Erratum

In the article by Majid et al. entitled “Efficacy of the Spiration Valve System in Patients with Severe Heterogeneous Emphysema: A Systematic Review and Meta-Analysis” [Respiration. 2020;99:62–72, DOI: 10.1159/000504183], the following error occurred:

Under Results, Efficacy Analysis, Changes in FEV₁, there was a spelling mistake. It should correctly read as follows:

On the other hand, changes in FEV₁ in liters were evaluated in all the studies [17, 26–28].

In Figure 4, the total number of subjects for the IBV trial is \( n = 142 \), and the total number of subjects for the Ninane et al. [26] trial is \( n = 37 \). The values are inverted; however, this error did not compromise any results in the pooled meta-analysis. The correct figure is as follows:

![Forest plot](image)

Fig. 4. Forest plot. Subgroup change in FEV₁ according to CV. SVS, Spiration Valve System.
