It is a well-known fact that children’s growth depends on the quality of their nutrition. However, the mechanisms of fetal and child growth and their interactions with nutrition have not yet been fully elucidated and still pose a challenge to those engaged in the field. Exchanging concepts and knowledge among professionals of various disciplines thus remains very important.

This second ‘Yearbook’ provides an update on the research published between 2013 and 2015. An international team of experts presents papers that shed light on the mechanisms of interaction between nutrition and growth, and provide insight to the readers. Each paper is briefly summarized and supplemented with editorial comments which evaluate the clinical importance of each article and discuss its application.

This ‘Yearbook’ is an important tool for practicing physicians, including pediatricians, subspecialists in pediatric gastroenterology, metabolism and nutrition, and endocrinology. Nutritionists and dieticians, as well as other health professionals involved in the care of children, will also find this to be a useful resource.

Medical and Sport Science

These works invite study by anyone interested in the development of sports medicine and sport science as dynamic scientific disciplines

This series was inaugurated at a time when the sport sciences were separated from medicine. From the first volume on, the editors have united these two areas in order to bridge the gap between medicine and sport sciences and to give the scientific community at large, and biomedical researchers in particular, the full benefit of current advances being made in the multifaceted domains of sports medicine. Contributions from biomechanics, biochemistry, physiology, kinanthropometry engineering, and from different areas of clinical medicine are incorporated into this innovative series.

Guidelines for Authors

**Aims and Scope**
The journal focuses on human nutrition and metabolism and related areas, including experimental studies and basic science that can inform human nutrition science. We welcome manuscripts describing observational and experimental studies as well as basic science research on the topics of foods, diets and dietary supplements, nutrition and genetics related to nutrition, on energy metabolism, macro- and micronutrients including vitamins and minerals, biofunctional compounds, dietetics, obesity, clinical nutrition, social sciences and health economy as related to nutrition and metabolism policy. Laboratory-based science may include descriptions of relevant experimental models. In addition to Original Papers, the journal will also publish Supplements with proceedings from international relevant conferences on nutrition and metabolism.

**Submission**
Manuscripts written in English are considered and should be submitted online at www.karger.com/ann

Authors may suggest up to four Referees who have expert knowledge on the subject. Suggested Referees should not be from the same institution, not have published with the authors during the last 5 years, and should not be prejudiced.

Should you experience problems with your submission, please contact
Prof. Dr. B. Koletzko
Div. Metabolic and Nutritional Medicine
Dr. von Hauner Children's Hospital
Ludwig-Maximilians-University of Munich
Lindwurmstrasse 4
D–80337 Munich (Germany)
Tel. +49 89 4400 5282
Fax +49 89 4400 57742
E-Mail ANM@med.uni-muenchen.de

**Conditions**
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of *Annals of Nutrition and Metabolism* and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

**Types of Articles**
The journal consists of the following sections:

- **Original Papers** are full-length research papers which will be considered for the journal. Articles cover topics relevant to clinical studies. Basic and experimental work appear only if directly related to clinical issues (max. 3,000 words).
- **Review Articles/Systematic Reviews** in which a specific field is reviewed through an exhaustive literature survey. An Abstract is required and should be divided into Background, Summary and Key Messages. Review Articles should consist of a maximum of 4,000 words.
- **Commentaries and Viewpoint** of an editorial nature may be submitted to the journal. In these communications, usual manuscript subscriptions do not apply, and a summary statement is not needed; however, a very brief reference list may be included (max. 500 words).
- **Meeting Reports** are brief summaries of scientific meetings in the field of nutrition and metabolism. Authors should write a letter to the Editors inquiring about potential interest before submitting the paper (max. 1,500 words).
- **Letters to the Editor** are encouraged if they directly concern articles previously published in this journal or clinical subjects related to the matters discussed. The editor reserves the right to submit copies of such letters to the authors of the articles concerned prior to publication in order to permit them to respond in the same issue of the journal (max. 500 words).
- **Editorials** are usually invited by the Editor (max. 1,000 words). Please send suggestions to the Editor.

Authors are referred to the uniform requirements for manuscripts submitted to biomedical journals (http://www.icmje.org/ethical_1author.html) for further guidance.

**Conflicts of Interest**
Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

**Ethics**
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute's committee on human research. Further, they should also state that animal experiments conform to institutional standards.

**Plagiarism Policy**
Plagiarism is misrepresenting somebody else's published intellectual work-product as your own (Note, this definition excludes self-plagiarism). In short, it is a misuse of source material. Whether intentional or unintentional, plagiarism is a serious violation of the *Annals of Nutrition and Metabolism* policy. Periodically, manuscripts are screened for plagiarism and if the manuscript is found to be consistent with what the Editors define as plagiarism prior to review of the manuscript then:

- it will be rejected without review and the author(s) notified as such with a chance for rebuttal.

If a manuscript is found to contain evidence of plagiarism after acceptance and/or publication then:

- the author(s) will be notified, as in the previous situation, and offered a chance for rebuttal.

If the rebuttal arguments are not found to be satisfac-
tory, as judged by the Editors, the manuscript will be rejected and the author sanctioned from publishing additional papers in the Journal for a period to be determined by the Editorial Board. The period of sanction imposed is dependent on the magnitude of plagiarism with a minimum sanction of one year.

If a manuscript already published in the Journal is found to exhibit evidence of plagiarism as defined by the Editors*, then we will request a retraction. *Definition of plagiarism – a 25% similarity in the Results or Discussion that exactly reproduces another paper.

**Arrangement**
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the correspondence author should be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: For indexing purposes, a list of 3–10 key words in English is essential.

**Abstracts of Reviews**: Should be divided into the following subsections: Background, Index/Metabolism, and Key Messages. The Background should provide a brief clinical context for the review and is followed by the Summary, which should include a concise description of the main topics covered in the text. The Key Messages encapsulate the main conclusions of the review.

**Abstract**: Each paper needs an abstract of up to 200 words. It should be structured as follows: Background/Aims: What is the major problem that prompted the study? Methods: How was the study performed? Results: Most important findings? Conclusion: Most important conclusion?

**Footnotes**: Avoid footnotes.

**Tables and illustrations**: Tables are part of the text. Place them at the end of the text file. Illustration data must be stored as separate files. Do not integrate figures into the text. Electronic submission of b/w and half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

**Color illustrations**: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

**Print edition**: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

**References**: In the text, identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surname of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal titles according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

**Examples**

Guidelines for Authors

---

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Multimedia files and other supplementary files, directly relevant but not essential to the conclusions of a paper, enhance the online version of a publication and increase its visibility on the web. These files will undergo editorial review. The Editors reserve the right to limit the scope and length of the supplementary material. Multimedia and supplementary material should meet production quality standards for publication without the need for any modification or editing. Files should not exceed 10 MB in size. Figures and tables need to have titles and legends, and all files should be supplied separately and labeled clearly. All supplementary material should be referred to in the main text. A DOI number will be assigned to supplementary material and it will be hosted online at https://karger.figshare.com under a CC BY license. Authors will be charged a processing fee of CHF 250.00 for supplementary material.

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement:

  "This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000410497)]. The final published version is available at http://www.karger.com/?doi=[insert DOI number]."

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author's behalf [see Funding Organizations (NIH etc.)].

For self-archiving Author's ChoiceTM (Gold Open Access) articles, see Author's ChoiceTM.

Author’s ChoiceTM
Karger’s Author’s ChoiceTM service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing of your article. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost under funder's requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
There are no page charges for papers of 3 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 10 manuscript pages (including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the first-named author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
4th International Conference on Nutrition & Growth
Amsterdam, the Netherlands, March 2-4, 2017
Submit an Abstract
Before October 25, 2016

nutrition-growth.kenes.com
Annals of Nutrition and Metabolism is a leading international peer-reviewed journal for sharing information on human nutrition, metabolism and related fields, covering the broad and multidisciplinary nature of science in nutrition and metabolism. The journal focuses on human nutrition and metabolism and related areas, including experimental studies and basic science that can inform human nutrition science. We welcome manuscripts describing observational and intervention studies as well as basic science reports on the topics of foods, diets and dietary supplements, nutrigenomics and genetics related to metabolism, on energy metabolism, macronutrients and micronutrients including vitamins and minerals, biofunctional compounds, dietetics, obesity, clinical nutrition, social sciences and health economy as related to nutrition and metabolism and nutrition policy. Laboratory-based science may include descriptions of relevant experimental models. In addition to Original Papers, the journal will publish Review Articles on topical subjects, Systematic Reviews, short Commentaries and Viewpoint articles that may address current controversies, short Meeting Reports, Letters to the Editor, and Announcements/Society News. The journal will also publish Supplements with proceedings from internationally relevant conferences on nutrition and metabolism.

Selected contributions

- Current Information and Asian Perspectives on Long-Chain Polysaturated Fatty Acids in Pregnancy, Lactation, and Infancy: Systematic Review and Practice Recommendations from an Early Nutrition Academy Workshop: Koletzko, B. (Munich); Boey, C.C.M. (Kuala Lumpur); Campoy, C. (Granada); Carlson, S.E. (Kansas City, Kan); Chang, N. (Seoul); Guillermo-Tuazon, M.A. (Laguna); Joshi, S. (Pune); Prell, C. (Munich); Quak, S.H. (Singapore); Sjarif, D.R. (Jakarta); Su, Y. (Guangzhou); Supapannachart, S. (Bangkok); Yamashiro, Y. (Tokyo); Osendarp, S.J.M. (Berkel en Rodenrijs/Ottawa, Ont.)
- The Epidemiology of Global Micronutrient Deficiencies: Bailey, R.L. (Bethesda, Md./Baltimore, Md.); West, K.P.; Black, R.E. (Baltimore, Md.)
- Transmission of Obesity-Adiposity and Related Disorders from the Mother to the Baby: Yajnik, C.S. (Pune)
- Atopic Dermatitis: Global Epidemiology and Risk Factors: Nutten, S. (Lausanne)
Three BMA awards for Karger Publishers

We are delighted to announce that three Karger titles received ‘Highly Commended’ awards by the British Medical Association in their prestigious 2016 Medical Book Competition:

In the category ‘Internal Medicine’

**Tattooed Skin and Health**
Editors: Serup, J. (Copenhagen); Kluger, N. (Helsinki); Bäumler, W. (Regensburg)
X + 258 p., 110 fig., 85 in color, 25 tab., hard cover, 2015
www.karger.com/cupde

**Retinal Pharmacotherapeutics**
Editors: Nguyen, Q.D. (Omaha, Nebr.); Rodrigues, E.B. (São Paulo); Farah, M.E. (São Paulo); Mieler, W.F. (Chicago, Ill.); Do, D.V. (Omaha, Nebr.)
XVI + 408 p., 83 fig., 71 in color, 33 tab., hard cover, 2016
www.karger.com/deoph

**Immuno-Oncology**
Editors: Michielin, O.; Coukos, G. (Lausanne)
VI + 140 p., 8 fig., 5 in color, 11 tab., hard cover, 2015
www.karger.com/pritr

In the category ‘Oncology’

**Olszewski and Baxter’s Cytoarchitecture of the Human Brainstem**
Editors: J.A. Büttner-Ennever; A.K.E. Horn
3rd, revised and extended edition
www.karger.com/cupde

**Paediatric Bronchoscopy**
The Road to Good Nutrition: A global perspective
www.karger.com/prbr

**Macular Edema: A Practical Approach**
www.karger.com/prma

Karger titles which received awards in previous BMA Medical Book Competitions
