Karger Publishers – 125 Years of Experience in Medical and Scientific Publishing

Karger Publishers – independent, family-run and Swiss-based.

It is our goal to serve the global scientific community with innovative and outstanding publications in all fields of medical science. This means dedication to maintaining the highest standards of quality, as well as personalized service for authors, editors and readers.

Aims and Scope
The prime mission of European Surgical Research is to publish high-quality original manuscripts of basic and translational research and review articles concerned with laboratory and clinical investigations which are relevant to surgical practice and of general interest to a broad range of academic surgeons and surgical researchers. Manuscripts dealing with research relevance to human surgical diseases are given high priority along with those which explore the pathogenesis, etiology, and mechanisms of disease processes. European Surgical Research seeks to preferentially publish research articles that integrate molecular biological methods, along with functional studies, into the analysis of biological questions and that advance basic and translational knowledge of surgical pathophysiology. European Surgical Research will provide an international platform for basic and translational research and clinical investigations impacting directly on surgical care and management. European Surgical Research also welcomes articles on educational, research, or social issues of interest to the academic surgical community.

Submission
Only original papers written in English are considered and should be submitted online:

www.karger.com/esr

All manuscripts must be accompanied by a cover letter and copyright signed by all authors. Assurance should be given in the cover letter that the manuscript is not under simultaneous consideration by any other publication. Authors may suggest up to five referees who have expert knowledge on the subject. Suggested referees should not be from the same institution, not have published with the authors during the last 5 years, and should not be prejudiced.

Manuscripts may be submitted to the following sections:
1. Original Papers on basic, translational and clinical science
2. Reviews
3. Technical Notes

Original Papers: These manuscripts should represent original research in basic, translational, or clinical science. Consideration for publication is based on originality, novelty, scientific soundness, and appropriate analysis. European Surgical Research encourages the submission of relevant and well-conducted work in basic, experimental, and clinical science. Manuscripts should be prepared according to guidelines for original papers.

Reviews: These manuscripts present a new method, experimental model, test procedure, tool, or algorithm that is relevant for surgical research and significantly advances current available knowledge.

Technical Notes: These manuscripts present a new method, technical innovation, protocol, or pipeline that is relevant to surgical research and could be useful for the surgical community.

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of European Surgical Research and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to gain permission to reproduce illustrations, tables, etc. from other publications.

Disclosure Statement
Authors are required to declare any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Disclosure statements will be published at the end of the text of the article.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the authors will be sanctioned from publishing papers for a period to be determined by the responsible Editor.

Ethics
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's committee on human research. Further, they should also state that animal experiments conform to institutional standards. Authors are required to declare the approval codes obtained from the corresponding ethical committee on human and/or animal research.

Arrangement
The manuscript should conform to the following order: title page, abstract and key words, body, acknowledgments, references, figure legends, tables and figures. Manuscripts should be written in high-quality English suitable for effective communication to a professional medical audience. Authors who are not native speakers of English sometimes receive negative comments from referees or editors about the English-language usage in their manuscripts, and these problems can contribute to the decision to reject a paper. To help reduce the possibility of such problems, we strongly encourage such authors (i) to have their manuscript reviewed for clarity by a colleague whose native language is English and/or (ii) to use one of the many English language editing services that are available via the Web.

All pages, including the figure legends, should be numbered in sequence, and the first author's name should appear at the upper right corner of each page. Papers not conforming to the journal style will be returned without review.

Title Page: The first page of each paper should indicate a concise title of no more than 150 characters, all authors' names (first name and surname), authors' institutional affiliations, and a short title for us as running head.

Corresponding author: The exact postal address of author(s) to whom correspondence, proofs, and reprint requests should be sent, including the postal code, must be given at the bottom of the title page. Also, please supply phone and number and e-mail address.

Abstract of Reviews: Should be divided into the following subsections: Background, Summary and Key Messages. The Background should provide a brief clinical context for the review and is followed by the Summary, which should include a concise description of the main topics covered in the text. The Key Messages encapsulate the main conclusions of the review.

Abstract of Original Papers and Technical Notes: Submit the abstract on a separate page. The abstract is structured into Background/Purpose, Methods, Results and Conclusions and should be less than 400 words in length.

Key words: Following the abstract, an alphabetical list of five key words that reflect the content of the paper should be given.

Footnotes: Avoid footnotes.

Body of manuscript: The text should be organized into: Introduction, Materials and Methods, Results, Discussion, Acknowledgments, including grant numbers and sources of support, Disclosure/Duality of Interest (optional), and References. Abbreviations/acronyms are defined in both the abstract and body of the text as follows: vascular permeability factor (VPF); transforming growth factor-β (TGF-β). They should only be used in the abstract if they appear twice after first being mentioned and in the body of the text only if they appear three times after first being mentioned.

Tables and illustrations: Tables and illustrations (both numbered in sequential Arabic numerals) should be prepared as separate files. Tables require a brief and concise heading. Figures require a legend, prepared as separate files. Figures must be submitted in high-quality electronic format, e.g., PDFs, or as high-resolution images, e.g., TIFFs. Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.– per page.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize number references in the order in which they appear twice after first being mentioned and in the body of the text only if they appear three times after first being mentioned.

they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharis TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063838.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement:

“This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/doi= [insert DOI number].”

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author’s behalf [see Funding Organizations (NIH etc.)].

For self-archiving Author’s ChoiceTM (Gold Open Access) articles, see Author’s ChoiceTM.

Author’s ChoiceTM
Karger’s Author’s ChoiceTM service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:
- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement:

“The final, published version of this article is available at http://www.karger.com/doi= [insert DOI number].”

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s ChoiceTM, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
A charge of CHF 125.– per page will be levied for the first 4 printed pages of an article. Any additional page will be charged to the author at CHF 325.–. The allotted size of a paper is equal to approx. 12 manuscript pages (including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Contents

See the journal website for contents
European Surgical Research features original clinical and experimental papers, condensed reviews of new knowledge relevant to surgical research, and short technical notes serving the information needs of investigators in various fields of operative medicine. Coverage includes surgery, surgical pathophysiology, drug usage, and new surgical techniques. Special consideration is given to information on the use of animal models, physiological and biological methods as well as biophysical measuring and recording systems. The journal is of particular value for workers interested in pathophysiologic concepts, new techniques and in how these can be introduced into clinical work or applied when critical decisions are made concerning the use of new procedures or drugs.

Selected contributions
- Wound Repair and Regeneration: Reinke, J.M.; Sorg, H. (Hannover)
- Vascularization in Tissue Engineering: Angiogenesis versus Inosculation: Laschke, M.W.; Menger, M.D. (Homburg/Saar)
- Clinical Implication of Targeting of Cancer Stem Cells: Zhao, L.; Zhao, Y.; Bao, Q.; Niess, H.; Jauch, K.-W.; Bruns, C.J. (Munich)
- Damage- and Pathogen-Associated Molecular Patterns and Alarmins: Keys to Sepsis?: Denk, S.; Perl, M.; Huber-Lang, M. (Ulm)
- Ex vivo Approach to Treat Failing Organs: Expanding the Limits: Ciubotaru, A. (Hannover/Chisinau); Haverich, A. (Hannover)
