For the first time the editors of this volume have brought together text, illustrations and high-definition videos to create an expert video atlas in the field of pediatric airway surgery. The publication which includes the book and free online access to the videos provides a detailed review of the pros and cons and clinical pearls involved in various modes of pediatric airway surgery.

Discussed are all the main open airway surgeries including laryngotracheal reconstruction, cricotracheal resection, tracheal resection and re-anastomosis, and slide tracheoplasty. Further covered is a range of endoscopic procedures such as endoscopic repair of laryngeal clefts and endoscopic treatment of vocal fold immobility. The high-definition videos with audio overlay and the text complement provide an excellent detailed instruction manual for surgeons willing to carry out these operations.

This publication is designed for all levels, from medical student through residency and fellowship as well as the pediatric otolaryngologist or pediatric surgeon preparing for pediatric airway surgery.

Submissions
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/aud
Should you have any problems with your submission, please contact the Editorial Office:
aud@karger.com
Jeffrey P. Harris, MD, Ph.D.
S. Karger AG
Editorial Office 'Audiology and Neurotology'
P.O. Box
CH–4009 Basel (Switzerland)
Please include the names, postal and e-mail addresses of four experts in the appropriate area of research either from the editorial board or elsewhere. Selected scientists will be invited to act as referee(s) by the editors.
For any further details please contact Audiology & Neurotology's Editorial Office:
Tel. +41 61 306 1358
Fax +41 61 306 1434
E-Mail aud@karger.com

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration or have been rejected by any other publication. Accepted papers become the permanent property of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Research involving live human and animal subjects must have been approved by the author's institutional review board. All clinical investigations must have been conducted according to the principles expressed in the Declaration of Helsinki. Contributors should know that one of the criteria considered in reviewing manuscripts is the humane and proper treatment of animals. The editors realize that the use of anesthetics, analgesics, and tranquilizers would defeat the purpose of some experiments. However, the use of painful or otherwise noxious stimuli must be carefully and thoroughly justified. Papers that do not meet these criteria will not be accepted for publication.

Types of Papers
Papers of the following types are considered for publication:
• Original Paper
• Review
• Mini Review
• Editorial

Guidelines for Authors

Conflicts of Interest
Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Arrangement
Title page: The first page of each paper should indicate the title, authors' names, institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential.

Abstract: Each paper needs an abstract in English of up to 10 lines.

Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be stored in separate files. Tables require a heading and figures a legend, also in separate files. Labels of illustrations should begin with an upper-case letter and be centered; units should be in parentheses. For graphs containing coordinates (plots) please conform to the sample figure shown in the Guidelines for Authors at: www.karger.com/aud_Guidelines. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 22.3 mm). B/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

Terminology: Authors are advised to use the terminology recommended by the ISO-IEC, Nomina Anatomica and WHO list of approved names for drugs.

Abbreviations: Their use should be limited and they should be explained when first mentioned.

Audiograms: All audiograms must be plotted according to ISO standards.

References: Identify references [in square brackets] in the text by naming the authors and the year. 1 author: [Forsten, 1990]; 2 authors: [Geddes and Rølla, 1988]; 3 and more authors: [Hållgren et al., 1992]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and may not be included in the reference list. The list of references should include only those publications cited in the text. Arrange the reference list in strict alphabetical order according to the examples given below. The authors' surnames follow by their initials should be given, and each name should be separated by a comma. Preferably, please cite all authors. For papers by the same authors, listing should be according to the year; for papers by the same authors published in the same year, use the letters a, b, etc. directly (no space) connected to the year. For journal abbreviations, please use the Index Medicus system. For details see www.icmje.org.

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
• Be used for noncommercial purposes only
• Be linked to the final version on www.karger.com
• Include the following statement: ‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogetengen Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number].’

It is the author's responsibility to fulfill these requirements. For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author's behalf [see Funding Organizations (NIH etc.)].

For self-archiving Author's Choice™ (Gold Open Access) articles, see Author's Choice™

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and

Reviews and Mini Reviews
Most (Mini) Reviews are submitted upon invitation. However, the editors are open to unsolicited (Mini) Reviews. Authors planning to submit a (Mini) Review are requested to contact the Editorial Office with an outline of the intended contribution. All (Mini) Reviews are subject to peer review.
conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™

Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice. The final, published version of the article may be posted in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:

- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement:
  "The final, published version of this article is available at http://www.karger.com?doi=[insert DOI number]."

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
There are no page charges for papers of 4 or fewer printed pages (including tables, illustrations and references). A charge of CHF 650.00 will be levied for each page in excess of the allotted 4 printed pages. The allotted size of a paper is equal to approx. 10 manuscript pages (double-spaced, including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the first-named author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author. No page proofs are supplied.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

‘A collection of extraordinary essays’

GOTTFRIED SCHATZ

A MATTER
OF WONDER

What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. These essays on key issues in the natural sciences will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

Excellence in Otolaryngology
70 Years of the Department of Otolaryngology of the Sapporo Medical University

Editors
Tetsuo Himi
Kenichi Takano

This volume is dedicated to the 70th anniversary of the Department of Otolaryngology of the Sapporo Medical University. It commemorates this landmark event and honors the department’s rich tradition of excellence. Chapters feature results of clinical and basic research conducted at the university. The carefully selected articles – ten clinical reviews, ten original research papers, and one case report – reflect the wide range of specialties fields within the department. Topics covered include otology, allergy and rhinology, ophthalmology, sleep medicine, and tonsils.

This book is a comprehensive, inspiring contribution to the celebration of one of the oldest departments within the Sapporo Medical University. It contains valuable information for new and experienced otolaryngologists, neurotologists, and all new specialists.

Contents
Preface: Himi, T.

Otolaryngology
- Clinical Review of Cochlear Implantation Performed at Sapporo Medical University Hospital: Ogawara, N.; Takano, K.; Shintani, T.; Saikawa, E.; Takahashi, N.; Ito, F.; Himi, T.
- Congenital Microtia Treated at Sapporo Medical University Hospital: Clinical Characteristics and Associated Anomalies: Ogawa, N.; Jitsukawa, S.; Takahashi, N.; Takano, K.; Himi, T.
- Relationship between Otitis Media and Epithelial Function in the Lymphoepithelium of Pediatric Adenoids: Ogawara, N.; Yamamoto, K.; Takano, K.; Himi, T.

Allergy and Rhinology
- Role of Cysteinyl Leukotrienes in Allergic Rhinitis: Shintani, T.; Abe, A.; Tsubomatsu, C.; Himi, T.

Oncology
- A Clinical Review of Thyroid Cancer at Sapporo Medical University Hospital: Kurose, M.; Takano, K.; Obata, K.; Yamamoto, K.; Murayama, K.; Himi, T.

Sleep Medicine and Tonsils
Bilateral vestibular loss often goes unrecognized by doctors and, as a result, many patients consult a variety of specialists before being referred to the correct diagnostic team. The publication starts with a discussion of vestibular problems and the difficulties faced by patients suffering from total bilateral vestibular loss. The first part of this chapter provides exclusive updates in developing this theory for patients with total bilateral vestibular loss. The second part covers in detail the practical applications of the theory in animal models and the first applications in humans. So far, demonstrations have shown that at least partial restoration of vestibular function is possible in some cases with cochlear implants. The publication is meant to enhance the awareness of those professionals and bring them up to date on the latest research and results.

Contents
- Bilateral Vestibular Hypofunction: Challenges in Establishing the Diagnosis in Adults
- Perception of Discomfort Caused by a Unilateral Hearing Loss in People Suffering from Total Bilateral Vestibular Loss
- Difficulties Faced by Patients Suffering from Total Bilateral Vestibular Loss
- Vestibular Implant: 8 Years of Experience with 11 Patients
Mini Review

69 Mini Review of the Cost-Effectiveness of Unilateral Osseointegrated Implants in Adults: Possibly Cost-Effective for the Correct Indication
Crowson, M.G.; Tucci, D.L. (Durham, N.C.)

113 A Systematic Review to Define the Speech and Language Benefit of Early (<12 Months) Pediatric Cochlear Implantation
Bruijnzeel, H.; Ziylan, F.; Stegeman, I.; Topsakal, V.; Grolman, W. (Utrecht)

Original Papers

72 Intracochlear Drug Injections through the Round Window Membrane: Measures to Improve Drug Retention
Plontke, S.K. (Halle (Saale)); Hartsock, J.J.; Gill, R.M.; Salt, A.N. (St. Louis, Mo.)

80 Cerebral Processing of Emotionally Loaded Acoustic Signals by Tinnitus Patients
Georgiewa, P.; Szczepek, A.J.; Rose, M.; Klapp, B.E.; Mazurek, B. (Berlin)

88 Histopathology of the Human Inner Ear in the p.L114P COCH Mutation (DFNA9)
Burgess, B.J.; O’Malley, J.T.; Kamakura, T.; Kristiansen, K.; Robertson, N.G. (Boston, Mass.); Morton, C.C. (Boston, Mass./Cambridge, Mass./Manchester); Nadol Jr., J.B. (Boston, Mass.)

98 Implantation of the Auditory Nerve via the Middle Ear Cavity in Rats with Partial Hearing Preservation
Guigou, C.; Leterme, G.; Pasquis, B.; Martin, L. (Dijon); Tourrel, G. (Vallauris); Bretillon, L.; Bozorg Grayeli, A. (Dijon)

105 Long-Term Outcome Data in Patients following One Year’s Use of a Fully Implantable Active Middle Ear Implant
Uhler, K. (Aurora, Colo.); Anderson, M.C. (Boulder, Colo.); Jenkins, H.A. (Aurora, Colo.)
