Breast translational research has markedly evolved over the past few decades and the emerging knowledge has revolutionized our understanding of breast neoplasms. Novel techniques and concepts in studying breast cancer have been developed. These have contributed to the understanding and recognition of this complex disease.

This special topic issue on Breast Translational Research provides pertinent and succinct reviews on tumor microenvironment, metabolomics, the role of the calpain family of enzymes, the molecular mechanisms of lymphovascular invasion, and predictors of response to neoadjuvant therapy. It proposes and illustrates a new terminology for the practising pathologist who needs to describe a diagnostically challenging group of breast neoplasms showing dermal analogue differentiation. It also evaluates the role of p40 immunohistochemistry in diagnostic breast pathology.

This publication is of special interest to pathologists as well as scientists and members of the breast multidisciplinary team, since it provides a useful overview of pertinent markers and techniques in the field of breast cancer translational research and diagnostic histopathology.

Contents

Editorial
• Breast Translational Research: Past, Present and Future: Shaaban, A.M.

Invited Review
• Molecular Mechanisms Underlying Lymphovascular Invasion in Invasive Breast Cancer: Aleskandarany, M.A.; Sonbul, S.N.; Mukherjee, A.; Rakha, E.A.

• Radiological and Pathological Predictors of Response to Neoadjuvant Chemotherapy in Breast Cancer: A Brief Literature Review: Parekh, T.; Dodwell, D.; Sharma, N.; Shaaban, A.

• Calpain in Breast Cancer: Role in Disease Progression and Treatment Response: Storr, S.J.; Thompson, N.; Pu, X.; Zhang, Y.; Martin, S.G.

• Role of the Tumor Microenvironment in Breast Cancer: Soysal, S.D.; Tzankov, A.; Muenst, S.E.

• Metabolomic Biomarkers for Breast Cancer: Guenther, U.L.

Original Paper
• Evaluation of p40 as a Myoepithelial Marker in Different Breast Lesions: Kővári, B.; Szász, A.M.; Kulka, J.; Marušič, Z.; Šarčević, B.; Tiszlavicz, L.; Cserni, G.

Novel Insights from Research Practice

Author Index/Subject Index
Guidelines for Authors

Submission
Before submission, please read the Guidelines for Authors for specific requirements for manuscript preparation. Manuscripts written in English are considered and should be submitted online at www.karger.com/che (a link leads you to the Submission Website).

Submission of an article implies author agreement with the below Conditions. To be considered for publication, all manuscripts must be accompanied by a cover letter signed by all authors stating that the work has not been published, nor is it under consideration elsewhere, and that all authors approve the submission.

A Copyright Transfer Form, available on the Submission Website, with the corresponding author’s original (handwritten) signature must be received by the editorial office. Please print and sign the form, and upload it during submission (or fax or scan and email) to make it legally binding.

Names, postal and e-mail addresses of 4 international experts in the appropriate area of research should accompany each manuscript. At the Editors’ discretion scientist(s) selected from this list may be invited to act as referee(s). Referees suggested should not be from the same institution as the author.

Presentation of manuscripts should follow the Uniform Requirements for Manuscripts Submitted to Biomedical Journals [see International Committee of Medical Journal Editors. Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication (April 2010 version). Available from: http://www.ICMJE.org].

In case of problems with submission, please contact: che@karger.com

S. Karger AG – Medical and Scientific Publishers
Editorial Office ‘Chemotherapy’
Allschwilerstrasse 10
CH-4009 Basel (Switzerland)
Tel. +41 61 306 1361
Fax +41 61 306 1434

Conditions
All manuscripts are subject to editorial and peer review. Manuscripts are received with the explicit understanding that the work has not been published (wholly or in part), and is not under simultaneous consideration in any language elsewhere. Furthermore, all authors have made substantial contributions and confirm that they have seen and approve the manuscript submission. Submission of an article for publication implies the transfer of the copyright to the corresponding author. Copyright is not transferable. If an article is rejected, the author(s) may suggest the work be submitted to another journal. If accepted, the Editor reserves the right to submit such letters to the authors of the articles concerned prior to publication in order to allow them to respond in the same issue of the journal. In exceptional cases, Letters to the Editor may also address data published in another journal or general subjects related to matters discussed in the journal. No abstract is required (maximum 1,200 words).

Arrangement
The preferred word processing program is MS-Word. The cover letter, the manuscript, the tables and the figures must be submitted in separate files. The manuscript file must contain all the text elements in the following order: title page, abstract and key words, main text, acknowledgments, references, table and figure legends. Tables and figures should be submitted as separate files according to the instructions below. Automatic line numbering should be used consecutively from the title page through to the final page. All pages should be numbered, starting from the title page, including tables, figure legends and figures.

Title page: The first page should contain the concise title of the article along with a short title for use as a running head, the full names of the authors and their affiliations (department, institute, hospital, university etc. where the work was conducted). The full postal address, telephone and fax numbers, as well as the e-mail address of the author to whom correspondence should be sent must be given at the bottom of the title page.

Key words: Please supply 3–10 key words that reflect the content of the paper.

Abstract: Each original paper needs an abstract of up to 250 words structured with subheadings as follows: Background/Aims, Methods, Results, Conclusions. Structured abstracts are not needed for Reviews and Novel Insights from Clinical Practice.

Footnotes: Footnotes should be avoided. When essential, they should be numbered consecutively and appear at the foot of the appropriate page.

Acknowledgements: Include all sources of funding for the research presented in the manuscript and substantive contributions of individuals regarding the research or manuscript. All possible conflicts of interest should also be given here.

Abbreviations: Abbreviations (with the exception of those clearly well-established in the field) should be explained when they are first used.

Units of measurement: Measurements should be expressed in SI units wherever possible.

Drug names: Use generic names of drugs (first letter: lowercase) whenever possible. Registered trade names (first letter: uppercase) should be marked with the superscript registration symbol ® or ™ when they are first mentioned.

Tables and illustrations: Tables and figures must be numbered (e.g. Figure 1, Figure 2) and submitted as separate files. Tables require a heading and a figure, a legend, which must provide sufficient information for either to stand alone. Each table and figure must be cited in the text numerically. Tables should be in Word format. b/w half-tone and color figures must have a final resolution of 300 dpi after scaling to final size, line drawings 1200 dpi. Color figures must be in RGB format. All figures should be in a common format such as PDF, TIF, PNG, EPS or WMF. Vector graphics should be in PPT, AI or EPS format.

Ethics
Research must comply with the guidelines for human studies and animal welfare regulations. Manuscripts reporting studies on human subjects should include evidence that the research was ethically conducted in accordance with the Declaration of Helsinki (World Medical Association; http://www.wma.net/en/30publications/10policies/b3/index.html). In particular, authors should state in the Materials and Methods section that subjects have given their informed written consent and that the study protocol was approved by an appropriate ethics committee. All patients should be identified by numbers or aliases, not by their real names. Authors should also state that animal experimentation was approved by an independent ethics committee. Copies of these guidelines and policy statements must be available for review by the editors if necessary.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. Karger Publishers defines plagiarism as reproduction of another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Sections
Authors should indicate in the cover letter which manuscript type is being submitted for publication:

Original Papers: Fully documented reports of original research that must describe full sets of significant, original experiments in current anti-infective and antitumor chemotherapy research. Abstract, Introduction, Materials and Methods, Results, and Discussion sections are required. Consideration for publication is based on originality, novelty, scientific soundness, and appropriate analysis (maximum 3,000 words, 80 references, plus tables/figures).

Reviews: Comprehensive, state-of-the-art papers covering a timely topic by experts in the field (maximum 4,000 words, plus tables/figures, references). Reviews are usually invited by the Editor but may be unsolicited. Authors are asked to contact the Editor-in-Chief before submission in order to avoid clashes with other pending reviews. All review manuscripts are subject to peer review. An unstructured abstract of no more than 200 words is required.

Novel Insights from Clinical Practice: The journal only considers case reports that provide significant new insights into a clinical or pre-clinical situation that must describe full sets of significant, original experiments in current anti-infective and antitumor chemotherapy research. Abstract, Introduction, Materials and Methods, Results, and Discussion sections are required. Consideration for publication is based on originality, novelty, scientific soundness, and appropriate analysis (maximum 150 words), introduction, case report and discussion section (maximum 2,000 words, maximum 2 tables or figures). Boxes containing bulleted points, established facts (what is already known) and Novel Insights (new information gained) are required on the first page of the report. These should highlight the novelty of the clinical observation.

Short Communications: Short reports, brief laboratory observations, and preliminary communications can be submitted for accelerated publication under Short Communications. They must present new findings of sufficient importance to justify their accelerated acceptance. Such communications should represent complete, original studies and should be arranged in the same way as full length manuscripts (maximum 1,600 words).

Letters to the Editor: Letters to the Editor are encouraged if they directly concern articles recently published in this journal. If accepted, the Editor reserves the right to submit such letters to the authors of the articles concerned prior to publication in order to allow them to respond in the same issue of the journal. In exceptional cases, Letters to the Editor may also address data published in another journal or general subjects related to matters discussed in the journal. No abstract is required (maximum 1,200 words).
Digital Object Identifier (DOI)

A DOI number will be available as a unique identifier on the title page of each article. DOIs are useful for identifying and citing articles published online without volume or issue information (for more information, see www.doi.org).

Self-Archiving/Green Open Access

Karger permits authors to archive their pre-prints (i.e. peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com

Include the following statement:

'This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogeten Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)']. The final, published version is available at http://www.karger.com/doi [insert DOI number].

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author's behalf (see Funding Organizations (NIH etc.)).

For self-archiving, Author's ChoiceTM (Gold Open Access) articles, see Author's ChoiceTM.

Author's ChoiceTM

Karger's Author's ChoiceTM service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. Funding Organizations (NIH etc.) may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com

Include the following statement:

'This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation]. The final, published version is available at http://www.karger.com/doi [insert DOI number].

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Copy Editing

Manuscripts accepted for publication by Karger Publishers are subject to copy editing.

Proofs

An email containing a link to download the proofs will be sent to the corresponding author. Proofs should be returned within 48 hours. Alterations made in proofs, other than the correction of printer's (introduced) errors, are charged to the author and may require editorial approval.

Page Charges

There is no page charge for papers of 3 or fewer printed pages (including tables, illustrations and references). Authors are charged CHF 325.00 for each additional complete or partial printed page.

Reprints

An order form with a price list can be requested when returning the corrected proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Adolescents and Young Adults with Hematological Disorders
Challenges and Perspectives

Editors
Martin S. Tallman
Pia Raanani

The distinct biology of haematological disorders as well as other age-related issues in adolescent and young adult (AYA) patients deserves unique psychological and medical attention. It emphasizes the necessity for a treatment approach taking into consideration their special needs. These include fertility considerations, survivorship issues, psychological support, adherence to treatment difficulties and other dilemmas and problems exclusive to this group of patients. AYA patients may usually better support intensive treatments and if possible should be referred to special centres and participate in clinical trials. In recent years the focus on AYA patients in oncology and hemato-oncology has increased. Still a distinct approach to these patients is an unmet need.

This special issue tries to increase awareness for this group of patients as well as to cover the wide spectrum of hematological disorders that is pertinent to AYA patients who face special therapeutic challenges. This publication is of interest for physicians dealing with AYA, especially in the field of hematology and oncology, as well as paramedical staff including nurses, psychologists, social workers and pharmacists.

Contents
- The Challenges and Perspectives in Treating Adolescent and Young Adult Patients with Hematological Disorders: Raanani, P.; Tallman, M.S.
- Acute Lymphoblastic Leukemia in Adolescents and Young Adults: Burke, P.W.; Douver, D.
- The Challenging Aspects in Managing Adolescents and Young Adults with Hodgkin’s Lymphoma: Jachimowicz, R.D.; Engert, A.
- Adolescents and Young Adults with Non-Hodgkin’s Lymphoma: Slipping between the Cracks: Wolach, O.; Ram, R.
- Acute Myeloid Leukemia in Adolescents and Young Adults: Challenging Aspects: Ofman, Y.; Rowe, J.M.
- Chronic Myeloid Leukemia in Adolescents and Young Adults: Patient Characteristics, Outcomes and Review of the Literature: Pemmaraju, N.; Cortes, J.
- Acute Promyelocytic Leukemia in Children and Adolescents: Stein, E.M.; Tallman, M.S.
- Hematopoietic Stem Cell Transplantation in Adolescents and Young Adults: Tewari, P.; Franklin, A.R.; Tarek, N.; Askins, M.A.; Molfield, S.; Kebriaei, P.
- Challenging Aspects of Managing Hemostasis in Adolescents: Nowak-Göttli, U.; Kenet, G.
- Aplastic Anemia in Adolescents and Young Adults: DeZern, A.E.; Guinan, E.C.
- Thalassemia Major and Sickle Cell Disease in Adolescents and Young Adults: Yacobovich, J.; Tamary, H.
- Adherence-Related Issues in Adolescents and Young Adults with Hematological Disorders: Leader, A.; Raanani, P.
- Nursing Care for Adolescents and Young Adults with Cancer: Literature Review: Dreyer, J.; Schwartz-Attias, I.
- Peer and Romantic Relationships among Adolescent and Young Adult Survivors of Childhood Hematological Cancer: A Review of Challenges and Positive Outcomes: Foster, R.H.; Stern, M.
- Survivorship in Adolescents and Young Adults: Kishnagari, A.; Tavassolli, M.; Park, J.H.
- Cardiotoxicity and Cardioprotection in Childhood Cancer: Lipshultz, S.E.; Sambatakos, P.; Maguire, M.; Karnik, R.; Ross, S.W.; Franco, V.J.; Miller, T.L.
- Fertility Preservation in Young Females with Hematological Malignancies: Shapira, M.; Raanani, H.; Cohen, Y.; Meirow, D.
- Challenges for Cancer Care Delivery to Adolescents and Young Adults: Present and Future: Meeneghan, M.R.; Wood, W.A.

Emerging Strategies for the Management of Hepatocellular Carcinoma

The 4th International Kyoto Liver Cancer Symposium (4th IKLS)

Editor
M. Kudo

Contents

Preface

• Emerging Strategies for the Management of Hepatocellular Carcinoma: Kudo, M.

Original Articles

• Epidemological Trends of Hepatocellular Carcinoma in Austria: Pinter, M.; Hucke, F.; Zielonke, N.; Trauner, M.; Sieghart, W.; Peck-Radosavljevic, M.

Review Articles

• Ultrasound Fusion Imaging of Hepatocellular Carcinoma: A Review of Current Evidence: Minami, Y.; Kudo, M.

• Focal Lesions in the Cirrhotic Liver: Their Pivotal Role in Gadoxetic Acid-Enhanced MRI and Recognition by the Western Guidelines: Goffielli, R.; Garzillo, G.; Ascanio, S.; Renzulli, M.

Original Articles

• The ART Score is Not Effective to Select Patients for Transarterial Chemoembolization Retreatment in an Italian Series: Terzi, E.; Terenzi, L.; Venerandi, L.; Croci, L.; Renzulli, M.; Mosconi, C.; Allegretti, G.; Granito, A.; Goffielli, R.; Bolondi, L.; Piscaglia, F.

• Prognostic Values of Vascular Endothelial Growth Factor and Matrix Metalloproteinase-2 in Hepatocellular Carcinoma after Radiotherapy: Suh, Y.-G.; Lee, E.-J.; Cha, H.; Yang, S.-H.; Seong, J.

Review Articles

• Adjuvant Therapy for Hepatocellular Carcinoma after Curative Treatment: Jeng, W.-J.; Lin, C.-C.; Chen, W.-T.; Sheen, F.-S.; Lin, C.-Y.; Lin, S.-M.

• Considerations for Radiation Therapy in Hepatocellular Carcinoma: The Radiation Oncologists’ Perspective: Yu, J.I.; Park, H.C.

• 2014 KLCG-NCC Korea Practice Guidelines for the Management of Hepatocellular Carcinoma: HCC Diagnostic Algorithm: Lee, J.M.; Park, J-W.; Choi, B.I.

• Hepatocellular Carcinomas Expressing Stemness-Related Markers: Clinico-pathological Characteristics: Kim, H.; Park, Y.N.

• Clinical Features of Vascular Disorders Associated with Chronic Hepatitis Virus Infection: Nishida, N.; Kudo, M.

The *Journal of Innate Immunity* is a bimonthly journal covering all aspects within the area of innate immunity, including evolution of the immune system, molecular biology of cells involved in innate immunity, pattern recognition and signals of ‘danger’, microbial corruption, host response and inflammation, mucosal immunity, complement and coagulation, sepsis and septic shock, molecular genomics, and development of immunotherapies. The journal publishes original research articles, short communications, reviews, commentaries and letters to the editors. In addition to regular papers, some issues feature a special section with a thematic focus.

**Journal of Innate Immunity**

*Founded: 2008*

*Category: Basic and Clinical Research*

*Field of Interest: Immunology*

Listed in bibliographic services, including *Journal Citation Reports*, PubMed/MEDLINE, Biological Abstracts, EMBASE

2016: *Volume 8*

6 issues per volume

Language: English

ISSN 1662–811X
e-ISSN 1662–8128

*Impact Factor 4.352*

**Editors-in-Chief**

Heiko Herwald, Lund

Arne Egesten, Lund

**Selected contributions**

- Long-Lasting Effects of BCG Vaccination on Both Heterologous Th1/Th17 Responses and Innate Trained Immunity: Kleijnjehuis, J.; Quintin, J.; Preijers, F. (Nijmegen); Benn, C.S. (Copenhagen); Joosten, L.A.B.; Jacobs, C.; van Loenhout, J. (Nijmegen); Xavier, R.J. (Boston, Mass./Cambridge, Mass.);

- Aaby, P. (Copenhagen); van der Meer, J.W.M.; van Crevel, R.; Netea, M.G. (Nijmegen)

- Interferon-λ in the Context of Viral Infections: Production, Response and Therapeutic Implications: Hermant, P.; Michiels, T. (Brussels)

- The M1 Protein of *Streptococcus pyogenes* Triggers an Innate Uptake Mechanism into Polarized Human Endothelial Cells: Ochel, A.; Rohde, M.; Chhatwal, G.S.; Talay, S.R. (Krausischweg)

- Tissue-Specific Patterning of Host Innate Immune Responses by *Staphylococcus aureus* α-Toxin: Becker, R.E.N.; Berube, B.J.; Sampredo, G.R.; DeDent, A.C.; Bubeck Wardenburg, J. (Chicago, Ill.)

- M1 and M2 Macrophages: The Chicken and the Egg of Immunity: Mills, C.D. (Marine on St. Croix, Minn.); Ley, K. (La Jolla, Calif)
