All Karger titles digitized back to 1890

To mark the occasion of Karger Publishers’ 125th anniversary, all book titles from 1996 back to 1890 have been digitized, making the rich heritage of pioneering Karger publication available to today’s medical and scientific community.

The complete Karger eBook Archive Collection comprises three individual collections:
• Series
• Non-Series
• German

They can be purchased singly or in combination, and encompasses over 2,400 titles, including nearly 700 out-of-print titles, as well as numerous books not previously available in electronic format.

Complete your existing holdings or make sure your library has access to all Karger medical classics, past and present, with the Karger eBook Archive Collection.

For more information, please contact us at:
ebooks@karger.com
www.karger.com/collections/eBookArchive

Order before December 31, 2015 and take advantage of our special anniversary discount of 25%.

Samples of Karger eBook Archive Collection content are available at www.karger.com/collections/eBookArchive

Editorial Board

Arthur S. Aylsworth – University of North Carolina at Chapel Hill, Chapel Hill, USA
Armand Bottani – Geneva University Hospitals, Geneva, Switzerland
Han G. Brunner – Radboud University Nijmegen, Nijmegen, Netherlands
Christopher Cunniff – Weill Cornell Medical College, New York, USA
Hartmut Engels – University of Bonn, Bonn, Germany
Carl Ernst – Douglas Hospital Research Institute, Verdun, Canada
Peter Farlie – Royal Children’s Hospital, Parkville, Australia
Livia Garavelli – Maria Nuova Hospital, Reggio Emilia, Italy
Judith G. Hall – Childrens Hospital, Vancouver, Canada
Raoul Hennekam – University of Amsterdam, Amsterdam, Netherlands
Gunnar Høge – Haukeland University Hospital, Bergen, Norway
Kenjiro Kosaki – Keio University School of Medicine, Tokyo, Japan
Seema Lalani – Texas Childrens Hospital General, Houston, USA
Dimitry M. Niayzov – Ochsner Health Center for Children, New Orleans, USA
Jill Rosenfeld Mokry – Baylor College of Medicine, Houston, USA
Martin Poot – University Medical Center Utrecht, Utrecht, Netherlands
Stephen Robertson – University of Otago, Dunedin, New Zealand
Peter Scambler – University of London, London, UK
Anne Slavotinek – University of California, San Francisco, USA
Ben Solomon – National Institutes of Health, Bethesda, USA
Karen Temple – Princess Anne Hospital, Southampton, UK
Annick Toutain – Service de Génétique Médicale, Tours, France
Barbara Vona – University of Würzburg, Würzburg, Germany

Guidelines for Authors

Reviews: Comprehensive, state-of-the-art papers covering a timely topic by experts in the field. Reviews are usually invited by the Editor but may be unsolicited. Authors are asked to contact the Editor-in-Chief before submission in order to avoid clashes with other pending reviews. All reviews are subject to peer review. An unstructured abstract of no more than 250 words is required. (Maximum 6,000 words of text, plus tables/figures, references).

Short Reports: These papers must present new findings of sufficient importance and be of potential interest to a large fraction of the readership. They should follow the general arrangement of Original Articles and should represent complete, original studies. (Maximum 3,000 words of text including Abstract, plus a maximum of 2 figures, 1 table and 20 references).

Commentaries: A forum for observations, opinions, and comments outside the realm of conventional scientific papers on topics that will be of interest to the general readership. Original data, illustrations and tables may be included. (Maximum 1,000 words).

Novel Insights from Clinical Practice (formerly Case Reports): The journal only considers case reports that provide significant new insights into a syndromological problem. Submissions can be based around a single case or a number of similar cases. The most important aspect of the presentation is that it should provide a founded molecular insight on a recognized or entirely new genetic syndrome. The novel aspects of the case(s) may be in the phenotype and/or genotype, the presentation, and the investigation. The manuscript should contain an unstructured abstract (Maximum 150 words), introduction, case report and discussion. Boxes containing bullet points on established facts (what is already known) and novel insights (new information gained) are required on the first page of the report. These should highlight the novelty of the clinical observation.

Single topic issues

The journal also publishes a series of themed issues. For these volumes we solicit the assistance of one or more expert investigators to act as Guest Editor(s) in an area that is particularly interesting and/or one in which there is a need for a thorough overview. The Guest Editors invite top researchers to contrib-
Only original papers written in English and conforming to the ‘Guidelines for Authors’ must be considered for publication. They should be submitted using the online website at: www.karger.com/msy

Should you experience any problems with your online submission, please contact:
Claus Steinlein
Department of Human Genetics
University of Würzburg
Biozentrum, Am Hubland
D-38004 Würzburg (Germany)
Tel. (+49) 931 318 8091, Fax (+49) 931 318 4058
E-mail: claus.steinlein@biozentrum.uni-wuerzburg.de

All manuscripts are subject to editorial and peer review. Name and e-mail addresses of three experts in the appropriate area of research should accompany each manuscript. The referees suggested should not be from the same institution as the author(s) and are expected to have expert knowledge of the subject. The Editors reserve the right to appoint referees different from those suggested by the corresponding author. The Editors reserve the right to improve style and, if necessary, return the manuscript for rewriting to the authors.

Conflicts of Interest
Any financial (funding, stocks, patents, employment, honoraria, royalties) or non-financial (political, personal, professional) interests/relationships that may be interpreted to have influenced the authors’ work must be identified in a ‘Conflicts of Interest’ statement at the end of the manuscript. If there is no conflict of interest, please state ‘The authors declare no conflicts of interest.’

Ethics
Research must comply with the guidelines for human studies and animal welfare regulations. Manuscripts reporting studies on human subjects should include evidence that the research was ethically conducted in accordance with the World Medical Association Declaration of Helsinki. In particular, authors must state in a ‘Statement of Ethics’ at the end of the manuscript that the research was ethically conducted and all patients should be carefully consulted for reference list style. Agreement between text citations and the reference list should be checked carefully, and the latter checked for accuracy. If many errors are found, the manuscript will be returned for corrections which may cause considerable publication delay.

Gene Symbols
Human gene symbols: Only official gene symbols assigned by the HUGO Gene Nomenclature Committee (HGNC) are accepted. Authors must obtain or verify the official gene symbol of the gene(s) mapped and indicate that they have done so in the manuscript submitted. This can be accomplished for human genes by contacting HUGO Gene Nomenclature Committee (HGNC) European Bioinformatics Institute (EMBL-EBI) Wellcome Trust Genome Campus Hinxton, Cambridge, CB10 1SA, UK E-mail: hgnc@genenames.org Website: www.genenames.org Guidelines set forth by the HUGO Gene Nomenclature Committee are available at www.genenames.org/guidelines.html New symbols and names for genes can be requested electronically through the online gene symbol request form at http://www.genenames.org/cgi-bin/hgnic_request.pl Animal gene symbols: Authors submitting material on mouse and rat genetics should obtain correct genetic nomenclature before publication.

Lois Maltais
MGD Nomenclature Coordinator
The Jackson Laboratory
600 Main Street
Bar Harbor, ME 04609, USA
Tel. +1 207 288 6429
Fax +1 207 288 6132
E-Mail: nomen@informatics.jax.org

MGD home page: www.informatics.jax.org

Gene mapping data for the mouse should also be submitted to the Mouse Genome Database (MGD) following the guidelines at www.informatics.jax.org/mghome/submission/submit.shtml. The assigned MGD accession numbers should be included in the manuscript for publication. Assistance with submissions can be obtained by sending an e-mail to: submissions@informatics.jax.org

Electronic Proofs
Unless indicated otherwise, proofs are e-mailed to the corresponding author.

Color Charges
There are no charges for illustrations and color reproductions.

Page Charges
No page charges are levied.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, avi, mpg).

Author’s Choice
Karger’s Author’s Choice service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author's Choice service, we will send your article immediately upon publication, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/FAQ.htm#a1

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution's servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher's version, and must acknowledge the publisher's copyright. Authors selecting Karger's Author's Choice feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Reprints
Reprints are available against payment. Order forms listing prices are provided with the proofs. If no reprints are desired this should be indicated on the form. Orders submitted after the issue has gone to press are subject to higher prices.
Dear Librarian

I have reviewed this publication and would like to recommend it for our library.

Molecular Syndromology publishes high-quality research articles, short reports and reviews on common and rare genetic syndromes, aiming to increase clinical understanding through molecular insights. Topics of particular interest are the molecular basis of genetic syndromes, genotype-phenotype correlation, natural history, strategies in disease management and novel therapeutic approaches based on molecular findings. Research on model systems is also welcome, especially when it is obviously relevant to human genetics. With high-quality reviews on current topics the journal aims to facilitate translation of research findings to a clinical setting while also stimulating further research on clinically relevant questions. The journal targets not only medical geneticists and basic biomedical researchers, but also clinicians dealing with genetic syndromes. With four Associate Editors from three continents and a broad international Editorial Board the journal welcomes submissions covering the latest research from around the world.

Molecular Syndromology

Founded: 2009
Category: Clinical and Basic Research
Field of Interest: Genetics

Listed in bibliographic services, including PubMed Central, Embase

2016: Volume 7
6 issues per volume
Language: English
ISSN 1661–8769
e-ISSN 1661–8777

Selected contributions

• Connecting the CNTNAP2 Networks with Neurodevelopmental Disorders: Poot, M. (Utrecht)
• Clinical and Molecular Heterogeneity in Brazilian Patients with Sotos Syndrome: Vieira, G.H. (Greenwood, S.C./Botucatu); Cook, M.M. (Greenwood, S.C.); Ferreira De Lima, R.L. (Salvador); Frigério Domingues, C.E.; de Carvalho, D.R. (Botucatu); Soares de Paiva, I. (Rio de Janeiro); Moretti-Ferreira, D. (Botucatu); Srivastava, A.K. (Greenwood, S.C./Clemson, S.C.)
• Common Somatic Alterations Identified in Maffucci Syndrome by Molecular Karyotyping: Amyere, M. (Brussels); Dompmartin, A. (Caen); Wouters, V. (Brussels); Enjolras, O. (Paris); Kaitila, I. (Helsinki); Docquier, P.-L.; Godfraind, C. (Brussels); Mulliken, J.B. (Boston, Mass.); Boon, L.M.; Vinkula, M. (Brussels)
• Fibroblastosis Ossificans Progressiva Clinical Course, Genetic Mutations and Genotype-Phenotype Correlation: Hüning, I.; Gillessen-Kaessbach, G. (Lübeck)
• Clinical and Molecular Findings of Tunisian Patients with RASopathies: Louati, R.; Abdelmoula, N.B.; Trabelsi, I.; Abid, D. (Sfax); Lissewski, C. (Magdeburg); Kharrat, N.; Kamoun, S. (Sfax); Zenker, M. (Magdeburg); Rebai, T. (Sfax)
• Exome Sequencing Identifies a Dominant TNNT3 Mutation in a Large Family with Distal Arthrogryposis: Daly, S.B. (Manchester) et al.

Contents

See the journal website for contents
The biomedical themes of the Karger Gazette are topical, urgent, exciting. Its articles, written by experts from all over the world, provide a wide audience with the basic issues, new findings and controversies in a lively and readable style. Alongside invited contributions, each issue carries attractively presented support material, such as informative graphics, historical summaries, interviews, or portraits of individuals and institutions. The Karger Gazette is published in newspaper format and appears once a year.

And what’s more – it’s free!
