Erratum

In the article by Peddaredygari and Grewal entitled "Intrafamilial Phenotypic Variability Associated with the I1739V Mutation in the SCN9A Gene" [Case Rep Neurol. 2021;13:135–9, DOI: 10.1159/000513561], the variant is p.Ile739Val. This is mentioned correctly in the section "Genetic Testing;" however, the variant is reported as I1739V (instead of I739V) in the title and the rest of the article.
