Chicago Proceedings Overview

Combined Meeting of International Association of Pancreatology (IAP) and American Pancreatic Association (APA)
November 1–5, 2000, Chicago

The last IAP/APA Meeting in Chicago, November 1–5, 2000, was very successful. The IAP and the Editor-in-Chief have decided to release articles based on lectures at the meeting. After submission these articles will appear without delay in the next possible issue of the journal PANCREATOLOGY and will be identified by a corresponding footnote. This overview will give you an updated list of the ‘Chicago papers’.

Papers published

- Lankisch PG: Natural Course of Chronic Pancreatitis [Pancreatology 2001;1:3–14]
- Bassi C: Infections in Pancreatic Inflammatory Disease: Clinical Trials for Antibiotic Prophylaxis [Pancreatology 2001;1:210–212]

Forthcoming Papers

- Lemoine N: Pancreatic Cancer Genetics
- Ross L: Genetic Basis of Pancreatic Disease: Ethics of Genetic Testing
- Whitcomb D: Hereditary Pancreatitis: A Model for Understanding the Genetic Basis of Acute and Chronic Pancreatitis
- Adler G: From Acinar Cell Damage to Systemic Inflammatory Response: Current Concepts in Pancreatitis
- Chey W: Neural Hormonal Regulation of Exocrine Pancreatic Secretion
- Friess H: Growth Factors in Pancreatic Health and Disease
- Miller L: Insights into the Molecular Basis of Ligand Binding by the Cholecystokinin Receptor
- Gress T: Use of DNA-Arrays/Microarrays in Pancreatic Research
- Leach S: Lineage Commitment and Cellular Differentiation in Exocrine Pancreas
- Schmid R: TGFalpha Transgenic Mice – A Model of Pancreatic Cancer Development
- Tsuchiya R: Early Pancreatic Cancer
- Brugge W: Diagnostic Imaging: The Challenges in Pancreatic Diseases: What Is the Role of EUS?
- Fishman E: Imaging Pancreatic Cancer: The Role of Multidetector CT (MDCT) with 3D CT Angiography
- Freeny P: Pancreatic Carcinoma: What Is the Best Imaging Test?
- Wiersema M: Accuracy of Endoscopic Ultrasound in Diagnosing and Staging Pancreatic Carcinoma
- Kloeppel G: Cystic Lesions and Neoplasms of the Pancreas: The Features Are Becoming Clearer
- Fernandez C: Cystic Neoplasms of the Pancreas
- Keck T: Site-Specific Therapeutic Effects of Protease Inhibitors: Effect of Route of Administration in Experimental Pancreatitis
- Takeda K: The Benefit of Continuous Regional Arterial Infusion of Protease Inhibitor and Antibiotic in Management of Acute Necrotizing Pancreatitis
- Yamauchi J: Continuous Regional Application of Protease Inhibitor in the Treatment of Acute Pancreatitis: An Experimental Study Using Closed Duodenal Obstruction Model in Dogs
Membership Application for 2001

The annual membership fee of USD 125.00 (Members in training: USD 85.00) includes the subscription to the official journal of the IAP, Pancreatology.

**Officers of the Association**

*John P. Neoptolemos*, President  
*Andrew L. Warshaw*, Past-President  
*Seiki Matsuno*, President-Elect  
*Paul G. Lankisch*, Secretary  
*Markus W. Büchler*, Treasurer  
*Kei Kashima*, Co-Treasurer

**Objectives**

1. To promote and encourage the advancement and exchange of knowledge respecting the normal and diseased exocrine and endocrine pancreas by means of regular meetings

2. To advance and encourage studies in basic and clinical research in pancreatology by meetings and official publications

3. To promote public interest in pancreatology

4. To make known the objectives and activities of the association by the publication of its activities in all media and the regular publication of its journal

The annual membership fee of USD 125.00 (members in training: USD 85.00) includes the subscription to *Pancreatology*
