Highlights in this issue:

- **Large Size Hemicraniectomy Reduces Early Herniation in Malignant Middle Cerebral Artery Infarction**
  Neugebauer, H.; Fiss, I.; Pinczolits, A.; Hecht, N.; Witsch, J.; Dengler, N.F.; Vajkoczy, P.; Jüttler, E.; Woitzik, J.

- **Endovascular Management of Acute Ischemic Strokes with Tandem Occlusions**

- **Endovascular Treatment of Acute Ischemic Stroke Due to Tandem Occlusions: Large Multicenter Series and Systematic Review**
Interest in the history of neurological science has increased significantly during the last decade, but the significance of war has been overlooked in related research. In contrast, this book highlights war as a factor of progress in neurological science. Light is shed on this little-known topic through accounts given by neurologists in war, experiences of soldiers suffering from neurological diseases, and chapters dedicated to neurology in total and contemporary war.

Written by experts, the contributions in this book focus on the Napoleonic Wars, the American Civil War, the Franco-Prussian War of 1870, World Wars I and II, and recent conflicts such as Vietnam or Afghanistan.

Comprehensive yet concise and accessible, this book serves as a fascinating read for neurologists, neurosurgeons, psychiatrists, historians, and anyone else interested in the history of neurology.

Contents

Preface: Tatu, L.; Bogousslavsky, J.

Early Neurology and War
- Neurology and War: From Antiquity to Modern Times: Paciaroni, M.; Arnao, V.
- Neurosurgical Work during the Napoleonic Wars: George James Guthrie’s Experience: Roux, F.-E.

War as a Factor of Neurological Progress
- Impact of 20th Century Wars on the Development of Neurosurgery: Dowdy, J.; Palt, T.G.
- Elaboration of the Visual Pathways from the Study of War-Related Cranial Injuries: The Period from the Russo-Japanese War to World War I: Lanska, D.J.
- Publications on Peripheral Nerve Injuries during World War I: A Dramatic Increase in Knowledge: Koehler, P.J.
- The Influence of the Two World Wars on the Development of Rehabilitation for Spinal Cord Injuries in the United States and Great Britain: Lanska, D.J.
- Traumatic Brain Injury Studies in Britain during World War II: Lanska, D.J.

Neurologists during Wars
- Neurology and Neurologists during the Franco-Prussian War (1870–1871): Walusinski, O.
- Silas Weir Mitchell: Neurologists and Neurology during the American Civil War: Boller, F.; Birnbaum, D.
- French Neurologists during World War I: Walusinski, O.; Tatu, L.; Bogousslavsky, J.
- German Emergency Care in Neurosurgery and Military Neurology during World War II, 1939–1945: Stahnisch, F.W.

War Neuropsychiatry: Soldiers’ Experiences
- Nostalgia in the Army (17th–19th Centuries): Battesti, M.
- Neuropsychiatric Disturbances, Self-Mutilation and Malingering in the French Armies during World War I: War Strain or Cowardice?: Tatu, L.; Bogousslavsky, J.
- Neurological Impact of World War I on the Artistic Avant-Garde: The Examples of André Breton, Guillaume Apollinaire and Blaise Cendrars: Bogousslavsky, J.; Tatu, L.

Neurology in Total War
- The Central Role of Neuroscientists under National Socialism: Zeidman, L.A.
- What’s in a Name? Neurological Eponyms of the Nazi Era: Kondziella, D.; Zeidman, L.A.

Contemporary Aspects
- Neurology in the Vietnam War: Gunderson, C.H.; Daroff, R.B.
- Neurotoxic Weapons and Syndromes: Carota, A.; Calabrese, P.; Bogousslavsky, J.
- Post-Traumatic Stress Disorder among French Armed Forces Members in Afghanistan: A New Approach: Paul, F.; Marimoutou, C.; Pommier de Santi, V.; Clervoy, P.

Cerebrovascular Diseases

Submission
Cerebrovascular Diseases only accepts online submissions to:
http://mc.manuscriptcentral.com/cedi

All further technical instructions can be found there.

Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (www.icmje.org).

Recommended reading:
- How to Improve the Quality of Reports of parallel-group randomized trials. The CONSORT Statement. www.consort-statement.org

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Cerebrovascular Disease and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflicts of Interest
Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the bottom of the title page.

Ethics
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Categories of Manuscripts
Original Papers are full-length research papers which will be considered for the journal. Articles cover topics relevant to clinical studies. Basic and experimental work appear only if directly related to clinical issues (max. 3,000 words).

Reviews are comprehensive, state-of-the-art papers of important clinical problems. Reviews may be invited by the Editor or they may be unsolicited views (max. 5,000 words). An Abstract is required and should be divided into Background, Summary and Key Messages. Editorial views are usually invited by the Editor (max. 1,000 words). Please send suggestions to the Editor.

Translational Research in Stroke is a new section in the journal publishing reviews on experimental results with direct clinical implications (max. 3,000 words). Articles in this section may be accompanied by an invited comment (max. 1,000 words).

Imaging is a new section in the journal covering timely papers on cerebrovascular imaging by experts in the field (max. 3,000 words incl. figures and tables, and max. 40 references). Proposals to the Editor are welcome.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation.

If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Arrangement
Title page: The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs a detailed and structured abstract of 400 words. This should include the following information: Background: the problem that prompted the study and the purpose of the study; Methods: data sources, subjects, design, measurements, data analysis; Results: most important findings; Conclusions: implications, future directions.

Abstracts of Reviews: Should be divided into the following subsections: Background, Summary and Key Messages. The Background should provide a brief clinical context for the review and is followed by the Summary, which should include a concise description of the main topics covered in the text. The Key Messages encapsulate the main conclusions of the review.

Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 180 × 223 mm) or provide crop marks. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References
In the text identify references by Arabic numerals [in square brackets]. Journotes submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform Requirements for Manuscripts Submitted to Biomedical Journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and eosinopenia in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, avi, .mpeg).

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

• Be used for noncommercial purposes only
• Be linked to the final version on www.karger.com
• Include the following statement:

Guidelines for Authors

KARGER © 2016 S. Karger AG, Basel

E-Mail karger@karger.com

www.karger.com

The Guidelines for Authors are available at:

www.karger.com/cedi_Guidelines
This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361093)]. The final, published version is available at http://www.karger.com/doi=[insert DOI number].

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Kar-ger on the author’s behalf (see Funding Organizations (NIH etc.).

For self-archiving Author’s Choice™ (Gold Open Access) articles, see Author’s Choice™.

Author’s Choice™

Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reprinted Open Access articles must:

• Follow the terms of the relevant Creative Commons license
• Be linked to the final version on www.karger.com
• Include the following statement: ‘The final, published version of this article is available at http://www.karger.com/doi=[insert DOI number].’

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)

The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication.

The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and BCUK) for submission to PMC. Authors should include information on their grants in the Acknowl-edgements section of their papers.

Page Charges

There are no page charges for papers of 3 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 13 manuscript pages (including tables, illustrations and references).

Proofs

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints

Order forms and a price list for reprints are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Disclaimer: The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements and/or products referred to in the content or the journal is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety.
