Arrow of Time or Providence Divine? An Amusing But Thought Provoking Poem on Relative Positioning of Primary Motor and Sensory Cortices of Human Brain

Amitava Biswas

Department of Speech and Hearing Sciences, University of Southern Mississippi, Hattiesburg, MS, USA

The Poem

My question in Figure 1
Is about a neural phenomenon.
To give you a little cue,
Citing references [1] and [2].
Did you ever worry
Over any scary
Exam neuro introductory
Cramming too much memory?
If you aren't too shy
Do you ask anyone why?
And which is ahead,
Inside your head?
Motor cortex primary
Or the somatosensory?
To help your memory
Recall Eddington's theory
With metaphor archery
Stamping time history.
Whether or not really
It has any divine eerie.
Although not 100% exceptional,
Like most of our theories in general,
See an arrow of time in this rudimental,
A phenomenon that's essentially neural.
Back is past, front is future,

Fig. 1. Arrow of time or providence divine?

That is our point in this conjecture!
If future is front and past is back,
Then present is central for any logical stack.
If present is assumed around sulcus central,
Pre and post relate pretty logical.

Two evidential samples,
 We mean examples:
 When can you text me an SMS?
 Anytime past is out of sense!
 Anytime ahead in the future
 Is a possible answer!
 When your brain is texting using the muscles of your
 finger,
 It is engaging forward for immediate future.
 It is just ahead of the central sulcus
 Predictable predecessor precentral gyrus!
 If you've no ESP,
 And sensing a sting of a honeybee,
 You are not sensing a forecast,
 But your recent past.
 Recording behind of central sulcus,
 Posteriorly posted postcentral gyrus!
 This basic theory,
 About motor and sensory,
 Can be extensible,

If you are flexible!
 Even in the cord spinal,
 If you mix-up ventral dorsal,
 Before your exam final,
 Keep this point vital.
 Remember motor and sensory,
 As described in above category,
 Broadly map respectively
 Anteriorly and posteriorly,
 By only coincidentally
 Or just by divine providence entirely?

Acknowledgments

This work has benefited from faculty start-up funds granted by the University of Southern Mississippi. Several individuals have helped this concept at some point in time or other, especially Dr. Steven Barlow, Dr. Steven Cloud, Dr. Edward Goshorn, Dr. Anthony Salvatore, and Dr. Charles Watson.
