Author Index Vol. 108, 2015

All Karger titles digitized back to 1890

To mark the occasion of Karger Publishers’ 125th anniversary, all book titles from 1996 back to 1890 have been digitized, making the rich heritage of pioneering Karger publication available to today’s medical and scientific community.

The complete Karger eBook Archive Collection comprises three individual collections:

• Series
• Non-Series
• German

They can be purchased singly or in combination, and encompasses over 2,400 titles, including nearly 700 out-of-print titles, as well as numerous books not previously available in electronic format.

Complete your existing holdings or make sure your library has access to all Karger medical classics, past and present, with the Karger eBook Archive Collection.

For more information, please contact us at:
ebooks@karger.com
www.karger.com/collections/eBookArchive

Samples of Karger eBook Archive Collection content are available at www.karger.com/collections/eBookArchive

Aims and Scope
This highly respected and frequently cited journal is a prime source of information in the area of fetal and neonatal research. Original papers present research on all aspects of neonatology, fetal medicine and developmental biology. These papers encompass both basic science and clinical research including randomised trials, observational studies and epidemiology. Basic science research covers molecular biology, molecular genetics, physiology, biochemistry and pharmacology in fetal and neonatal life. In addition to the classic features the journal accepts papers for the sections Research Briefings and Sources of Neonatal Medicine (historical pieces). Papers reporting results of animal studies should be based upon hypotheses that relate to developmental processes or disorders in the human fetus or neonate.

Submission
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/neo

Should you experience any problems with your submission, please contact:
neo@karger.com

S. Karger AG
Editorial Office 'Neonatology'
P.O. Box
CH–4009 Basel (Switzerland)

All manuscripts must be accompanied by a cover letter and the copyright transfer statement with all authors' signatures (handwritten) confirming that they agree with the publication of the paper. Names, postal and e-mail addresses of four international experts in the appropriate area of research should accompany each manuscript. Selected scientist(s) will be invited to act as referee(s). Referees suggested should not be from the same institution as the author and should have expert knowledge of the subject.

Manuscripts may be submitted to the following sections:
• Reviews (handwritten) confirming that they agree with the publication of the paper.
• Systematic Reviews and Meta-Analyses
• Original Papers
• Consensus Statements
• Short Communications
• Novel Insights from Clinical Practice
• Research Briefings
• Sources of Neonatal Medicine
• Letters to the Editor

Reviews/Systematic Reviews and Meta-Analyses
Most reviews are submitted upon invitation. However, the editors are open to unsolicited reviews. Authors planning such a review are requested to contact the Editorial Office with a one page outline of the intended review. All reviews are subject to peer review. Systematic reviews should be reported using the format of the Cochrane Neonatal Review Group (www.neonatal.cochrane.org/welcome).

Original Papers
Original articles should not exceed a printed length of five pages, i.e. generally not more than 2,500 words of text accompanied by not more than 4–6 figures or tables as well as approx. 25 references.

Original Papers – Clinical Trials
Reports of randomised clinical trials should conform with CONSORT guidelines (www.consort-statement.org/consort-statement).

Short Communications
Short reports, brief laboratory observations, and preliminary communications, can be submitted for accelerated publication under ‘sum Consensus consideration’. To qualify for rapid publication, such reports should not exceed a printed length of two pages, i.e., generally not more than 1,400 words of text accompanied by 2 figures or tables and from 5 to 10 references.

Novel Insights from Clinical Practice (formerly Case Reports)
The publication space available for case reports is very limited. The journal only considers case reports with significant new insights or that present cases that may lead to changes in clinical practice, that stimulate further research or seem to contradict established facts. Highlighted boxes containing one or two bullet points on ‘Established Facts’ (what is already known) and ‘Novel Insights’ (what new information has been gained) are required and should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation. The manuscript should be presented with an abstract (unstructured, max. 150 words), followed by introduction, case report and discussion. Maximum 2 figures or 2 tables or 1 figure and 1 table.

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Neonatology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflict of Interest: All forms of support, including that from drug companies, and any potential source of conflict of interest should be acknowledged in the cover letter to the editor when applicable. The statement will be printed at the end of the article.

Ethics: Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institution’s committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Line numbering: Lines should be numbered (1, 2, 3, etc.) and displayed in the left margin of the manuscript (line numbering can be added from the Page Setup or Format menu of word processing programs). The line numbering should be continuous throughout the entire manuscript (i.e., do not begin numbering from 1 again at the top of each page).

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract of up to 250 words. It should be structured as follows:

Background: What is the major motive that prompted the study?

Objectives: What is the purpose of the study?

Methods: How was the study done?

Results: Most important findings

Conclusions: Most important conclusions

Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figure legends should be supplied on a separate page. For technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks. Electronically submitted b/w halftone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text identify references by Arabic numerals [in square brackets], Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org). Consider using EndNote (http://endnote.com/downloads/styles).

Examples
(b) Papers published only with DOI numbers: AlFaleh K, Anabrees J, Baslder D: Probiotics reduce the risk of necrotizing enterocolitis in preterm infants: a meta-analysis. Neonatology DOI: 10.1159/000356864.

SI Units
SI units should be used. Listings of SI units may be found in the following publications:
Supplementary Material

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. Supplementary material must meet the following conditions: files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author's Choice™

Karger's Author's Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/policy.htm

Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copy-editing and design improvements as well as citation links.

Page Charges

A charge of CHF 60.00 per page (except for invited reviews which are free) will be levied for the first 3 printed pages of an article. Each additional complete or partial page will be charged to the author at CHF 325.00. 3 printed pages equal to approx. 9 manuscript pages (including tables, illustrations and references).

Proofs

Proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints

Order form and price list is sent with the pdf proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Cleveland Clinic Children’s

Cleveland Clinic Children’s invites applications for neonatologists for its Level III Neonatal Intensive Care Units. Cleveland Clinic Children’s has more than 350 pediatric medical and surgical specialists staffing the 429 inpatient beds and 43 outpatient clinics forming the Cleveland Clinic Children’s network, providing over 800,000 outpatient visits, 17,000 hospital admissions, over 12,000 surgeries, and accepting over 1,400 hospital transfers per year. In addition to the main campus NICU, coverage includes two level III regional NICU’s with over 30 beds in each. The Fetal Care Center provides comprehensive care for diagnosis and management of the medically complex fetus and mother. The Children’s Hospital on the main campus is a 125-bed hospital within a hospital including a PICU and NICU that are staffed 24-hours a day. Cleveland Clinic Children’s ranked in 10 pediatric specialties among the 2015-2016 U.S. News Best Children’s Hospitals. Appropriate candidates should be BC/BE, with excellent and current clinical skills. ECMO training is desirable. There is opportunity to work with pediatric residents and neonatal fellows. The institution is distinguished by its high degree of collegiality, and is committed to fostering professional growth of its staff. Therefore, applicants must be comfortable working in a multidisciplinary, team-oriented environment. The melting-pot culture that has helped establish Cleveland as a vibrant and versatile metropolitan area adds a unique flair to the lifestyle here. The Cleveland area is a very comfortable and affordable place to live with a variety of available activities, excellent school systems, and a great place to raise a family.
Antenatal, Prenatal and Intrapartum Care
- Antenatal factors and neonatal outcome
- Fetal nutrition
- Side-effects of the Cesarean delivery epidemic

Stabilization of High Risk Infants
- Delivery room handling of the newborn
- Stabilization techniques and non-invasive respiratory care
- Oxygen supplementation
- Temperature regulation

Latest Strategies on Respiratory Care
- Minimally invasive surfactant administration
- High frequency ventilation
- Strategies to reduce lung injury
- Apnea of prematurity

Brain Injury and ROP
- Pathogenesis and therapeutic strategies of ROP
- HIE and brain cooling
- Mesenchymal stem cells for severe IVH

BPD and PDA
- BPD - pathogenesis, outcome
- Postnatal corticosteroids
- Stem cell therapy
- Current approach to the PDA

Pre- and Postnatal Infections and Inflammation
- Chorioamnionitis
- Neonatal nosocomial sepsis
- Managing outbreaks of infection
- Biomarkers of neonatal infections

Nutrition, Metabolism and Optimal Growth
- Intravenous nutrition: Benefits and risks
- Challenges in preterm enteral nutrition
- Pathophysiology and new biomarkers of NEC
- Neonatal jaundice

Neuroprotection
- Antenatal prevention of fetal neurological impairment
- Neuroprotection for very preterm babies

Follow-Up of High-Risk Infants
Evidence-Based Medicine and Drugs in Newborns
Update on Resuscitation
Morbidity and Mortality in Preterm Infants in Asia
Nutrition of the Preterm Infant

ANR 2016
19-23 June

Cairns Convention Centre, Queensland, Australia
www.anr2016.org

INTERNATIONAL INVITED SPEAKERS

Prof Martin Eilers
University of Würzburg, Germany

Dr Stephan Grupp
Children's Hospital of Philadelphia, USA

Dr Neal Rosen
Memorial Sloan-Kettering Cancer Center, USA

Dr Kimberly Stegmaier
Dana Farber Cancer Institute, USA

It is with great excitement and anticipation that we invite you to participate in the next Advances in Neuroblastoma Research Congress to be held in Cairns, Australia in 2016, on the Great Barrier Reef.

This meeting will provide a key opportunity for research scientists, clinicians, early career fellows, nurses and other allied health care workers and parents to be updated on the latest basic, translational and clinical research developments in the field of childhood neuroblastoma.

ABSTRACTS due by 1 February 2016. Abstracts can only be submitted by Full Members of the ANRA.

Membership closes December 31st: 2015!
For more information, visit www.anrmeeting.org.

ANR 2016 will run in conjunction with

ANZCHOG: 23rd - 25th June
(Australian & New Zealand Children’s Haematology/Oncology Group)

SIOPEN: 24th - 25th June
(International Society of Paediatric Oncology Europe Neuroblastoma)

There will also be strong engagement of parents and supporters, with a full day symposium for parents on Friday 24 June with keynote speaker, Donna Ludwinski, Solving Kids Cancer.

Visit the website for more information and a program outline.
A substantial increase in impact factor over the last years

Fetal Diagnosis and Therapy

Clinical Advances and Basic Research

Editor-in-Chief
E. Gratacós, Barcelona

Associate Editors
R. Chaoui, Berlin
F. Figueras, Barcelona
E. Hernández-Andrade, Detroit, Mich.
J.A. Hyett, Sydney, N.S.W
L. Lewi, Leuven
D. Oepkes, Leiden
R.D. Wilson, Calgary, Alta.

The first journal to focus on the fetus as a patient, Fetal Diagnosis and Therapy provides a wide range of biomedical specialists with a single source of reports encompassing the common discipline of fetal medicine. The journal includes peer-reviewed original research papers, spanning from basic and pathophysiologic investigations to clinical studies in fetal diagnosis and therapy. In addition, the journal addresses timely topics of wide interest in a section dedicated to Reviews and Mini Reviews, where specific clinical questions are covered by internationally renowned experts. Finally, two sections, Novel Insights in Fetal Medicine and Images in Fetal Medicine, are dedicated to particularly interesting case reports with a special focus on cases documented by means of multimodal imaging.

Fetal Diagnosis and Therapy

Founded: 1986
Category: Clinical and Basic Research

Fetus as a Patient
The fifth revised edition of this highly successful book presents the most extensive enhancement since Using and Understanding Medical Statistics was first published 30 years ago. Without question, the single greatest change has been the inclusion of source code, together with selected output, for the award-winning, open-source, statistical package known as R. This innovation has enabled the authors to de-emphasize formulae and calculations, and let software do all of the ‘heavy lifting’.

This edition also introduces readers to several graphical statistical tools, such as Q-Q plots to check normality, residual plots for multiple regression models, funnel plots to detect publication bias in a meta-analysis and Bland-Altman plots for assessing agreement in clinical measurements. New examples that better serve the expository goals have been added to a half-dozen chapters. In addition, there are new sections describing exact confidence bands for the Kaplan-Meier estimator, as well as negative binomial and zero-inflated Poisson regression models for over-dispersed count data.

The end result is not only an excellent introduction to medical statistics, but also an invaluable reference for every discerning reader of medical research literature.

Contents
Preface to the Fifth Edition
Prefaces to the Previous Editions
• Basic Concepts
• Tests of Significance
• Fisher’s Test for 2 × 2 Contingency Tables
• Approximate Significance Tests for Contingency Tables
• Some Warnings concerning 2 × 2 Tables
• Kaplan-Meier or ‘Actuarial’ Survival Curves
• The Log-Rank or Mantel-Haenszel Test for Comparing Survival Curves
• An Introduction to the Normal Distribution
• Analyzing Normally Distributed Data
• Linear Regression Models for Medical Data
• Binary Logistic Regression
• Regression Models for Count Data
• Proportional Hazards Regression
• The Analysis of Longitudinal Data
• Analysis of Variance
• Data Analysis
• The Question of Sample Size
• The Design of Clinical Trials
• Further Comments regarding Clinical Trials
• Meta-Analysis
• Epidemiological Applications
• Diagnostic Tests
• Agreement and Reliability
