Using and Understanding Medical Statistics
5th, revised and extended edition

David E. Matthews
Vernon T. Farewell

The fifth revised edition of this highly successful book presents the most extensive enhancement since Using and Understanding Medical Statistics was first published 30 years ago. Without question, the single greatest change has been the inclusion of source code, together with selected output, for the award-winning, open-source, statistical package known as R. This innovation has enabled the authors to de-emphasize formulae and calculations, and let software do all of the ‘heavy lifting’.

This edition also introduces readers to several graphical statistical tools, such as Q-Q plots to check normality, residual plots for multiple regression models, funnel plots to detect publication bias in a meta-analysis and Bland-Altman plots for assessing agreement in clinical measurements. New examples that better serve the expository goals have been added to a half-dozen chapters. In addition, there are new sections describing exact confidence bands for the Kaplan-Meier estimator, as well as negative binomial and zero-inflated Poisson regression models for over-dispersed count data.

The end result is not only an excellent introduction to medical statistics, but also an invaluable reference for every discerning reader of medical research literature.

Contents
Preface to the Fifth Edition
Prefaces to the Previous Editions
• Basic Concepts
• Tests of Significance
• Fisher’s Test for 2×2 Contingency Tables
• Approximate Significance Tests for Contingency Tables
• Some Warnings concerning 2×2 Tables
• Kaplan-Meier or ‘Actuarial’ Survival Curves
• The Log-Rank or Mantel-Haenszel Test for Comparing Survival Curves
• An Introduction to the Normal Distribution
• Analyzing Normally Distributed Data
• Linear Regression Models for Medical Data
• Binary Logistic Regression
• Regression Models for Count Data
• Proportional Hazards Regression
• The Analysis of Longitudinal Data
• Analysis of Variance
• Data Analysis
• The Question of Sample Size
• The Design of Clinical Trials
• Further Comments regarding Clinical Trials
• Meta-Analysis
• Epidemiological Applications
• Diagnostic Tests
• Agreement and Reliability

Guidelines for Authors

Submission

Only original papers written in English are considered. Manuscripts should be submitted using the online submission website:

www.karger.com/dne

Should you experience any problems with your submission, please contact

dne@karger.ch

S. Karger AG
Editorial Office 'Developmental Neuroscience'
P.O. Box
CH-4009 Basel (Switzerland)
Tel. +41 61 306 1424
Fax +41 61 306 1434

Suggested reviewers: Names, postal and e-mail addresses of four experts in the appropriate area of research should accompany each manuscript. It would be helpful to provide a URL or a PubMed search to document the publication record for those experts you are recommending as reviewers. Furthermore, up to four individuals who should not be solicited to review your article can be listed. Please see also: A Guide to Reviewing Articles (PDF)

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Developmental Neuroscience and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Plagiarism Policy

Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Types of Articles Accepted

Articles may be either original papers or mini reviews. Original papers are generally 25 typed manuscript pages with 6–8 figures and will occupy approximately 12 printed pages in final.

Mini reviews provide timely overviews of key topics, new insights and ongoing controversies. Mini reviews are typically 8–10 typed manuscript pages, and will occupy approximately 5–6 pages in final form. Citation classics are invited mini reviews. These essays are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. Electronically submitted b/w/half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Table and figure legends: The figure and table legends should be intelligible without reference to the text. The legends should describe what and how the experiments were performed without interpreting the results. All symbols and abbreviations must be defined within the legend as should be all scale bars and statistics.

Color Illustrations

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References

In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org). A typical article for Developmental Neuroscience will have 50–75 citations.

Examples

Cover Illustrations

Authors are encouraged to submit a color photograph for consideration as cover image after a paper has been accepted for publication. Striking black and white drawings or photographs also will be considered. Cover photo submissions must be accompanied by a one-sentence caption. Images may, but need not be, a component of figure from the manuscript, but must be thematically related to the work to be published.

Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org

Supplementary Material

Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).
Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement:

  "This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number]."

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author's behalf [see Funding Organizations (NIH etc.)].

For self-archiving Author's Choice™ (Gold Open Access) articles, see Author's Choice™.

Author's Choice™
Karger's Author's Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:

- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement:

  "The final, published version of this article is available at http://www.karger.com/?doi=[insert DOI number]."

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
There is no page charge for papers of 10 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 20 manuscript pages (including tables, illustrations and references).

E-pub First
All articles are published electronically ahead of print with a DOI number and are supplemented later with the definite reference of the printed version. The articles become available immediately after the authors’ approval to publication, with the added advantage of being citable much earlier than previously. Authors can influence the time of appearance by promptly returning the proofs.

Proofs
Unless indicated otherwise, proofs are sent to the first-named author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author. No page proofs are supplied.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Disclaimer: The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements in the journal is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety. The publisher and the editor(s) disclaim responsibility for any injury to persons or property resulting from any ideas, methods, instructions or products referred to in the content or advertisements.

Subscription Rates: Subscriptions run for a full calendar year. Prices are given per year.

Personal subscription:
- Print or Online: EUR 631.00
- Print+Online combined: EUR 681.00
- OECD: EUR 563.00
- USD: EUR 631.00
- Postage and handling: USD 678.00

Institutional subscription:
- Print or Online: CHF 1802.00
- Print+Online combined: CHF 2072.00
- OECD: CHF 1699.00
- USD: USD 1938.00
- Postage and handling: CHF 57.00

Please enquire about reduced rates for members of the Argentinian Society for Neurochemistry (SAN), International Society for Development Neuroscience.

Subscription Orders:
Orders can be placed at agencies, bookstores, directly with the Publisher or S. Karger AG, Medical and Scientific Publishers, Allschwilerstrasse 10, CH–4009 Basel, Switzerland.

Change of Address:
Both old and new address should be sent to the subscription source.

Matthew Budde, PhD / Brian Edlow, PhD / Larry Latour, PhD / Laurena Hollier, PhD
Poster Session IB - Wine & Cheese with Exhibitors
WINTR Mentoring & Networking Reception
West 6th Brewery / Food Chain / Smithtown Seafood

S-07: What We Know About Hippocampal Circuitry Dysfunction and the Future of Therapeutic Strategies
David Maneu, MD / Vijal Santhakumar, PhD / Coken Akins, PhD / Alika Cohen, PhD
S-08: Spinal Cord Injury: Rehab Plus
Ray de Leon, PhD / John Houle, PhD / Ronaldo Ichihara, PhD
S-09: TBI Translational Biomarkers - From Animal Models to FDA-Qualified Biomarkers as TBI Drug Development Tools
Allison Kumar, PhD / Kevin Wang, PhD / Diane Stephenson, PhD / Patik Majmudar, PhD
S-10: Sex Differences in CNS Injury
Dodie Harris, MD / Allyn Wadell, PhD / Candace Floyd, PhD
S-11: Nanomaterial Promotion of Regeneration in SCI
Molly Shochet, PhD / DiAnna Hynds, PhD / Vladimir Papura, MD, PhD
S-12: The Effect of Age on Trauma-Induced Neuroinflammation
Michelle Scholer, MD / Adam Bachatter, PhD / David Lanne, PhD
Poster Session IIIB - Wine & Cheese with Exhibitors
A Night at the Races Dinner & Award Ceremony
Keeneland Entertainment Center & Barn

WEDNESDAY, JUNE 29

Poster Session IIIA - Breakfast
PL-05: Advances, Challenges and Opportunities in CNS Regeneration
George Smith, PhD / Zhigang He, PhD / Shuvin Li, PhD
PL-06: A Primer on Imaging: From Animal Models to Human Subjects
E. Mark Haacke, PhD / Victor Song, PhD / Juli Gelovani, PhD
PL-07: Big Data Approach to Neurotrauma
Patrick Belloowin, PhD / Douglass H. Smith, MD / Paul Thompson, PhD / Adam Ferguson, PhD
PL-08: Lifestyle Choice Treatments for Neurotrauma
Jason Scott Robert, PhD / Andre Obenaus, PhD / Christian Baumann, PhD
Theater of War Presentation & Closing Reception "NEW"

CALL FOR ABSTRACTS: APRIL 1, 2016 DEADLINE

WWW.NEUROTRAUMA.ORG
Interactions between predator and prey can drive the evolution and diversification of nervous systems in astonishing ways. At the 2014 Karger Workshop, emerging leaders in the field presented highlights of some of the most compelling examples of co-evolved and specialized predators and prey. This subsequent special issue of *Brain, Behavior and Evolution* includes discussions on neurotoxins, ion channels, visual systems, auditory localization, muscle activation, and echolocation. The species and questions addressed are equally diverse: How do alligators and owls localize sounds? What do two bats do when chasing the same insect? Why do some newts carry enough neurotoxin to kill twenty humans? What rules govern killer fly attack behavior? How do electric eels remotely control prey? Why are beautiful cone snails a potential cornucopia of pharmaceuticals? Overall, this publication provides valuable insight into why predator-prey interactions hold a special place in the study of biology and evolution.

**Contents**

Preface: Catania, E.H.; Catania, K.C.

**Original Papers**

- Sound Localization Strategies in Three Predators: Carr, C.E.; Christensen-Dalsgaard, J.
- An Optimized Biological Taser: Electric Eels Remotely Induce or Arrest Movement in Nearby Prey: Catania, K.C.
- Predictably Convergent Evolution of Sodium Channels in the Arms Race between Predators and Prey: Brodie III, E.D.; Brodie Jr., E.D.
- Prey-Capture Strategies of Fish-Hunting Cone Snails: Behavior, Neurobiology and Evolution: Olivera, B.M.; Segers, J.; Horvath, M.P.; Fedosov, A.

**Author Index / Subject Index**

*The Neurobiology and Behavior of Predators and Prey*  
26th Annual Karger Workshop in Evolutionary Neuroscience, Washington, D.C., November 2014  
Guest Editors: Catania, E.H. (Nashville, Tenn.); Catania, K.C. (Nashville, Tenn.)  
76 p., 27 fig., 19 in color, 4 tab., 2015  
CHF 29.00 / EUR 27.00 / USD 34.00 (soft cover)  

**Special Topic Issue**  
*Brain, Behavior and Evolution*

Introducing the new interdisciplinary Karger journal

*Biomedicine Hub* is an interdisciplinary journal: a 'hub' for researchers, clinicians and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results and clinical experience. *Biomedicine Hub* aims at facilitating the exchange of knowledge between disciplines, with a focus on translational science for the development of cutting-edge technologies and the improvement of health care. A further focus is on emerging interdisciplinary fields at the forefront of medicine.

Karger premium quality – open access – peer-reviewed – rapid publication
Get the full picture on [www.biomedicinehub.com](http://www.biomedicinehub.com)

- 16 internationally renowned senior editors
- over 170 Editorial Board Members
- from 35 countries
- specialized in 41 medical disciplines

**We invite you to submit now!**
Article Processing Charges (APC) are waived before June 30, 2016.
