate composition of nutrients both in health and disease are of key importance for growth, functional outcomes such as healthy development and immune response, and the metabolic programming of long-term health and well-being.

This compact reference text provides concise information to readers who seek quick guidance on practical issues in the nutrition of infants, children and adolescents. After the success of the first edition, which sold more than 50,000 copies in several languages, the editors prepared this thoroughly revised and updated second edition which focuses again on nutritional challenges in both affluent and poor populations around the world. Serving as a practical reference guide, this book will contribute to further improving the quality of feeding of healthy infants and children, as well as enhancing the standards of nutritional care in sick children.

Selected Contents

- List of Contributors
- Preface

**Specific Aspects of Childhood Nutrition**

- Child Growth: Kim F. Michaelsen
- Nutritional Assessment
- Nutritional Needs
- Early Nutrition and Long-Term Health: Berthold Koletzko
- Gut Microbiota in Infants: Akihito Endo, Mimi L.K. Tang, Seppo Salminen

**Nutrition of Healthy Infants, Children and Adolescents**

- Breastfeeding: Kim F. Michaelsen
- Marketing of Breast Milk Substitutes: Neelam Kler, Naveen Gupta, Anup Thakur
- Complementary Foods: Mary Fewtrell
- Allergy Prevention through Early Nutrition: Sibylle Koletzko
- Nutrition in Pregnancy and Lactation: Lenka Malek, Maria Makrides
- Vegetarian Diets: Claire T. McEvoy, Jayne V. Woodside

**Nutritional Challenges in Special Conditions and Diseases**

- Primary and Secondary Malnutrition: Lubaba Shahrin, Mohammad Jobayer Chisti, Tahmeed Ahmed
- Micronutrient Deficiencies in Children: Ali Faisal Saleem, Zulfiqar A. Bhutta
- Management of Child and Adolescent Obesity: Louise A. Baur
- Reducing the Burden of Acute and Prolonged Childhood Diarrhea: Jai K. Das, Zulfiqar A. Bhutta
- Nutritional Management in Cholestatic Liver Disease: Bram P. Raphael
- Malabsorptive Disorders and Short Bowel Syndrome: Olivier Goulet
- Celiac Disease: Riccardo Troncone, Marco Sarno
- Food Intolerance and Allergy: Ralf G. Heine
- Regurgitation and Gastroesophageal Reflux: Noam Zevit, Raanan Shamir
- Preterm and Low-Birth-Weight Infants: Ekhard E. Ziegler
- Nutritional Management of Diabetes in Childhood: Carmel Smart
- Nutrition in Cystic Fibrosis: Michael Wilschanski
- Nutritional Management in Children with Chronic Kidney Disease: Lesley Rees
- Haematology-Oncology: John W.L. Puntis

**Annexes**

- The WHO Child Growth Standards: Mercedes de Onis, John W.L. Puntis
- The CDC and Euro Growth Charts: Ekhard E. Ziegler
- Reference Nutrient Intakes of Infants, Children and Adolescents: Berthold Koletzko, Katharina Dokoupil
- Feeding My Baby – Advice for Families: Berthold Koletzko, Katharina Dokoupil
