1 Oral Drugs Related with Muscle Wasting and Sarcopenia. A Review

9 The Delta-Opioid Receptor Agonist D-Ala2-D-Leu2-Enkephalin Enhances Hypoxic Depression of Excitatory Synaptic Transmission and Improves Recovery of Rat Cortical Neurons from Hypoxia in vitro
Merkenschlager, A.; Bloßfeld, M.; Nieber, K. (Leipzig)

19 Right Ventricular Dysfunction Complicates Time in Therapeutic Range in Heart Failure Patients Receiving Warfarin
Beton, O. (Sivas); Asarcikli, L.D. (Polatli); Sen, T. (Kutahya); Ipek, E.G. (Polatli); Kafes, H. (Ankara); Yaman, M. (Samsun); Efe, T.H. (Polatli); Kaya, H. (Sivas); Temizhan, A. (Ankara); Yilmaz, M.B. (Sivas)

27 Roles of HDAC2 and HDAC8 in Cardiac Remodeling in Renovascular Hypertensive Rats and the Effects of Valproic Acid Sodium
Li, R.; Cao, S.; Fang, W.; Song, Y.; Luo, X.; Wang, H.; Wang, J. (Luoyang)

37 Suppressive Effect of Carvedilol on Na+/Ca2+ Exchange Current in Isolated Guinea-Pig Cardiac Ventricular Myocytes
Tashiro, M.; Watanabe, Y.; Yamakawa, T.; Yamashita, K. (Hamamatsu); Kita, S.; Iwamoto, T. (Fukuoka); Kimura, J. (Fukushima)

48 Effects of Liraglutide and Vitamin E in Fructose-Induced Metabolic Syndrome in Rats

57 Nerve Growth Factor Facilitates the Innervation of Perivascular Nerves in Tumor-Derived Neovasculature in the Mouse Cornea
Sone, Y. (Okayama); Takatori, S. (Okayama/Ehime); Ochi, E. (Okayama); Zamami, Y. (Okayama/Tokushima); Matsuyama, A.; Fukuhara, S. (Okayama); Goda, M. (Okayama/Osaka); Kitamura, Y. (Okayama); Kawasaki, H. (Okayama/Ehime)

67 Efficacy of Fu-Yuan Capsule in the Healing of Fractures of the Lower End of the Radius in a Rabbit Model
Wei, W. (Guangzhou); Wei, B.-F. (Linyi); Cai, J.; He, W. (Guangzhou); Wan, L.; Guan, Y. (Berlin)

79 Effects of Allyl Isothiocyanate, Acetaminophen, and Dipyrone in the Guinea-Pig Ileum
Donnerer, J.; Liebmann, I. (Graz)

(Continued on inside front cover)
Evaluation of the Potential Pharmacokinetic Interaction between Atomoxetine and Fluvoxamine in Healthy Volunteers

Inhibitory Effects of Antidepressants on Acetylcholine-Induced Contractions in Isolated Guinea Pig Urinary Bladder Smooth Muscle
Uno, J. (Funabashi/Toyoake); Obara, K.; Suzuki, H.; Miyatani, S.; Chino, D.; Yoshio, T.; Tanaka, Y. (Funabashi)

Cardiovascular Profile of Propranolol after Multiple Dosing in Infantile Hemangioma
Salice, P. (Milan); Giovanni Bianchetti, M. (Milan/Bellinzona); Giavarini, A.; Gondoni, E.; Cavalli, R.; Maria Colli, A.; Lombardi, F. (Milan)
Guidelines for Authors

Submission
The journal publishes articles dealing with all aspects of experimental and clinical pharmacology. Papers dealing with mechanistic aspects at a molecular level are particularly encouraged. They can be full articles as well as short communications of investigative findings. Reviews, comments and perspective notes on timely topics are specifically welcome. Reviews in which a specific field is reviewed through an exhaustive literature survey. An Abstract is required and should be divided into Background, Summary and Key Messages. Review Articles should consist of a maximum of 4,000 words. We consider investigations dealing with biological extracts or with phytopharmaceutical preparations as outside the scope of our journal. Only papers written in English are considered and should be submitted using the online submission website at:

www.karger.com/pha

or sent as e-mail attachment (the preferred word-processing package is MS-Word) to the Editorial Office:

pha@karger.com

Prof. J. Donnerer
S. Karger AG
Editorial Office “Pharmacology”
P.O. Box
CH–4009 Basel (Switzerland)
Tel. +41 61 306 1356
Fax +41 61 306 1434

Titles
The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Supply 3–10 key words in English that reflect the content of the paper.

Abstract of Original Papers or Short Communications: Each paper needs an abstract of up to 10 lines.

Abstract of Reviews: Should be divided into the following subsections: Background, Summary and Key Messages. The Background should provide a brief clinical context for the review and is followed by the Summary, which should include a concise description of the main topics covered in the text. The Key Messages encapsulate the main conclusions of the review.

Abstract of Original Papers or Short Communications: Each paper needs an abstract of up to 10 lines.

Footnotes:
Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. Figures require a heading and may not be reproduced by any means, in whole or in part, without the written consent of the publisher upon acceptance.

Conflict of Interest
Authors are requested to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Ethics
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute’s committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Abstract: The page immediately following the title page should contain a summary of the paper, summarizing the purpose, methods, results, and conclusions. The summary should not exceed 300 words. It should be followed by Key Messages encapsulating the main conclusions of the review.

Abstract of Reviews: Should be divided into the following subsections: Background, Summary and Key Messages. The Background should provide a brief clinical context for the review and is followed by the Summary, which should include a concise description of the main topics covered in the text. The Key Messages encapsulate the main conclusions of the review.

Abstract of Original Papers or Short Communications: Each paper needs an abstract of up to 10 lines.

Footnotes:
Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size 180 × 223 mm) or provide crop marks. Each illustration must be labeled with its number and the first author’s name. The final resolution for b/w half-tone and color illustrations must be 300 dpi after scaling. Line drawings require 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately (for detailed instructions, see http://www.karger.com/pha).

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white, and a key figure is provided referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedj journals (www.icmje.org).

(a) Papers published in periodicals:

(b) Papers published only with DOI numbers:

(c) Monographs:

(d) Edited books:

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.
**Supplementary Material**

Multimedia files and other supplementary files, directly relevant but not essential to the conclusions of a paper, enhance the online version of a publication and increase its visibility on the web. These files will undergo editorial review. The Editors reserve the right to limit the scope and length of the supplementary material. Multimedia and supplementary material should meet production quality standards for publication without the need for any modification or editing. Files should not exceed 10 Mb in size. Figures and tables need to have titles and legends, and all files should be supplied separately and labeled clearly. All supplementary material should be referred to in the main text. A DOI number will be assigned to supplementary material and it will be hosted online at https://karger.figshare.com under a CC BY license. Authors will be charged a processing fee of CHF 250.00 for supplementary material.

**Self-Archiving/Green Open Access**

Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement:

  “This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number].”

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

For self-archiving, Author’s Choice™ (Gold Open Access) articles, see Author’s Choice™.

**Author’s Choice™**

Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice. The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:

- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement:

  “The final, published version of this article is available at http://www.karger.com/?doi=[insert DOI number].”

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

**Funding Organizations (NIH etc.)**

The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

**Page Charges**

There are no page charges for papers of 3 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 14 manuscript pages (including tables, illustrations and references).

**Proofs**

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

**Reprints**

Order form and price list is sent with the pdf proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
We are entering a new and exciting era of microbiological study and application. Recent advances in the now established disciplines of genomics, proteomics and bioinformatics, together with extensive cooperation between academic and industrial concerns have brought about an integration of basic and applied microbiology as never before. The Journal of Molecular Microbiology and Biotechnology (JMMB) aims to reflect this development by publishing original research papers from all areas of microbiology and biotechnology. It also features written symposia on selected topics, timely reviews and minireviews. Theoretical approaches and descriptions of novel, microbiologically relevant software is also considered. Contributions and ideas from large segments of the scientific community are welcome to make JMMB a viable, much-needed and up-and-coming forum for current basic and applied microbiological research.

Selected contributions
- Role of the luxS Gene in Initial Biofilm Formation by Streptococcus mutans: He, Z.; Liang, J.; Tang, Z.; Ma, R.; Peng, H.; Huang, Z. (Shanghai)
- Regulation of the Utilization of Amino Sugars by Escherichia coli and Bacillus subtilis: Same Genes, Different Control: Plumbridge, J. (Paris)
- Cross-Talk between the Canonical and the Nitrogen-Related Phosphotransferase Systems Modulates Synthesis of the KdpFABC Potassium Transporter in Escherichia coli: Lüttmann, D. (Göttingen); Göpel, Y. (Vienna); Görke, B. (Göttingen/Vienna)
- Control of Transposon-Mediated Directed Mutation by the Escherichia coli Phosphoenolpyruvate-Sugar Phosphotransferase System: Saier Jr., M.H.; Zhang, Z. (La Jolla, Calif.)
- In vitro Antifungal Activity and Mechanism of Action of Tea Polyphenols and Tea Saponin against Rhizopus stolonifer: Jiang, X.; Feng, K.; Yang, X. (Wuhan)
- Molecular Genetic and Crystal Structural Analysis of 1-(4-Hydroxyphenyl)-Ethanol Dehydrogenase from 'Aromatoleum aromaticum' Ebn1: Büsing, I. (Oldenburg); Höfken, H.W.; Breuer, M. (Ludwigshafen); Wölbrand, L. (Oldenburg); Hauer, B. (Ludwigshafen); Rabus, R. (Oldenburg/Bremen)

- postage and handling (added to print and print-online)
- CHF 120.00
- Eur 108.00
- USD 168.00

Back Volumes and Single Issues: Information on availability and prices of single print issues and print or electronic back volumes can be obtained from Customer Service at service@karger.ch.

Bibliographic Indices: This journal is regularly listed in bibliographic services, including Current Contents® and PubMed/MEDLINE.

Change of Address: Both old and new address should be sent to the subscription source.
This journal publishes original research articles and state-of-the-art reviews on all aspects of antimicrobial and antitumor chemotherapy. The results of experimental and clinical investigations into the microbiological and pharmacologic properties of antibacterial, antiviral and antitumor compounds are major topics of publication. Papers selected for the journal offer data concerning the efficacy, toxicology, and interactions of new drugs in single or combined applications. Studies designed to determine the pharmacokinetic and pharmacodynamic properties of similar preparations and comparing their efficacy are also included. Special emphasis is given to the development of drug-resistance, an increasing problem worldwide.

Selected contributions
- Gemcitabine-Induced Subacute Cutaneous Lupus Erythematosus: A Case Report: Ben Zvi M. (Tel Aviv) et al.
- New Perspectives in the Treatment of Advanced Gastric Cancer: S-1 as a Novel Oral 5-FU-Therapy in Combination with Cisplatin: Heinemann V. (München) et al.
- Clinical Practice of Adjuvant Chemotherapy in Patients with Early-Stage Epithelial Ovarian Cancer: Frieman L.M. (Maastricht/Eindhoven) et al.
- Potential of Casiopeinas® Copper Complexes and Antituberculosis Drug Combination against Mycobacterium tuberculosis: Barbosa A.R. (São Paulo) et al.
- Anti-CCR4 Monoclonal Antibody Mogamulizumab Followed by the GDP (Gemcitabine, Dexamethasone and Cisplatin) Regimen in Primary Refractory Angioimmunoblastic T-Cell Lymphoma: Kato H. (Nagoya) et al.
- Clarithromycin Dose-Dependently Stabilizes Rat Peritoneal Mast Cells: Kazama K. (Sendai) et al.

SickKids Handbook of Pediatric Thrombosis and Hemostasis

2nd, revised and extended edition

Editors
Victor S. Blanchette, Leonardo R. Brandão, Vicky R. Breakey, Shoshana Revel-Vilk

This handbook takes the reader through the entire field of pediatric thrombosis and hemostasis and is updated to include new information and elements missing from the first edition. An introductory section concisely explains the complex pathophysiology of hemostasis and thrombosis. The chapters that follow include practical, evidence-based information on the diagnosis and management of inherited and acquired bleeding disorders and thrombotic events that affect children. Special features include updated practical clinical algorithms and appendices that cite normal laboratory reference ranges, bleeding and hypermobility scores, as well as recommended dosages of blood products and major hemostatic agents. An updated chapter on antithrombotic therapy in children includes information on new anticoagulants. A new chapter provides current information about genetic testing and counseling in inherited bleeding and clotting disorders. Written and reviewed by international experts in the field, this updated handbook is intended for health care professionals involved in the assessment and care of children with inherited and acquired bleeding and clotting disorders. This includes general and specialist pediatricians (in particular intensivists, neonatologists, cardiologists/cardiac surgeons, rheumatologists and nephrologists), hematologists/oncologists (pediatric and adult), as well as medical trainees, nurses, nurse practitioners and pharmacists.

Contents

Contributors
Preface

• Pediatric Thrombosis and Hemostasis: A Historical Perspective: V.R. Breakey, L.R. Brandão, S. Revel-Vilk, V.S. Blanchette
• Primary and Secondary Hemostasis, Regulators of Coagulation, and Fibrinolysis: Understanding the Basics: S. Revel-Vilk, M.L. Rand, S.J. Israel
• An Approach to the Bleeding Child: S. Revel-Vilk, M.L. Rand, S.J. Israel
• Hemostasis in the Neonate: L. Avila, V.S. Blanchette
• Platelet Disorders in Children: V. van Eimeren, S.J. Israels, P.A. James
• A Diagnostic Approach to a Child with Thrombosis: L.R. Brandão, Y. Diab, B.W. McCrindle
• Genetic Testing and Counseling for Pediatric Inherited Bleeding and Clotting Disorders: R. Babul-Hirji, J. Di Paola, D. Lillincrap

Appendices

• Bleeding Assessment Tools: M.L. Rand, V.S. Blanchette, S.J. Israel, P.A. James
• A Diagnostic Approach to a Child with Thrombosis: L.R. Brandão, Y. Diab, B.W. McCrindle
• Genetic Testing and Counseling for Pediatric Inherited Bleeding and Clotting Disorders: R. Babul-Hirji, J. Di Paola, D. Lillincrap

Three BMA awards for Karger Publishers

We are delighted to announce that three Karger titles received ‘Highly Commended’ awards by the British Medical Association in their prestigious 2016 Medical Book Competition:

**In the category ‘Internal Medicine’**

**Tattooed Skin and Health**
Editors: Serup, J. (Copenhagen); Kluger, N. (Helsinki); Bäumler, W. (Regensburg)
X + 258 p., 110 fig., 85 in color, 25 tab., hard cover, 2015
www.karger.com/cupde

**Retinal Pharmacotherapeutics**
Editors: Nguyen, Q.D. (Omaha, Nebr.); Rodrigues, E.B. (São Paulo); Farah, M.E. (São Paulo); Mieler, W.F. (Chicago, Ill.); Do, D.V. (Omaha, Nebr.)
XVI + 408 p., 83 fig., 71 in color, 33 tab., hard cover, 2016
www.karger.com/deoph

**Immuno-Oncology**
Editors: Michielin, O.; Coukos, G. (Lausanne)
VI + 140 p., 8 fig., 5 in color, 11 tab., hard cover, 2015
www.karger.com/pritr

**In the category ‘Oncology’**

**Karger titles which received awards in previous BMA Medical Book Competitions**

**Olszewski and Baxter’s Cytoarchitecture of the Human Brainstem**
Editors: J.A. Baxter; Baxter
3rd, revised and translated edition
www.karger.com/cupde

**Regulatory Research**
Editors: S.9.; Steinhoff; G.W.; Bartels; K.1.
10th, revised edition
www.karger.com/cupde

**Paediatric Bronchoscopy**
Editors: M.1.; M.2.; M.3.; M.4.
2nd, revised edition
www.karger.com/cupde

**Macular Edema A Practical Approach**
Editors: G.C.; C.1.; C.2.; C.3.
2nd, revised edition
www.karger.com/cupde

**The Path to Good Nutrition A global perspective**
Editors: A.B.; A.C.; A.D.
2nd, revised and updated edition
www.karger.com/cupde

**Progress in Tumor Research**
Editors: R.A.; S.1.
Vol. 42
www.karger.com/pritr
