Introducing the new interdisciplinary Karger journal

Biomedicine Hub is an interdisciplinary journal: a 'hub' for researchers, clinicians and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results and clinical experience. Biomedicine Hub aims at facilitating the exchange of knowledge between disciplines, with a focus on translational science for the development of cutting-edge technologies and the improvement of health care. A further focus is on emerging interdisciplinary fields at the forefront of medicine.

Karger premium quality – open access – peer-reviewed – rapid publication
Get the full picture on www.biomedicinehub.com

- 16 internationally renowned senior editors
- over 170 Editorial Board Members
- from 35 countries
- specialized in 41 medical disciplines

We invite you to submit now!
Article Processing Charges (APC) are waived before June 30, 2016.

Stimulating reading
in and around the world of medicine

The biomedical themes of the Karger Gazette are topical, urgent, exciting. Its articles, written by experts from all over the world, provide a wide audience with the basic issues, new findings and controversies in a lively and readable style. Alongside invited contributions, each issue carries attractively presented support material, such as informative graphics, historical summaries, interviews, or portraits of individuals and institutions. The Karger Gazette is published in newspaper format and appears once a year.

And what’s more – it’s free!

To see behind the cover, please register for your free print subscription or read it online.

www.karger.com/gazette

Current issue:

125 Years Karger Publishers
- Read about the STM publishing business in the digital age
- Have a look at the portraits of Karger’s journal and book series editors
- Meet three world-renowned scientists who talk about their careers and how they define progress

Guidelines for Authors

Acta Cytologica is a bimonthly published journal that aims to cover all aspects within the area of both clinical cytology and cytopathology. It furthers the understanding of cytopathologic processes and facilitates the translation of current research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 cytology societies around the world, Acta Cytologica evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlation. The journal features Original Papers (Fine Needle Aspiration, Gynecologic Cytology, Nongynecologic Cytology, Techniques, Discourse, Techniques), Novel Insights from Clinical Practice (formerly Case Reports), Letters to the Editor and Reviews. Criteria for acceptance are quality, originality, and clarity. Acta Cytologica will not consider papers that are either preliminary or purely descriptive. Reports on clinical cases are accepted only if they provide novel insight into unresolved problems of cytology and cytopathology. All articles are subject to editorial review.

Submission

Only original papers written in English are considered. Manuscripts should be submitted online using the online submission website at www.karger.com/acy (the preferred word-processing package is MSWord®). Before submitting your manuscript, you are encouraged to read the detailed guidelines at www.karger.com/acy_guidelines for specific directions as how to get a manuscript ready for submission. If you should have any problems with your submission, please contact the editorial office.

Conditions

All manuscripts must be accompanied by a covering letter signed on behalf of all authors verifying that all the authors were active participants. Assurance should be given that the manuscript is original and not under simultaneous consideration for publication in another journal. Please provide complete financial disclosure information. Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see N Engl J Med 1997;336:309–315). All articles will undergo an in-depth peer-review process. Submission of an article for publication implies the transfer of the copyright from the author(s) to the publisher. Clearly state the method of any randomization, if used, and a short title for use as running head. The title page should indicate the title, the authors' names, the institute(s) where the work was conducted, and a short title for use as running head. The title page should indicate the titles of the journal, the authors' names, the institute(s) where the work was conducted, the number of authors if the research was approved by the local institutional review board. Clearly state the method of any randomization, if used, and a short title for use as running head. The title page should indicate the titles of the journal, the authors' names, the institute(s) where the work was conducted, the number of authors if the research was approved by the local institutional review board. Clearly state the method of any randomization, if used, and a short title for use as running head. All articles will undergo an in-depth peer-review process. Submission of an article for publication implies the transfer of the copyright from the author(s) to the publisher. Clearly state the method of any randomization, if used, and a short title for use as running head. Title page: The first page of each paper should indicate the title, the authors' names, the institute(s) where the work was conducted, and a short title for use as running head. Title page: The first page of each paper should indicate the title, the authors' names, the institute(s) where the work was conducted, and a short title for use as running head. Limit the number of authors to 6. If more than 6 authors contributed significantly to the article, the editorial office will consider including their names upon request. Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as an e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential. Abstract: Each paper needs an abstract limited to 200 words structured as follows: Objective, Study design, Results and Conclusions. For Novel Insights from Clinical Practice the headings should be: Background, Case and Conclusion. Address the study's power to detect a difference if the research identified important variables that lacked a statistically significant difference. Footnotes: Footnotes should be avoided. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Materials and Methods: Acknowledge that the original research was approved by the local institutional review board. Clearly state the method of any randomization, blinding and selection of specific statistical tests. Explain dropouts/exclusions and confounding variables.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 180 × 222 mm) or provide crop marks. Each illustration must be labelled with its number and the first author's name. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling (final size), line art drawings one of 800–1,200 dpi. Do not modify a low-resolution image by increasing the dpi. Figure files should not be embedded in a document file but submitted separately. All illustrations must include the original magnification and the stain employed, and clearly identify areas of radiographs, photomicrographs, etc.

Color illustrations: For all manuscripts accepted, authors will be charged CHF 500.00 for each color page published in the print version of the journal. Several color illustration may be placed onto one color page. When the illustration appears in black and white in the printed version, the authors will not be charged a fee. In the online version all figures submitted in color will appear in color at no charge to the author. Referring to colors in the text and figure legends should be avoided. We recommend using symbols, instead of color, for charts and graphs.

Ethics: Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's committee on human research and thus meets the standards of the Declaration of Helsinki in its revised version of 1975 and its amendments of 1983, 1989, and 1996 [JAMA 1997;277:925–926]. Information suitable to
post-print (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement:
  ‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number].’
- It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement:
  ‘The final, published version of this article is available at http://www.karger.com/?doi=[insert DOI number].’
- It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Copy Editing
All manuscripts accepted for publication by Karger are subject to copy editing. Changes introduced by the copy editor and/or questions will be marked in the manuscript so please be sure to check the proofs against the manuscript. The copy edited manuscript will be returned along with the proofs.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author. No page proofs are supplied.

Reprints
An order form and a price list are sent with the proofs. Orders submitted after the release of an article in print are subject to considerably higher prices.

**Discount subscription prices:**
Members of the American Society of Cytopathology (ASC). Subscription included in membership fee for members of the International Academy of Cytology.

**Back Volumes and Single Issues:** Information on availability and prices of single print issues and print or electronic back volumes can be obtained from Customer Service at service@karger.com.

**Bibliographic Indices:** This journal is regularly listed in bibliographic services, including Current Contents and PubMed/MEDLINE.

**Photocopying:** This journal has been registered with the Copyright Clearance Center (CCC), as indicated by the code appearing on the first page of each article. For readers in the US, this code signals consent for copying of articles for personal or internal use, or for the personal or internal use of specific clients, provided that the stated fee is paid per copy directly to Copyright Clearance Center Inc.

222 Rosewood Drive
Danvers, MA 01923 (USA)

A copy of the first page of the article must accompany payment. Consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. In these cases, specific written permission must be obtained from the copyright owner, S. Karger AG, P.O. Box CH–4009 Basel (Switzerland).

### Subscription Orders:
Orders can be placed at agencies, bookstores, directly with the Publisher or, in the case of photocopying, direct payment of a specified fee to the Copyright Clearance Center.

### Change of Address:
Both old and new address should be sent to the subscription source.

jointly organised by
- German Division of the IAP
- European Society of Pathology
We cordially invite all the pathologists, toxicologists, physicians’ experts and related doctors, professors who are interested in exploring the field of the Cytopathology & Histopathology. At this event, updated information on the advances in Cytopathology & Histopathology will be available, enabling professionals and students interested in Cytopathology to enrich their knowledge to transform the future of this area and to participate in Oral Presentations, Young Researchers Forum and Poster Competition.

Conference Sessions:

- Cancer Cytopathology
- Histopathology
- Diagnostic Cytopathology
- Cervical Cytopathology
- Cytopathology & Disease diagnosis
- Fine Needle Aspiration Cytology
- Molecular Cytopathology
- Urine Cytology
- Gynecological and Breast Cytopathology
- Veterinary Cytopathology
- Cytopathology Case Reports
- General Cytopathology & Immunocytochemistry
- Surgical Cytopathology

Unique Features of Cytopathology 2016

- The Career Guidance Workshops to the Graduates, Doctorates and Post-Doctoral Fellows
- Accepted Abstracts will be published in the respective journals and will be labeled with a Digital Object Identification Number (DOI) provided by Cross Ref (Free abstract publishing).
- Lifetime Speaker and Abstract pages created and indexed in Google on your name, would get worldwide acknowledgment to your profile and Research.
- Group of attendees from the same lab/institute/university (or) anyone who wish to attend the conference will be eligible for discounts.
- For Students Best Poster and Young Researcher Award.

Submit your abstract at:
cytopathology@conferenceseries.net; histopathology@insightconferences.com
Registration Starts from $49-$799
For Accommodation contact:
