Publishing of Supplements

The mission of *Medical Principles and Practice* (MPP) is to cover a wide scope of research in all the health sciences. In keeping with this mission, MPP has embarked on a policy to publish conference proceedings as supplements to the journal. With this issue we launch our first supplement. This supplement contains selected, peer-reviewed papers presented at the conference on 'Minimal Intervention Approach for Dental Treatment', hosted by the Faculty of Dentistry of the Health Sciences Centre, Kuwait University, Kuwait, December 6–8, 1999. We hope you will find it informative.

We anticipate the supplement will become a regular feature but its success will depend on Faculties of the Health Sciences Centre, Kuwait University and indeed those of other universities and institutions considering publishing the proceedings of their conferences in MPP. We hope you will do so.

The editorial board would like to thank Dr. Thomas Karger, Chairman Karger Publishing House, for his personal support and encouragement and Dr. Behbehani, Dean of Faculty of Dentistry for selecting MPP to publish the proceeding of its first conference.

Farida Al-Awadi, Editor-in-Chief
