The Tobacco Epidemic
2nd, revised and extended edition

Editors
Robert Loddenkemper
Michael Kreuter

This completely revised and enlarged 2nd edition of The Tobacco Epidemic provides a comprehensive update of the clinical, public health and political aspects of tobacco smoking. Since its 1st edition in 1997, knowledge on the health hazards of tobacco and nicotine addiction has increased considerably, but recent data has shown that the global problem has become more aggravated in low- and middle-income countries: if current trends continue, tobacco smoking will be responsible for the deaths of 1 billion people in the 21st century.

Written by outstanding international experts, the book covers the history of tobacco production and use, the economics of tobacco use and control, as well as the health consequences of active and passive smoking in both adults and children. Special chapters discuss the impact of media, movies and TV on tobacco consumption in young people, the patterns and predictors of smoking cessation in the general population and in different social subgroups, and initiatives supported by the WHO Framework Convention on Tobacco Control. Readers will find the latest information on how nicotine dependence is treated with nicotine replacement products, what role health care professionals play in helping smokers to quit and what effects smoke-free environments, advertising bans and price increases have on smoking prevalence. The potential harms and benefits of smokeless tobacco, waterpipe tobacco smoking and electronic cigarettes are also evaluated.

This book is a must-read for anyone in the medical profession who treats patients with smoking-related diseases and for those engaged in tobacco control. It will also be appreciated by interested nonmedical readers like journalists and legislators.

Contents

• Foreword/Preface
• History of Tobacco Production and Use: Hanafin, J.; Clancy, L.
• Global Tobacco Epidemic: Mackay, J.; Schluger, N.
• The Tobacco Epidemic and the Commercial Sector: Tobacco Industry Strategy to Increase Profits and Prevent Regulation: Wiebel, F.J.
• Nicotine Dependence: Zaveri, N.T.; Rollema, H.; Swan, G.E.
• The Psychology of the Smoker: Gilbert, D.G.; Pergadia, M.L.
• Respiratory Disorders Related to Smoking Tobacco: Murray, J.F.; Buist, A.S.
• Cardiovascular and Other (Except Respiratory) Disorders Related to Smoking Tobacco: Barnoya, J.; Monzon, J.C.
• Health Effects of Passive Smoking in Children: Bush, A.
• Health Effects of Passive Smoking in Adults: Clancy, L.; Kabir, Z.
• Economics of Tobacco Use and Control: Townsend, J.
• Legislation and Smoking Prevention: Latif, E.; Warner, V.
• The WHO Framework Convention on Tobacco Control: Pötschke-Langer, M.; Schotte, K.; Sallaygi, T.
• Youth and Tobacco: Bauer, C.; Kreuter, M.
• Impact of Media, Movies and TV on Tobacco Use in the Youth: Sargent, J.D.; Hanewinkel, R.
• Social Determinants of Cigarette Smoking: Upson, D.
• Smoking and Mental Health Problems: Caillé, S.; Baker, A.L.; Todd, J.; Turner, A.; Dayas, C.V.
• Patterns and Predictors of Smoking Cessation: Ditre, J.W.; Zale, E.L.; Brandon, T.H.
• Examining the Role of the Health Care Professional in Controlling the Tobacco Epidemic: Individual, Organizational and Institutional Responsibilities: Leone, F.T.; Evers-Casey, S.
• Pharmacotherapy: Nicotine Replacement Therapy and Other Drugs in Smoking Cessation (Including Vaccination): Weishaar, H.
• Smokeless Tobacco – Health Hazards or Less Harm?: Bolinder, G.; Gilljam, H.
• Waterpipe Tobacco Smoking: A Less Harmful Alternative?: Jawad, M.
• Electronic Cigarettes: The Issues behind the Moral Quandary: Vardavas, C.I.; Agaku, I.T.

Official Journal of the World Psychiatric Association (WPA), Section on Classification, Diagnostic Assessment and Nomenclature, Section on Clinical Psychopathology
Psychopathology

Psychopathology addresses scientists who work on descriptive psychopathology in clinical contexts, or with experimental methods in neuropsychology and experimental psychopathology, or on conceptual framing of psychopathological findings for understanding pathogenesis and for validation of diagnosis and classification. They may include an interdisciplinary approach to other medical and biological fields or to the humanities. Psychopathology does not only invite reports on medical research but also wants to address psychologists who refer to pathological phenomena or work within clinical settings. The central field of interest is the convergence of clinical phenomena, experimental findings, and conceptualisation. This would also include describing pathogenetic mechanisms of disturbed neuropsychological functions which allows remodelling and evaluation of psychotherapeutic tools.

Types of Papers
Psychopathology accepts papers on the following sections: Original Paper, Review, Short Report (up to 8 manuscript pages). Reviews may contain overviews, meta-analyses and conceptual papers based on a literature overview; Original Papers contain data generated by the authors; Short Reports will also be restricted to relevant issues of scientific debate.

Submission
Only original papers written in English are considered and should be submitted using the online submission website at: www.karger.com/psp

Should you experience any problems with your submission, please contact:
Shirin.Neidelein@med.uni-heidelberg.de

Editorial Office Psychopathology
Zentrum für Psychosoziale Medizin
Klinik für Allgemeine Psychiatrie
Universität Heidelberg
Vossstr. 4
D-69115 Heidelberg
Tel. +49 6221 56 7308
Fax +49 6221 56 4481

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publisher. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Psychopathology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: The abstract should not exceed 30 lines and should be structured as follows: Background, Sampling and Methods, Results, and Conclusions (including study limitations).

Methods: Sampling should be described in detail so that possible selection biases may be discussed. Methods should be reported in a manner enabling easy replication.

Results: The results should be described precisely and must be separated from the discussion.

Discussion: The discussion should move along the same lines as the results and should discuss the relevant literature with regard to consistencies and inconsistencies as well as elucidate on the theoretical and practical implications of the results. Further research perspectives may be addressed, e.g. concerning clarification of inconsistencies with the literature.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one black for reproduction (max. size 180 x 223 mm) or provide crop marks. Electronically submitted b/w/half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legend.

Print edition: No color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text, identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize, renumber absences in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theodorides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000638588.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Guidelines for Authors

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Multimedia files and other supplementary files, directly relevant but not essential to the conclusions of a paper, enhance the online version of a publication and increase its visibility on the web. These files will undergo editorial review. The Editors reserve the right to limit the scope and length of the supplementary material. Multimedia and supplementary material should meet production quality standards for publication without the need for any modification or editing. Files should not exceed 10 MB in size. Figures and tables need to have titles and legends, and all files should be supplied separately and labeled clearly. All supplementary material should be referred to in the main text. A DOI number will be assigned to supplementary material and it will be hosted online at https://karger.fghsara.com under a CC BY license. Authors will be charged a processing fee of CHF 250.00 for supplementary material.

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public. Open Access repositories and scientific networks (e.g. ResearchGate or Mendele-ney) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement: ‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytorgent Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number].’ It is the author’s responsibility to fulfill these requirements. For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author’s behalf [see Funding Organizations (NIH etc.)].

For self-archiving Author’s ChoiceTM (Gold Open Access) articles, see Author’s ChoiceTM.

Author’s ChoiceTM
Karger’s Author’s ChoiceTM service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is permissible in cost grant allocation. More information can be found at www.karger.com/authors_choice. The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:
- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement:

Key Issues in Mental Health
(formerly ‘Bibliotheca Psychiatrica’)

Problems of clinical psychiatry covered in a series that has helped pioneer the development of this field

With its first volume published in 1917, this series has served to chart some of the main developments of contemporary psychiatry. Throughout these years, individual volumes have outlined the specific problems and controversies which have characterized the growth of psychiatry and have reflected a broadening acceptance of its methods and applications. Recent volumes have been distinguished by their bench to bedside coverage of current topics in psychiatry, psychology and neurosciences. Taking a rigorously interdisciplinary as well as translational approach, Key Issues in Mental Health attempts to build bridges to related disciplines in an effort to integrate a variety of aspects relevant to the successful diagnosis and treatment of psychiatric disorders.

Parental Bonding and Dyadic Interaction
Source of Mental Health and Risk of Psychopathology

Editors
Sabine C. Herpertz
Corinna Reck

This special topic issue summarizes contemporary research on the impacts of successful bonding and interaction between caregiver and child. There are strong indications that the ability for supportive interaction with a child might be hampered in mothers who experienced impaired bonding, negative parenting behavior, psychiatric disorders, or mistreatment in their own childhood. This publication consists of twelve papers highlighting the essential role of positive early interaction and experiences with a social partner for child development. It sheds new light on behavioral and biological mechanisms of healthy and disturbed development in the context of early life stress and troubled rearing. It is dedicated to the significant issue of how interpersonal experiences early in life can impact both mental health later in life and the mental health of offspring.

Parental Bonding and Dyadic Interaction is of special importance to clinical psychiatrists, child and adolescent psychologists, and researchers and practitioners. It clearly illustrates how early life stress can negatively affect the behavioral and biological mechanisms of healthy development.

Contents

Editorial
• The Impact of Parent-Infant Interaction on Epigenetic Plasticity Mediating Synaptic Adaptations in the Infant Brain: Matas, E.; Bock, J.; Braun, K.
• The Early Mother-to-Child Bond and Its Unique Prospective Contribution to Child Behavior Evaluated by Mothers and Teachers: Fuchs, A.; Möhler, E.; Reck, C.; Resch, F.; Kaess, M.
• Mother-Infant Face-to-Face Interaction: The Communicative Value of Infant-Directed Talking and Singing: Arlas, D.; Peña, M.
• Longitudinal Association between Child Emotion Regulation and Aggression, and the Role of Parenting: A Comparison of Three Cultures: Bozicevic, L.; De Pascalis, L.; Schultmann, N.; Tomlinson, M.; Cooper, P.J.; Murray, L.
• Mentalization Mediates the Relationship between Early Maltreatment and Potential for Violence in Adolescence: Taubner, S.; Zimmermann, L.; Ramberg, A.; Schröder, P.
• Emotional Rejection of the Infant: Status of the Concept: Brockington, L.
• Mother-Infant Emotion Regulation at Three Months: The Role of Maternal Anxiety, Depression and Parenting Stress: Riva Crugnola, C.; Jerardi, E.; Ferro, V.; Gallucci, M.; Parodi, C.; Astengo, M.

Three BMA awards for Karger Publishers

We are delighted to announce that three Karger titles received ‘Highly Commended’ awards by the British Medical Association in their prestigious 2016 Medical Book Competition:

In the category ‘Internal Medicine’

- **Tattooed Skin and Health**
  - Editors: J. Serup, N. Kluger, W. Baumler
  - X + 258 p., 110 fig., 85 in color, 25 tab., hard cover, 2015
  - www.karger.com/cupde

In the category ‘Oncology’

- **Retinal Pharmacotherapeutics**
  - XVI + 408 p., 83 fig., 71 in color, 33 tab., hard cover, 2016
  - www.karger.com/deoph

- **Immuno-Oncology**
  - Editors: O. Michielin, G. Coukos
  - VI + 140 p., 8 fig., 5 in color, 11 tab., hard cover, 2015
  - www.karger.com/pritr

Karger titles which received awards in previous BMA Medical Book Competitions
383 Attentional Bias for Emotional Stimuli in Borderline Personality Disorder: A Meta-Analysis
Kaiser, D.; Jacob, G.A. (Freiburg); Domes, G. (Hamburg/Trier); Arntz, A. (Maastricht/Amsterdam)

397 Psychopathological Course Typology in Schizophrenia Spectrum Disorders: A Heuristic Approach in a Sample of 100 Patients
Wigand, M.E.; Lang, F.U.; Becker, T. (Günzburg); Schulze, T.G. (Munich); Strik, W. (Bern); Jäger, M. (Günzburg)

406 Assessing Chronic Stress, Coping Skills, and Mood Disorders through Speech Analysis: A Self-Assessment ‘Voice App’ for Laptops, Tablets, and Smartphones
Braun, S. (Zurich); Annovazzi, C. (Milan); Botella, C. (Castellon); Bridler, R. (Zurich); Camussi, E. (Milan); Delfino, J.P. (Zurich); Mohr, C. (Lausanne); Moragrega, I. (Castellon); Papagno, C.; Pisoni, A. (Milan); Soler, C. (Castellon); Seifritz, E.; Stassen, H.H. (Zurich)

420 The New Hamburg-Hannover Agitation Scale in Clinical Samples: Manifestation and Differences of Agitation in Depression, Anxiety, and Borderline Personality Disorder
Jung, S. (Hannover/Hamburg); Proske, M. (Lübeck); Kahl, K.G.; Krüger, T.H.C. (Hannover); Wollmer, M.A. (Hamburg)

429 First-Rank Symptoms in Methamphetamine Psychosis and Schizophrenia
Shelly, J.; Uhlmann, A.; Sinclair, H.; Howells, F.M.; Sibeko, G.; Wilson, D.; Stein, D.J.; Temmingh, H. (Cape Town)
