Therapy of Hepatitis B Virus Infections – Potential and Limitations

Editors
W.H. Gerlich
D. Glebe
L.G. Gürtler
R. Kaiser

Contents
Preface

Background on Hepatitis B Virus
Molecular Virology of Hepatitis B Virus and Targets for Antiviral Intervention: Glebe, D.; König, A.
Genotypes and Genetic Variability of Hepatitis B Virus: Kramvis, A.

Therapeutic Targets
Inhibitors of Hepatitis B Virus Attachment and Entry: Lempp, F.A.; Urban, S.
Host Factor-Targeted Hepatitis B Virus Therapies: Gehring, A.; Bertoletti, A.; Tavis, J.E.

Clinical Applications
Antiviral Therapy of Chronic Hepatitis B: van Bömmel, F.
Therapy of Acute and Fulminant Hepatitis B: Tillmann, H.L.; Patel, K.
Therapy of Occult Hepatitis B Virus Infection and Prevention of Reactivation: Raimondo, G.; Filomia, R.; Maimone, S.
Prevention of Hepatitis B Virus Reinfection in Liver Transplant Recipients: Roche, B.; Samuel, D.
Reduction of Infectivity in Chronic Hepatitis B Virus Carriers among Healthcare Providers and Pregnant Women by Antiviral Therapy: Gerlich, W.H.
Effect of Antiretroviral HIV Therapy on Hepatitis B Virus Replication and Pathogenicity: Gürtler, L.G.

Resistant
Selected Phenotypic Assays Used to Evaluate Antiviral Resistance and Viral Fitness of Hepatitis B Virus and Its Variants: Glebe, D.; Geipel, A.

orders@karger.com, f +41 61 306 12 34
www.karger.com
Submission
Before submission, please read the Guidelines for Authors for specific requirements for manuscript preparation. Manuscripts written in English are considered and should be submitted online at www.karger.com/che (a link leads you to the Submission Website).

Submission of an article implies author agreement with the below Conditions. To be considered for publication, all manuscripts must be accompanied by a cover letter signed by all authors stating that the work has not been published, nor is it under consideration elsewhere, and that all authors approve the submission. A Copyright Transfer Form, available on the Submission Website, with the corresponding author's original (handwritten) signature must be received by the editorial office. Please print and sign the form, and upload it during submission (or fax or scan and email) to make it legally binding.

Names, postal and e-mail addresses of 4 international experts in the appropriate area of research should accompany each manuscript. At the Editors' discretion, scientist(s) selected from this list may be invited to act as referee(s). Referees suggested should not be from the same institution as the author. Presentation of manuscripts should follow the Uniform Requirements for Manuscripts Submitted to Biomedical Journals [see International Committee of Medical Journal Editors. Uniform Requirements for Manuscripts Submitted to Biomedical Journals: Writing and Editing for Biomedical Publication (April 2010 version). Available from: http://www.ICMJE.org]. In case of problems with submission, please contact: che@karger.com

S. Karger AG – Medical and Scientific Publishers
Editors Office 'Chemotherapy'
Allschwilerstrasse 10
CH – 4009 Basel (Switzerland)
Tel. +41 61 306 1361
Fax +41 61 306 1434

Conditions
All manuscripts are subject to editorial and peer review. Manuscripts are received with the explicit understanding that the work has not been published (wholly or in part), and is not under simultaneous consideration in any language elsewhere. Furthermore, all authors have made substantial contributions and confirm that they have seen and approved the manuscript submission. Submission of an article for publication implies the transfer of the copyright to the corresponding author. All authors must be in agreement with the content of the paper. If there are any conflicts of interest, the authors must state them clearly in the manuscript.

Transparency
All manuscripts must include a section that subjects have given their informed consent for the research and that the research complied with the appropriate regulations. Manuscripts reporting studies on human subjects should include evidence that the research was ethically conducted in accordance with the Declaration of Helsinki (World Medical Association; http://www.wma.net/en/30publications/10policies/b3/index.html). In particular, authors should state in the Materials and Methods section that subjects have given their informed consent and that the study protocol was approved by an appropriate ethics committee. All patients should be identified by numbers or aliases, not by their real names. Authors should also state that animal experimentation was approved by an independent ethics committee. Copies of these guidelines and policy statements must be available for review by the editors if necessary.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. Karger Publishers defines plagiarism as reproduction of another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Sections
Authors should indicate in the cover letter which manuscript type is being submitted for publication:

Original Papers: Fully documented reports of original research that must describe full sets of significant, original experiments in current anti-infective and antitumor chemotherapy research. Abstract, Introduction, Materials and Methods, Results, and Discussion sections are required. Consideration for publication is based on originality, novelty, scientific soundness, and appropriate analysis (maximum 3,000 words, 80 references, plus tables/figures).

Reviews: Comprehensive, state-of-the-art papers covering a timely topic by experts in the field (maximum 4,000 words, plus tables/figures, references). Reviews are usually invited by the Editor but may be unsolicited. Authors are asked to contact the Editor-in-Chief before submission in order to avoid clashes with other pending reviews. All reviews are subject to peer review. An unstructured abstract of no more than 200 words is required.

Novel Insights from Clinical Practice: The journal only considers case reports that provide significant new insights into a clinical problem or an extremely unusual clinical course. Submissions can be based around a case or a number of similar cases. The most important aspect of the presentation is that it should provide a new perspective on a recognized clinical scenario or may represent an entirely new clinical condition. The novel aspects of the case(s) may be in the phenotype, the presentation, the investigation and/or the management. The manuscript should contain an unstructured abstract (maximum 150 words), introduction, case report and discussion section (maximum 2,000 words, maximum 2 tables or figures). Boxes containing bulleted points on Established Facts (what is already known) and Novel Insights (new information gained) are required on the first page of the report. These should highlight the novelty of the clinical observation.

Short Communications: Short reports, brief laboratory observations, and preliminary communications can be submitted for accelerated publication under Short Communications. They must present new findings of sufficient importance to justify this accelerated acceptance. Such communications should represent complete, original studies and should be arranged in the same way as full length manuscripts (maximum 1,600 words).

Letters to the Editor: Letters to the Editor are encouraged if they directly concern articles recently published in this journal. If accepted, the Editor reserves the right to submit such letters to the authors of the articles concerned prior to publication in order to allow them to respond in the same issue of the journal. In exceptional cases, Letters to the Editor may also address data published in another journal or general subjects related to matters discussed in the journal. No abstract is required (maximum 1,200 words).

Arrangement
The preferred word processing program is MS-Word. The cover letter, the manuscript, the tables and the figures must be submitted in separate files. The manuscript file must contain all the text elements in the following order: title page, abstract and key words, main text, acknowledgments, references, table and figure legends. Tables and figures should be submitted as separate files according to the instructions below. Automatic line numbering should be used consecutively from the title page through to the final page. All pages should be numbered, starting from the title page, including tables, figure legends and figures.

Title page: The first page should contain the concise title of the article along with a short title for use as a running head, the full names of the authors and their affiliations (department, institute, hospital, university etc. where the work was conducted). The full postal address, telephone and fax numbers, as well as the e-mail address of the author to whom correspondence should be sent must be given at the bottom of the title page.

Key words: Please supply 3–10 key words that reflect the content of the paper.

Abstract: Each original paper needs an abstract of up to 250 words structured with subheadings as follows: Background/aims, Methods, Results, Conclusions. Structured abstracts are not needed for Reviews and Novel Insights from Clinical Practice.

Footnotes: Footnotes should be avoided. When essential, they should be numbered consecutively and appear at the foot of the appropriate page.

Acknowledgements: Include all sources of funding for the research presented in the manuscript and substantive contributions of individuals regarding the research or manuscript. All possible conflicts of interest should also be given here.

Abbreviations: Abbreviations (with the exception of those clearly well-established in the field) should be explained in the bottom of the title page.

Units of measurement: Measurements should be expressed in SI units wherever possible.

Drug names: Use generic names of drugs (first letter: lowercase) wherever possible. Registered trade names (first letter: uppercase) should be marked with the superscript registration symbol ® or ™ when they are first mentioned.

Tables and illustrations: Tables and figures must be numbered (e.g. Figure 1, Figure 2) and submitted as separate files. Tables require a heading and figures a legend, which must provide sufficient information for either to stand alone. Each figure and table must be cited in the text numerically. Tables should be in Word format. b/w/half-tone and color figures must have a final resolution of 300 dpi after scaling to final size, line drawings 1200 dpi. Color figures must be in RGB format. All figures should be in a common format such as PSD, TIF, PNG, EPS or WMF. Vector graphics should be in PPT, AI or EPS format.
Chemotherapy

Color Illustrations
Online edition: Color figures are reproduced free of charge.
In the print version, the figures are reproduced in black and white. Print colors in the text and figure legends should be avoided.
Print edition: Up to 6 color figures per page can be integrated within the text at CHF 960.00 per page.

References
Identity references in the text using Arabic numerals (in square brackets). Do not alphabetize; number references sequentially in the order cited in the text. Material submitted for publication but not yet accepted should be referred to as [unpublished data] and should not be included in the reference list; if reference list should include only those publications which are cited in the text. Authors’ surnames should be followed by their initials with no punctuation other than a period between. To abbreviate, cite all authors (if not possible include at least 3 authors followed by et al). Abbreviate journal names according to the list of journals indexed for MEDLINE on the NLM website. Also see International Committee of Medical Journal Editors: Uniform Requirements for Manuscripts Submitted to Biomedical Journals (http://www.ICMJE.org).

Examples

Reference Management Software: The use of EndNote is recommended to facilitate formatting of citations and reference lists. The journal output style can be downloaded from http://endnote.com/downloads/styles/

Supplementary Material and Multimedia Files
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Multimedia files enhance the online version of a publication. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpg).

English Language Editing
For authors whose native language is not English, use of a professional language editing service prior to submission can help to avoid delays with the review process.

Digital Object Identifier (DOI)
A DOI number will be available as a unique identifier on the title page of each article. DOIs are useful for identifying and citing articles published online without volume or issue information (for more information, see www.doi.org).

Self-Archiving/Open Green Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
• Be used for noncommercial purposes only
• Be linked to the final version on www.karger.com
• Include the following statement:
‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/doi- [insert DOI number].’

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karlgen on the author’s behalf (see Funding Organizations (NIH etc.).

For self-archiving Author’s ChoiceTM (Gold Open Access) articles, see Author’s ChoiceTM.

Author’s ChoiceTM
Karger’s Author’s ChoiceTM service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/author_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:
• Follow the terms of the relevant Creative Commons license
• Be linked to the final version on www.karger.com
• Include the following statement:
‘The final, published version of this article is available at http://www.karger.com/doi- [insert DOI number].’

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s ChoiceTM, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Copy Editing
Manuscripts accepted for publication by Karger Publishers are subject to copy editing.

Proofs
An email containing a link to download the proofs will be sent to the corresponding author. Proofs should be returned within 48 hours. Alterations made in proofs, other than the correction of printer’s (introduced) errors, are charged to the author and may require editorial approval.

Page Charges
There is no page charge for papers of 3 or fewer printed pages (including tables, illustrations and references). Authors are charged CHF 325.00 for each additional complete or partial printed page.

Reprints
An order form with a price list can be requested when returning the corrected proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Contents

See the journal website for contents
This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of oncology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed. The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the entire growing collection of case reports, further facilitating the retrieval of specific information.

Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.
