A New Year and a New Liaison

This journal has emphasized that psychosomatic medicine is alive and well in the new millennium [1–4]. We believe that the psychosomatic message is more and more valid and timely in today's medicine. The constant growth in visibility of our journal (the 2000 impact factor increased to 2.37) is one of the many examples that could be provided. It thus comes as no surprise that we have established a liaison with a rapidly expanding association, the International College of Psychosomatic Medicine. In 2002 all ICPM members will receive a copy of our journal as part of their dues. This provides an additional reason for joining the ICPM for those who have not done it yet. Those who wish to do so should contact the ICPM Secretariat, c/o IPS, Kvibergsvägen 5, S-41505 Göteborg (Sweden).

Below we report a list of the experts who have supplemented the editorial board in reviewing the manuscripts submitted to *Psychotherapy and Psychosomatics* in 2001.

Both external referees and editorial board members have been requested to disclose any potential conflict of interest when reviewing a paper. The editor-in-chief did not have any conflict of interest in 2001.
