Frailty in Aging: Biological, Clinical and Social Implications

Editors
Olga Theou
Kenneth Rockwood

Frailty represents an important challenge for aging populations. As a concept it is full of known unknowns’ such as which mechanisms lead to frailty and how it is best managed. In order to examine these circumstances, the new science of understanding and managing frailty requires an appropriate framing of the problem. This publication investigates the biology and management of frailty and its social aspects. It considers these and related questions: How can we recognize frailty? How does an understanding of frailty increase our comprehension of the aging process? What are its implications for health care systems, including primary care, hospitals and rehabilitation? How will a growing number of frail older adults affect society more generally? The book focuses on frailty as a state of vulnerability, which is related to aging, but which can occur across the life course, and aims to improve the life of frail people and those around them.

The book is highly recommended to researchers in aging, health science researchers, health care professionals and anyone interested in the understanding of the aging process.

Contents

Introduction: Rockwood, K.; Theou, O.

The Biology of Frailty
• Frailty: Scaling from Cellular Deficit Accumulation? Rockwood, K.; Mitnitski, A.; Howlett, S.E.
• Assessment of Frailty in Animal Models: Howlett, S.E.
• Sex Differences in Frailty: Hubbard, R.E.
• Frailty and the Microbiome: Meehan, C.J.; Langille, M.G.I.; Beiko, R.G.

Evaluation and Management of Frailty
• Operationalizing Frailty Using the Frailty Phenotype and Deficit Accumulation Approaches: Theou, O.; Walston, J.; Rockwood, K.
• Comparison and Clinical Applications of the Frailty Phenotype and Frailty Index Approaches: Theou, O.; Rockwood, K.
• Frailty in Primary Care: Romero-Ortuno, R.
• Hospital Care for Frail Elderly Adults: From Specialized Geriatric Units to Hospital-Wide Interventions: Bakker, F.C.; Olde Rikkert, M.G.M.
• Frailty and Mobility: Eeles, E.; Low Choy, N.
• Frailty and Interprofessional Collaboration: Briggs, M.C.E.; McElhaney, J.E.
• Frailty and Rehabilitation: Cameron, I.D.; Kurrle, S.E.
• End of Life Care in Frailty: Moorhouse, P.; Koller, K.; Mallery, L.

Social Aspects of Frailty
• Frailty and Organization of Health and Social Care: Clegg, A.; Young, J.
• Frailty’s Place in Ethics and Law: Some Thoughts on Equality, Autonomy and Limits and on Possibilities for Aging Citizens: McNally, M.; Lahey, W.
• Frailty and Social Vulnerability: Andrew, M.K.

Author Index / Subject Index

The easiest way to order: www.karger.com/intgg
Gerontology publishes manuscripts on all aspects of experimental, clinical, behavioural, regenerative and technological science research into the aging process. It accepts particularly high-quality, original papers in all disciplines of gerontological research.

The Experimental Section contains contributions from basic gerontological research. Papers submitted for the Clinical Section discuss aetiology, pathogenesis, prevention and treatment of diseases in old age from a gerontological rather than a geriatric viewpoint. Papers dealing with behavioural development and related topics are published in the Behavioural Science Section. An extra section covers research exploring basic aspects of regeneration in biological systems and regenerative medical approaches and deals with technological devices for the elderly.

Manuscripts may be submitted in the following categories:

- Mini-Review (invited)
- Systematic Review (invited)
- Original Paper
- Debate (invited)
- Viewpoint (invited)
- Short Communication
- Images in Gerontology
- Letter to the Editor

Authors should indicate the category they wish their article to be considered for. The Editor-in-Chief reserves the right to arrange the submitted manuscripts into one of the four sections.

Submission

Only original papers written in English are considered and should be submitted using the online submission website at: www.karger.com/ger

or, should you experience any problems with your submission, please contact the Editorial Office at:

gerontology@i-med.ac.at

Editorial Office 'Gerontology'

Georg Wick, MD

Laboratory of Autoimmunity

Innsbruck Medical University

Peter-Mayr-Strasse 1a

A-6020 Innsbruck

Austria

A statement signed by all authors saying that they agree with the publication of the paper should accompany the manuscript.

Original Papers (max. 6,000 words and 40 references) must describe new research results, not published or under consideration in another journal. All papers should be arranged with an Introduction, Methods, Results and Discussion. Abbreviations should be explained and limited to a minimum. All terms abbreviated in the text, abstract and in the figures must, on the first occasion, be given in full, followed by the abbreviation (e.g. electrocardiogram (ECG)). Any papers dealing partly or wholly, with basic science should include a few lines of description to any concept which may not be well known to some readers who are primarily practising clinicians.

Mini-Reviews (max. 4,000 words plus approx. 40 references) and occasionally Systematic Reviews are to be submitted exclusively upon solicitation by the Section Editors or by the Editors of special issues, via the Editor-in-Chief. They are not subject to page charges. The Debate and Viewpoint categories publish arguments, critical statements and theoretical papers reflecting the authors’ personal views on mechanisms of the aging process in all areas within the scope of Gerontology. Manuscripts are to be submitted exclusively upon solicitation by the Section Editors, via the Editor-in-Chief, and be limited to 4,000 words and 40 references.

Short Communications (max. 2,000 words plus approx. 10 references) must contain data derived from front-edge research and be of potential interest to a large fraction of the readership.

Letters to the Editor (max. 1,000 words plus approx. 10 references) are encouraged if they directly concern articles previously published in this journal and clinical subjects related to the matters discussed. In exceptional cases, they may also address data published in another journal. The editor reserves the right to submit copies of such letters to the authors of the articles concerned prior to publication in order to permit them to respond in the same issue of the journal. Letters on general scientific or medical subjects in gerontology are also welcome.

Conditions

Only manuscripts that conform with the Guidelines for Authors will be considered.

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication or have not already been published. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Gerontology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflict of Interest

All forms of funding and support, including that from companies, and any potential competing financial interests should be acknowledged in the cover letter to the editor. The statement has to be listed at the end of the article.

Ethical Requirements

Appropriate proof has to be provided that all ethical prerequisites have been fulfilled. These include permission granted by responsible Ethical Committees and informed consent of participants in studies on human subjects, as well as permission obtained from Review Boards for animal experiments.

Arrangement

Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as a running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper (no abbreviations).

All articles require an abstract, which should be structured as follows:

Background: What prompted the study?

Objective: What is the purpose of the study?

Methods: How was the study carried out?

Results: What are the most important findings?

Conclusion: What is the most important contribution?

Abstracts for Mini-Reviews and Viewpoints do not have to be structured.

Abstracts should not exceed 350 words. Any abbreviations must be explained.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figure legends should be supplied on a separate page. For technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately.

Color illustrations

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: Identify references in the text with Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors. Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoprosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Author's Choice™
Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/policy.htm

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-referreeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copypasting and design improvements as well as citation links.

Page Charges
There are no page charges for papers of up to 4 printed pages (i.e., 12 typewritten pages at 33 lines per page, 65 strokes per line, including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00.

Proofs
Proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

E-pub First
All articles are published electronically ahead of print with a DOI number and are supplemented later with the definite reference of the printed version. The articles become available immediately after the authors’ approval to publication, with the added advantage of being citable much earlier than in print. Authors can influence the time of appearance by promptly returning the proofs.

Reprints
Order form and price list is sent with the PDF proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Medical Statistics has never been easier!

David E. Matthews • Vernon T. Farewell

Using and Understanding Medical Statistics
5th, revised and extended edition

The 5th edition of the highly successful handbook Using and Understanding Medical Statistics by David E. Matthews and Vernon T. Farewell has just been published. It presents the most extensive enhancement since it was first published 30 years ago and now includes online supplementary material. Not only does it provide an excellent introduction to medical statistics, but it is also an invaluable reference for every discerning reader of medical research literature.

See the journal website for contents
Although laboratory and clinical cancer research need to be closely linked, observations at the basic level often remain removed from medical applications. This journal works to accelerate the translation of experimental results into the clinic, and back again into the laboratory for further investigation. The fundamental purpose of this effort is to advance clinically-relevant knowledge of cancer, and improve the outcome of prevention, diagnosis and treatment of malignant disease. The journal publishes significant clinical studies from cancer programs around the world, along with important translational laboratory findings, mini-reviews (invited and submitted) and in-depth discussions of evolving and controversial topics in the oncology arena. A unique feature of the journal is a section which focuses on rapid peer-review and subsequent publication of short reports of phase 1 and phase 2 clinical cancer trials, with a goal of insuring that high-quality clinical cancer research quickly enters the public domain, regardless of the trial’s ultimate conclusions regarding efficacy or toxicity.
