PROCEEDINGS

Pharmaco-EEG, Pharmaco-Sleep and EEG-Based Personalized Medicine

International Pharmaco-EEG Society,
18th Biennal Conference,
Leipzig, September 25–28, 2014

Editors
Marc Jobert, Berlin
Martijn Arns, Nijmegen
The fifth revised edition of this highly successful book presents the most extensive enhancement since Using and Understanding Medical Statistics was first published 30 years ago. Without question, the single greatest change has been the inclusion of source code, together with selected output, for the award-winning, open-source, statistical package known as R. This innovation has enabled the authors to de-emphasize formulae and calculations, and let software do all of the ‘heavy lifting’.

This edition also introduces readers to several graphical statistical tools, such as Q-Q plots to check normality, residual plots for multiple regression models, funnel plots to detect publication bias in a meta-analysis and Bland-Altman plots for assessing agreement in clinical measurements. New examples that better serve the expository goals have been added to a half-dozen chapters. In addition, there are new sections describing exact confidence bands for the Kaplan-Meier estimator, as well as negative binomial and zero-inflated Poisson regression models for over-dispersed count data.

The end result is not only an excellent introduction to medical statistics, but also an invaluable reference for every discerning reader of medical research literature.

Contents
Preface to the Fifth Edition
Prefaces to the Previous Editions
• Basic Concepts
• Tests of Significance
• Fisher’s Test for 2 × 2 Contingency Tables
• Approximate Significance Tests for Contingency Tables
• Some Warnings concerning 2 × 2 Tables
• Kaplan-Meier or ‘Actuarial’ Survival Curves
• The Log-Rank or Mantel-Haenszel Test for Comparing Survival Curves
• An Introduction to the Normal Distribution
• Analyzing Normally Distributed Data
• Linear Regression Models for Medical Data
• Binary Logistic Regression
• Regression Models for Count Data
• Proportional Hazards Regression
• The Analysis of Longitudinal Data
• Analysis of Variance
• Data Analysis
• The Question of Sample Size
• The Design of Clinical Trials
• Further Comments regarding Clinical Trials
• Meta-Analysis
• Epidemiological Applications
• Diagnostic Tests
• Agreement and Reliability

[KARGER 125]

[Printed in Germany on acid-free and non-aging paper (ISO 9706) by Stückle Druck, Ettenheim]
Guidelines for Authors

Submission
Only papers written in English are considered and should be submitted using the online submission website at: www.karger.com/nps. Should you experience any problems with your submission, please contact Prof. W. Strik
University Hospital of Psychiatry
Waldau
CH–3000 Bern 60 (Switzerland)
E-Mail: neuropsychobiology@puk.unibe.ch

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Neuropsychobiology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement
Title page: The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted, and a short title for use as running head.
Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.
Key words: For indexing purposes, a list of 3–10 key words in English is essential.
Abstract: Each paper needs an abstract in 4 paragraphs and not exceeding 250 words.
Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 180 × 223 mm) or provide crop marks. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.
Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 900.00 per page.

References
In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeleev) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
• Be used for noncommercial purposes only
• Be linked to the final version on www.karger.com
• Include the following statement: ‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytoognet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number].’ It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author’s behalf [see Funding Organizations (NIH etc.)]. For self-archiving Author’s Choice™ (Gold Open Access) articles, see Author’s Choice™.

Author’s Choice™
Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice. The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:
• Follow the terms of the relevant Creative Commons license
• Be linked to the final version on www.karger.com
• Include the following statement: ‘The final, published version of this article is available at http://www.karger.com/?doi=[insert DOI number].’ It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.
Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
There are no page charges for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 15 manuscript pages (double-spaced, including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the first-named author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

For over 40 years the Karger Gazette has been distributed to a growing audience worldwide. Published in newspaper format, it highlights advances in biomedicine and clinical practice, introduces personalities, portraits research institutes and chronicles milestones in the history of Karger Publishers in a lively and readable style.

The new anniversary issue celebrates Karger’s 125 years as a medical publisher. It explores the STM publishing business in the digital age, offers short portraits of Karger’s journal and book series editors, and includes interviews with three renowned scientists who talk about their careers and how they define progress.

Subscriptions run for a full calendar year. Prices are given per year.

**Personal subscription:**
- Print or Online: CHF 1082.00
- Print+Online combined: CHF 1178.00
- EUR 901.00
- USD 1104.00

**Postage and handling:**
- Print and print+online: CHF 60.80
- US/Canadian: EUR 51.20
- US/Canada: USD 83.20

**Institutional subscription:**
- Print or Online: CHF 1000.00
- Print+Online combined: CHF 1096.00
- EUR 850.00
- USD 1014.00

**Discount subscription prices:**
- • International Pharmaco-EEG Society (IPEG)
- • American Psychiatric Association (APA)
- • Association of European Psychiatrists (AEP)
- • International Society of Biological Psychiatry

Back Volumes and Single Issues: Information on availability and prices of single print issues and print or electronic back volumes can be obtained from Customer Service at service@s.karger.ch.

Bibliographic Indices: This journal is regularly listed in bibliographic services, including Current Contents and PubMed/MEDLINE.

Photocopying: This journal has been registered with the Copyright Clearance Center (CCC), as indicated by the code appearing on the first page of each article. For readers in the US, this code signals consent for copying of articles for personal or internal use, or for the personal or internal use of specific clients, provided that the stated fee is paid per copy directly to Copyright Clearance Center Inc., 222 Rosewood Drive Danvers, MA 01923 (USA). A copy of the first page of the article must accompany payment. Consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. In these cases, specific written permission must be obtained from the copyright owner, S. Karger AG, P.O. Box CH-4009 Basel (Switzerland).

Photocopying for libraries and dealers: Photocopying is permitted for libraries and dealers registered with their national Reproduction Rights Organizations (RRO) and for fair use, as defined in the Copyright Law. Infringement will lead to payment of statutory fees.
Practical methods for implementing light and wake therapy to fight depression

Anna Wirz-Justice, Francesco Benedetti, Michael Terman

Chronotherapeutics for Affective Disorders
A Clinician’s Manual for Light and Wake Therapy
2nd, revised edition

‘Light therapy’ is established worldwide as the treatment of choice for seasonal affective disorder. It is also successfully used in nonseasonal depression, as well as for many other psychiatric and neurologic illnesses, and in sleep medicine. ‘Wake therapy’ is the fastest antidepressant known. Imaging studies show that both methods share neurobiological substrates with antidepressants, but act much faster. ‘Chronotherapeutics’ – the combination of light and wake therapy – achieves rapid results and, by reducing residual symptoms, also minimises relapse. Written by three prominent clinical and research experts in biological rhythms, this manual aims to broaden knowledge and practical application of these non-pharmacologic interventions for bipolar and unipolar disorders. Clinical understanding is deepened by an explanation of the circadian timing system and sleep regulatory mechanisms which underlie the novel treatment strategy. The step-by-step guide and description of the interventions in centers throughout the world provides clear hands-on instructions, supported by a solid body of clinical research.

The first edition of ‘Chronotherapeutics for Affective Disorders’ has kindled a network of psychiatrists and psychologists who are actively introducing these treatments for their inpatients and outpatients. This manual is also essential reading for primary care physicians, sleep medicine specialists and health care administrators.

Contents
• Introduction
• Individual Chronotherapeutic Elements: Light, Wake Therapy and Sleep Phase Advance
• Integrative Chronotherapeutics: Combinations of Light, Wake Therapy and Sleep Phase Advance
• Inpatient Procedures
• Practical Details for Wake Therapy
• Practical Details for Light Therapy
• Outpatient Treatment Strategies
• Range of Chronotherapeutic Indications
• Light Therapy for Children and Adolescents
• Light and Wake Therapy for Older Patients
• The Visually Impaired: More Sleep Disturbances, More Depression
• Endogenous and Exogenous Melatonin
• Drugs That Affect Rhythms (Chronobiotics)
• Social Rhythm Therapy
• Chronobiology in Everyday Life
• References
• Subject Index
• Appendix

Despite the availability of antidepressants for over 40 years, a substantial proportion of depressed patients do not respond adequately to treatment. Failure to respond effectively to treatment contributes to physical ill-health and psychiatric morbidity, often resulting in premature death of the depressed patient. The purpose of this volume is to consider the possible reasons for the limitations of the currently available antidepressants, to examine the advances in our understanding of the psychopathology of depression and how such knowledge may assist in the discovery of new methods of treatment. Leading international experts in this field discuss the possible underlying reasons for depression and limitations of current antidepressants. Opportunities for novel therapeutic approaches to dysfunctional circadian rhythms and mood disorders as well as current status and future perspectives for optimizing antidepressant management of depression are reviewed.

This publication illustrates the breadth of the latest research and is valuable reading for psychiatrists, neuroscientists and pharmacologists.

Contents

Preface

Antidepressants: Past and Present

Basic and Clinical Aspects of Depression Research
The Hypothalamic-Pituitary-Adrenal Axis in Depression: Juola-Pieper, M.; Dinan, T.G.
Disynaptic Circadian Rhythms and Mood Disorders: Opportunities for Novel Therapeutic Approaches: Norman, T.R.
The Concept of Depression as a Dysfunction of the Immune System: Leonard, B.E.
The Role of Polysaturated Fatty Acids in the Pathology and Treatment of Depression: Song, C.

Overcoming Antidepressant Treatment Resistance: Focus on Glutamate: Murrough, J.W.; Mathew, S.J.
Neuroimaging and the Pathophysiology and Treatment of Depression: Recent Advances and Future Needs: Cannon, D.

Experimental Models of Depression and the Mechanisms of Action of Antidepressants
Animal Models of Depression – Where Are We Going? Slattery, D.A.; Cryan, J.F.
Genetic Models of Depression and Antidepressant Response: Lucki, I.
Chromatin-Based Treatments for Affective Disorders – Insight or Utopia: Covington, H.E. III; Berton, O.
Neurotrophic Factors and Antidepressant Action: Recent Advances: O’Leary, O.F.; Castrén, E.
Neurogenic Basis of Antidepressant Action: Recent Advances: Tanti, A.; Belzung, C.

The Future of Antidepressants
The Nature and Treatment of Depression – Resistant Depression: Kennedy, S.H.; Rizvi, S.J.; Giacobbe, P.
Optimizing Antidepressant Management of Depression: Current Status and Future Perspectives: Schwartz, T.L.; Stahl, S.M.

What’s new in antidepressant research?

Depression: From Psychopathology to Pharmacotherapy
Editors
John F. Cryan
Brian E. Leonard

www.karger.com/motph
The biological approach to mental disorders continues to yield innovative findings of clinical importance, particularly if methodologies are combined. This journal collects high quality empirical studies from various experimental and clinical approaches in the fields of Biological Psychiatry, Biological Psychology and Neuropsychology. It features original, clinical and basic research in the fields of neurophysiology and functional imaging, neuropharmacology and neurochemistry, neuroendocrinology and neuroimmunology, genetics and their relationships with normal psychology and psychopathology. In addition, the reader will find studies on animal models of mental disorders and therapeutic interventions, and pharmacoelectroencephalographic studies. Regular reviews report new methodologic approaches, and selected case reports provide hints for future research. Neuropsychobiology is a complete record of strategies and methodologies employed to study the biological basis of mental functions including their interactions with psychological and social factors.

The translational approach to behavior and mental disorders

Neuropsychobiology
International Journal of Experimental and Clinical Research in Biological Psychiatry, Pharmacopsychiatry, Biological Psychology/Pharmacopsychology and Pharmacoelectroencephalography

Editor-in-Chief
W. Strik, Bern

Selected contributions
• The Effects of Repetitive Transcranial Magnetic Stimulation on Cognitive Performance in Treatment-Resistant Depression. A Systematic Review: Serafini, G. (Genoa); Pompili, M. (Rome); Belvederi Murri, M.; Respino, M.; Ghio, L. (Genoa); Girardi, P. (Rome); Fitzgerald, P.B. (Melbourne, Vic.); Amore, M. (Genoa)
• Integrating Different Aspects of Resting Brain Activity: A Review of Electroencephalographic Signatures in Resting State Networks Derived from Functional Magnetic Resonance Imaging: Nishida, K. (Moriguchi-City); Razavi, N. (Bern); Jann, K. (Los Angeles, Calif.); Yoshimura, M. (Moriguchi-City); Dierks, T. (Bern); Kinoshita, T. (Moriguchi-City); Koenig, T. (Bern)
• Brain Metabolism in Substance-Induced Psychosis and Schizophrenia: A Preliminary PET Study: Dragona, F.; Mauri, M.C.; Marotta, G.; Armoo, F.T. (Milan); Brambilla, P. (Udine); Altamura, A.C. (Milan)
• Different and Shared Brain Volume Abnormalities in Late- and Early-Onset Schizophrenia: Egashira, K. (Kitakyusyu); Matsu, K. (Yamaguchi); Mihara, T. (Okinawa); Nakano, M.; Nakashima, M.; Watanuki, T.; Matsubara, T.; Watanabe, Y. (Yamaguchi)
• Genetics of Alcohol Dependence: A Review of Clinical Studies: Samochowiec, J.; Samochowiec, A. (Szczecin); Puls, I. (Berlin); Bienkowski, P. (Warschau); Schott, B.H. (Berlin/Magdeburg)
• MRI Predicts Remission at 1 Year in First-Episode Schizophrenia in Females with Larger Striato-Thalamic Volumes: Fung, G.; Cheung, C.; Chen, E. (Hong Kong); Lam, C. (La Jolla, Calif.); Chiou, C.; Law, C.; Leung, M.-K. (Hong Kong); Deng, M. (Hong Kong/Sacramento, Cali.); Cheung, V.; Qi, L.; Nallin, Y.; Tai, K.; Yip, L. (Hong Kong); Suckling, J. (Cambridge); Sham, P. (Hong Kong); McAlonan, G. (Hong Kong/London); Chua, S. (Hong Kong)

Introducing the new interdisciplinary Karger journal

*Biomedicine Hub* is an interdisciplinary journal: a 'hub' for researchers, clinicians and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results and clinical experience. *Biomedicine Hub* aims at facilitating the exchange of knowledge between disciplines, with a focus on translational science for the development of cutting-edge technologies and the improvement of health care. A further focus is on emerging interdisciplinary fields at the forefront of medicine.

Karger premium quality – open access – peer-reviewed – rapid publication

Get the full picture on [www.biomedicinehub.com](http://www.biomedicinehub.com)

- 16 internationally renowned senior editors
- over 170 Editorial Board Members
- from 35 countries
- specialized in 41 medical disciplines
