Molecules and Cells in Allergy – Original Papers

1 Human Allergen-Specific IgG Subclass Antibodies Measured Using ImmunoCAP Technology
Movérare, R.; Blume, K.; Lind, P. (Uppsala); Crevel, R. (Sharnbrook); Marknell DeWitt, Á. (Uppsala); Cochrane, S. (Sharnbrook)

11 Altered Expression of Genes Encoding Cornulin and Repetin in Atopic Dermatitis

Molecules and Cells in Allergy – Short Communication

20 The Impact on Allergy-Related Cells of a Birch Pollen Allergoid, with and without Monophosphoryl Lipid A, in Comparison with the Native Equivalent
Worm, M.; Ernst, D.; Kraller, M.; Babina, M. (Berlin)

Mechanisms of Allergy – Original Paper

27 Synergistic Actions of Histamine-Releasing Factor and Histamine Releasing Factor-Reactive IgE in Chronic Urticaria
Huang, X.; Li, Z.; Sun, R. (Chongqing)

(Continued on inside front cover)
Clinical Allergology – Original Papers

33 Elevated Nitrosative Stress in Children with Chronic Spontaneous Urticaria

40 D-Dimer Plasma Levels Parallel the Clinical Response to Omalizumab in Patients with Severe Chronic Spontaneous Urticaria
Asero, R. (Paderno Dugnano); Marzano, A.V.; Ferrucci, S.; Cugno, M. (Milan)

Basic and Clinical Immunology – Original Papers

45 Steady-State Therapy with Azithromycin or Low-Dose Prednisolone in Paediatric Cystic Fibrosis Patients: Inflammatory Markers and Disease Progression
Shmarina, G.; Pukhalsky, A.; Avakian, L.; Semykin, S.; Pukhalskaya, D.; Allioshkin, V. (Moscow)

55 Recurrent Angioedema: Occurrence, Features, and Concomitant Diseases in an Italian Single-Center Study
Triggianese, P.; Guarino, M.D.; Pellicano, C.; Borzi, M.; Greco, E.; Modica, S.; De Carolis, C.; Perricone, R. (Rome)

Novel Insights from Clinical Practice

64 Bariatric Surgery: A Novel Risk Factor for Food Allergy?
Blockhuys, M.; Faber, M.A.; Sabato, V.; Hubens, G.; Ebo, D.G. (Antwerp)
International Archives of Allergy and Immunology appears monthly and provides a forum for publication of work from all aspects of modern allergology and immunology. Papers considered of special interest will be treated as “hot topics” and every attempt will be made to publish these especially fast. The Editor-in-Chief, the Managing Editor and a team of internationally established Associate Editors competently covering all fields of allergology and immunology are responsible for the scientific quality of this international core journal. International Archives publishes original work in the fields of allergy, immunopathology and transplantation, cellular immunology, immunogenetics, immunopharmacology and immunodendocrinology, mucosal immunology, immunology of infectious diseases and immunology of connective tissue diseases. In addition, reviews, minireviews, commentaries and opinions on controversial subjects are published regularly. A new system of manuscript submission, reviewing and processing guarantees competent and fair reviewing as well as fast and high quality publication.

Submission
Only papers written in English are considered. Detailed Online Submission Instructions with a link to the Submission Website are at http://www.karger.com/iaa/. Before submitting your manuscript, you are encouraged to review the detailed guidelines at www.karger.com/iaa_guidelines for specific directions as how to get a manuscript ready for submission. If you should have any problems with your submission, or should you feel the need to submit the paper in a non-electronic form, please contact the editorial office:

S. Karger AG
Editorial Office "International Archives of Allergy and Immunology"

Fax +41 61 306 1434
E-Mail a.zumbrunn@karger.com

Mailing address for courier deliveries only:
Allschwilerstr. 10
CH – 4055 Basel (Switzerland)

Original papers: Submitted manuscripts should be fully documented reports of original research. They must describe significant and original observations to be critically evaluated and, if necessary, repeated.

Short communications: These manuscripts should not contain more than 2 printed pages (i.e., 640 characters per page), including an abstract, essential references and not more than 3 tables or figures. Such communications should represent complete, original studies and should be arranged in the same way as full-length manuscripts.

Novel Insights from Clinical Practice (formerly Case Reports): The publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on “Established facts” (what is already known) and “Novel insights” (what new information has been gained) are required and should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation. The manuscript should be presented with an abstract (unstructured, max. 200 words), followed by introduction, case report and discussion. Maximum 3 figures.

Reviews, minireviews, opinion articles, commentaries and editorials: Authors who wish to contribute a manuscript to one of these categories should contact the Editor-in-Chief. Minireviews should be focused, brief reports on topics of current interest. Commentaries should offer a more personalized perspective on a topic that will be of interest to the general readership. All contributions to these categories will be subject to Editorial review.

Letters to the Editor concerning work published in the journal may be submitted. They should not exceed 2 manuscript pages including one table or figure.

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. A cover letter with the name, address, and telephone and telefax numbers of the corresponding author must accompany each manuscript. This letter must include a statement that affirms that all authors agree with the submission. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of International Archives of Allergy and Immunology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications. One of the criteria considered in reviewing manuscripts is the proper treatment of animals. In particular, the use of painful or otherwise noxious stimuli must be carefully and thoroughly justified. Papers that do not meet these criteria will not be accepted for publication.

Conflict of Interest
Authors are required to disclose any sponsorship or funding arrangements, including that from companies, relating to their research. All authors should disclose any possible conflicts of interest in the cover letter to the editor and at the end of the article.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Arrangement
Manuscripts should be written in English and be as concise as possible. Be sure to display line numbers (1, 2, 3, and so forth) in the left margin of the manuscript (line numbering can be added from the Page Setup or Format menu of word processing programs). The line numbering should be continuous throughout the entire manuscript, from the title page through to the final page (i.e., do not begin numbering from 1 again at the top of each page).

Title page: The first page of each paper should indicate a concise title, the author’s full names, affiliations and the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as an e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Provide on a separate page an abstract of not more than 250 words. This abstract should consist of four paragraphs, labeled Background, Methods, Results, and Conclusions. They should briefly describe, respectively, the problem being addressed in the study, how the study was performed, the salient results, and what the authors conclude from the results.

The text should be arranged in the following sections: Introduction, Material and Methods, Results, Discussion, Acknowledgement, References.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photographs cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 x 223 mm) or provide crop marks. Each illustration must be labeled with its number and the author’s name. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling (final size), line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately (see detailed instructions at www.karger.com/iaa/).

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

Abbreviations: Avoid overuse of abbreviations. Introduce an abbreviation only when the same term occurs three or more times.
References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Full address: The exact postal address complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as your e-mail address.

Reference Management Software: Use of EndNote® is recommended for easy management and formatting of citations and reference lists (format setting: Intervirology).

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Multimedia files and other supplementary files, directly relevant but not essential to the conclusions of a paper, enhance the online version of a publication and increase its visibility on the web. These files will undergo editorial review. The Editors reserve the right to limit the scope and length of the supplementary material. Multimedia and supplementary material should meet production quality standards for publication without the need for any modification or editing. Files should not exceed 10 Mb in size. Figures and tables need to have titles and legends, and all files should be supplied separately and labeled clearly. All supplementary material should be referred to in the main text. A DOI number will be assigned to supplementary material and it will be hosted online at https://karger.figshare.com under a CC BY license. Authors will be charged a processing fee of CHF 250.00 for supplementary material.

Self-Archiving/Green Open Access
Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution's internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendeley) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement: “This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogeten Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/?doi=[insert DOI number].”

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author's behalf (see Funding Organizations [NIH etc.]).

For self-archiving Author's Choice™ (Gold Open Access) articles, see Author's Choice™.

Author's Choice™
Karger's Author's Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:
- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement: “The final, published version of this article is available at http://www.karger.com/?doi=[insert DOI number].”

It is the author's responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author's Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders' requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
There are no page charges for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is 5 printed pages (6,460 characters per page), which is equal to approx. 14 manuscript pages including tables, illustrations and references.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer's errors are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

NOVEL CONCEPTS IN INNATE IMMUNITY

27–29 March 2017 | Tübingen, Germany

Topics
- Pattern recognition receptors
- Inflammation and inflamasomes
- Innate lymphoid cells
- Granulocytes and myeloid suppressor cells
- Host-Microbiome interaction
- Antifungal innate responses
- Antiviral innate responses
- Innate immunity in the skin
- Innate immunity and oncogenesis

Confirmed speakers
- Tilo Biedermann (Munich/DE)
- Gordon Brown (Aberdeen/GB)
- Mathias Chamaillard (Lille/FR)
- Georg Gasteiger (Mainz/DE)
- Michel Gilliet (Lausanne/CH)
- Greta Guarda (Lausanne/CH)
- Gunnar C. Hansson (Gothenburg/SE)
- Karl-Peter Hopfner (Munich/DE)
- Tim Lämmermann (Freiburg/DE)
- Eicke Latz (Bonn/DE)
- Ruth Ley (Cornell, NY/US; Tübingen/DE)
- Nicolas Manel (Paris/FR)
- Pablo Pelegrin (Murcia/ES)
- Caetano Reis e Sousa (London/GB)
- Chiara Romagnani (Berlin/DE)
- Luigina Romani (Perugia/IT)
- Jürgen Ruland (Munich/DE)
- Ole E. Sørensen (Lund/SE)
- Louis Staudt (Bethesda, MD/US)
- Giorgio Trinchieri (Bethesda, MD/US)

EAACI Congress 2017

On the Road to Prevention and Healthy Living

Register by 10th May for mid-rates

www.eaaci.org
#eaaci2017
Skin Appendage Disorders provides a wide range of original and review articles dealing with all aspects of hair, nail and skin gland diseases. The section ‘Novel Insights from Clinical Practice’ introduces special case examples and their treatments. Innovative therapies are presented under the heading ‘Guidelines’ that present the consensus treatments, and which are a must-read for everyone who wants to stay up-to-date. The section ‘Adnexal Surgery’ focuses on both established and approved as well as new surgical treatments. Pathological evaluation of skin appendage disorders requires specific training and the ‘Pathology’ section will be open to original papers and reviews on this topic. Covering all aspects of the field, Skin Appendage Disorders is of primary importance for dermatologists in clinics and research, dermatological surgeons as well as cosmetic dermatologists.

Selected articles in the first issues:
• Hidradenitis Suppurativa Management in the United States: An Analysis of the National Ambulatory Medical Care Survey and MarketScan Medicaid Databases: Davis, S.A. (Winston-Salem, N.C.);
  Lin, H.-C. (Bloomington, Ind.); Balkrishnan, R. (Ann Arbor, Mich.);
  Feldman, S.R. (Winston-Salem, N.C.)
• Tinea Incognito following the Use of an Antipsoriatic Gel: Starace, M.; Alessandrini, A.; Piraccini, B.M. (Bologna)
• Dystrophy of the Great Toenail by Subungual Exostosis and Hyperostosis: Three Case Reports with Different Clinical Presentations: Wollina, U. (Dresden); Schönlebe, J. (Dresden)
• Double Nail of the Little Toe: Hanke, E. (Bern/Freiburg i.Br./Porto/Ghent)
• Trichoscopy of Focal Alopeia in Children – New Trichoscopic Findings: Lacarrubba, F.; Micali, G. (Catania)
Biomarkers are commonly reported endpoints in basic and clinical research trials. However, as technical developments increase the volume and scope of biomarker data, guidance on how to implement this knowledge into daily clinical practice is required. This special topic issue aims to provide such guidance. The current and potential future impact of biomarkers in head and neck oncology, allergology, autoimmunity, imaging techniques, otology, angioedema, and sleep medicine is presented by highly respected experts in these fields. This issue will be an invaluable resource for clinicians looking to carry the latest research findings into their own clinical work-up.

Contents
Editorial: Knopf, A.

Introduction
- Individual Biomarkers Using Molecular Personalized Medicine Approaches: Zenner, H.P.

Head and Neck Oncology
- Checkpoint Inhibition in Head and Neck Cancer: Immune Therapeutic Options, Limitations, and Beyond: Höchst, B.; Knolle, P.A.
- CXCR4: A New Player in an Old Scene? Knopf, A.; Fritsche, M.K.; Li, Y.

Head and Neck Autoimmunity

Imaging
- Radiomics in Head and Neck Cancer: Extracting Valuable Information from Data beyond Recognition: Scheckenbach, K.; Colter, L.; Wagenmann, M.

Allergology
- Endotypes in Chronic Rhinosinusitis: Biomarkers Based on a Mechanistic Insight for Targeted Treatment? Wagenmann, M.; Scheckenbach, K.; Chaker, A.M.

Angioedema
- Potential Biomarkers for the Diagnosis of Angiotensin-Converting Enzyme Inhibitor-Induced Angioedema: Bas, M.; Storck, K.; Strassen, U.

Otology
- Biomarkers for Hearing Dysfunction: Facts and Outlook: Rütiger, L.; Zimmermann, U.; Knipper, M.
- Vibration-Induced Vestibular Deficits – A Synopsis: Hamann, K.-F.

Sleep Medicine
- Predictive Success Factors in Selective Upper Airway Stimulation: Heiser, C.; Hofauer, B.
