Subject Index

Acquired immunodeficiency syndrome, intraepithelial lymphocyte phenotypes 19
Anergy
inhaled antigen tolerance mechanism 171–173
oral tolerance mechanism 144
Appendix, see Gut-associated lymphoid tissue
Arthritis, oral tolerance therapy with collagen type II 148, 149, 152
Asthma
cyclosporin A therapy 185, 186
cytokine profiles 181–183
glucocorticoid resistance 184, 185
mast cell role 178
T cell
hypothesis of asthma 179, 187, 188
local accumulation 183, 184
peptide epitopes, asthma provocation 186, 187
phenotypes in blood and bronchi 179–181
B cell, see also Generalized B cell deficiency, Immunoglobulin A
antigen presentation in lung 162
immunoglobulin A B cell, see also
Germinal center differentiation
CD40L interaction dependence 223, 224
cytokine regulation 218, 219
germinal center reaction association 213, 214
localization in gut mucosa 210, 211
B7.1, signaling of T cell stimulation in intestinal helminth infection 195
B7.2
oral tolerance role 142
signaling of T cell stimulation in intestinal helminth infection 195
T cell activation in lung 163
CD1d, expression in gut epithelium 45, 46
CD8+ T cell
cytotoxicity in mucosal inflammation 133, 134
functions in lung 167–169
CD80/CD86, costimulation in immunoglobulin A response 224, 225
Celiac disease
lamina propria T cell cytokine profile 107
T cell receptor repertoire 35
Chemokines, enterocyte synthesis and functions 55
Clonal deletion
inhaled antigen tolerance mechanism 170
oral tolerance mechanism 144
Colitis, oral tolerance therapy with haptenized clonic protein 150
Cow's milk sensitive enteropathy, lamina propria T cell cytokine profile 108
Crohn's disease
lamina propria T cell cytokine profile
106, 107
mouse models
bone marrow reconstitution of Tg26 mice 120–122, 127
CD45RB+ transfer model 121, 122
classification of models 119
lamina propria T cells 108–110
overview 108–110, 119
pathogenic T cell responses
cytokine pathways and inhibition 124, 125
failure of regulation 125–127
initiation of responses 127–134
T cell phenotypes 122
T cell phenotypes 17
receptor repertoire 34, 35
Cyclosporin A, asthma therapy 185, 186
Cytokines, see also specific cytokines
asthma profiles 181–183
B cell regulation 218, 219, 221, 223, 225, 226
enterocyte expression and functions 53–56
epithelial interactions 53–56
inflammatory bowel disease, pathogenic
T cell responses 124, 125
lamina propria T cell cytokine profile
celiac disease 107
cow’s milk sensitive enteropathy 108
inflammatory bowel disease 106, 107
T helper cells
production by types 163, 164, 191
regulation in lung 164, 165, 169, 171
subset polarization 196, 197
Dendritic cell
antigen presentation in lung 161, 162
T helper cell polarization 195, 196
types in Peyer’s patches 215
Diabetes, oral tolerance therapy with insulin
150–152
Enterocyte
adhesion molecules 52, 53

Subject Index
Gut-associated lymphoid tissue, T cell, phenotypes (continued)
  initial antigen encounter sites 6, 7
  tracing 5
  T helper types 140, 141

Heligmosoides polygyrus, see Intestinal helminth infection

High endothelial venules
  adhesion molecule expression 4, 5, 8, 9
  lymphocyte recirculation in gut 3
  Horseradish peroxidase, degradation and tight junction permeability 44, 45

Human immunodeficiency virus infection, intraepithelial lymphocyte phenotypes 19

Immunoglobulin A
  B cell, see also Germinal center differentiation
    CD40L interaction dependence 223, 224
    cytokine regulation 218, 219
    germinal center reaction association 213, 214
    localization in gut mucosa 210, 211
  CD80/CD86 costimulation in responses 224, 225
  deficiency, T cell phenotypes 18
  inducers vs tolerance 209, 219, 220
  interferon-γ in response 221
  interleukin-6 in response 221, 223
  organization and complexity of mucosal system 210
  T cell control of immunity 216–221
  tolerization by antigen feeding 225, 226

Inflammatory bowel disease, see Crohn’s disease, Ulcerative colitis

Inhaled antigen tolerance
  anergy 171–173
  antigen-presenting cells in lung
    alveolar macrophage 162
    B cell 162
    dendritic cell 161, 162
  CD8+ T cell functions in lung 167–169
  clonal deletion 170
  costimulation in T cell activation 162, 163
  rodent studies of immune response to
    inhaled antigens 165–167
  suppressor T cells 171
  T helper cells
    cytokine production of types 163, 164
    response to allergens 164, 165, 171
    to respiratory pathogens 169

αβ7 Integrin receptor
  cell trafficking during inflammation 70, 71
  expression and binding patterns 66, 68
  knockout mice studies 72
  ligands 66, 68
  lymphocyte homing in Peyer’s patches 65
  structural requirements for mucosal
    addressin cell adhesion molecule-1 binding 68–70

γδ T cell, see also Intestinal helminth infection

Interleukin-1, epithelium interactions 53
  effects on antigen epithelial permeability 43
  enterocyte function 54
  induction of Th-1 responses in gut 130, 131
  mucosal immunity in knockout mice 221

Interleukin-1α, epithelium interactions 53

Interleukin-6
  epithelium interactions 55
  immunoglobulin A response role 221, 223

Interleukin-7, epithelium interactions 55

Interleukin-10, epithelium interactions 56

Interleukin-12, induction of Th-1 responses in gut 127–129

Interleukin-15, epithelium interactions 56

Intestinal helminth infection
  antigen load 197
  diagnosis 193
  induction of immunity 194, 195
  morbidity 192
  prevalence 192

Subject Index
T helper cell subsets
polarization
antigen presenting cells 195, 196
costimulatory molecules in T cell induction 195
cytokine environment effects 196, 197
resistance, mouse model systems
Heligmosoides polygyrus 194, 202, 203
Nippostrongylus brasiliensis 194, 200–202
Trichinella spiralis 194, 197–199
Trichuris muris 194, 199, 200
Intraepithelial lymphocytes
developmental changes 12–14
origin
athymic mouse studies 90–93
cryopatch 79
evidence for extrathymic development 89, 90
precursor origins 9, 10, 90
thymus role 93–96
phenotypes
 gluten-sensitive enteropathy 15, 16
immunodeficiency 18, 19
normal intestine 13–15
TCR-αβ expression 31–33, 91, 92
TCR-γδ expression 33, 34, 77, 78, 80, 81, 91, 92, 99
thyroid hormone effects 96–98
Keratinocyte growth factor
lamina propria T cell damage in gut 113
γδ-T cell production 81
Lamina propria
anatomy and function 103
T cell
abundance 1
cytokine profiles
celiac disease 107
cow’s milk sensitive enteropathy 108
inflammatory bowel disease 106, 107
normal intestine 105
damage mechanisms in gut 110, 113, 114
inflammatory bowel disease studies in mouse models 108–110
phenotypes 11, 12, 19, 104, 105, 113
Lung, see Asthma, Inhaled antigen tolerance
Lymphotoxin αβ
induction of Th-1 responses in gut 132, 133
organogenesis of Peyer’s patches 211, 213
Macrophage, antigen presentation in lung 162
Matrix metalloproteinases, lamina propria
T cell damage in gut 110, 113
Mucosal addressin cell adhesion molecule-1
T cell trafficking during inflammation 70, 71
effect in gut-associated lymphoid tissue 4, 5
receptor, see α4β7 Integrin receptor
structural requirements for α4β7 integrin receptor binding 68–70
Multiple sclerosis, oral tolerance therapy
with myelin basic protein 151, 152
Myasthenia gravis, oral tolerance therapy
with acetylcholine receptor 150
Nippostrongylus brasiliensis, see Intestinal
helminth infection
Nitric oxide, effect on antigen epithelial permeability 43, 44
Oral tolerance
active suppression 144, 145
autoimmune disease treatment
arthritis and collagen type II 148, 149, 152
colitis and haptenized clonic protein 150
diabetes and insulin 150–152
experimental autoimmune encephalitis
and myelin basic protein 148
multiple sclerosis and myelin basic protein 151, 152
myasthenia gravis and acetylcholine receptor 150
transplantation and alloantigens 151, 153
Oral tolerance (continued)

uveitis and S antigen 149, 150, 152
B7.2 role 142
bystander suppression 146, 147
discovery 139
effector phase 143–145
immunoglobulin A response tolerization by antigen feeding 225, 226
inductive phase 139–143
modulation 147, 148

Peyer’s patches, see Germinal center,
Gut-associated lymphoid tissue
Polymerase chain reaction, assessment of T cell receptor usage 29, 30

Rheumatoid arthritis, oral tolerance therapy with collagen type II 152
Suppressor T cell
inhaled antigen tolerance 171
oral tolerance
active suppression 144, 145
bystander suppression 144–147

T cell receptor
antigen presentation 27, 28, 36
assessment of usage
antibody techniques 29
polymerase chain reaction 29, 30
complementarity determining regions
28
diversity of chains by gene recombination
28, 29
repertoire
celiac disease 35
expression by CD4/CD8 status 30, 31
inflammatory bowel disease 34, 35
mouse 35, 36
TCR-αβ 31–33
TCR-γδ 33, 34

γδ-T cell
effector phase 89–93
knockout mice studies of infectious response 84
γδ-T cell
antigen recognition 79, 80

autoimmune disease pathogenesis role
81, 82
cryopatch origin 79
cytokine production 80
epithelial cell interactions 80, 81
extrathymic development 89–93
intraepithelial lymphocytes 77, 78, 80, 81
knockout mice studies of infectious response 84
microbial infection response 83, 84
ontogeny and anatomical features 77, 78

Th1
cytokine production 163, 164, 193
lung, cytokine response
allergens 164, 165, 171
respiratory pathogens 169
mediation of immunoglobulin A immunity 219–221
response in helminth infection, see Intestinal helminth infection

Th2
cytokine production 163, 164, 193
lung, cytokine response
allergens 164, 165, 171
respiratory pathogens 169
response in helminth infection, see Intestinal helminth infection

Thymus
athymic mouse studies of intraepithelial lymphocyte development 90–93
extrathymic gut T cell development role 93–96
Thyroid hormone, intraepithelial lymphocyte effects 96–98
Tight junction, antigen permeability 41–44
Tolerance, see Inhaled antigen tolerance,
Oral tolerance
Transforming growth factor-β, epithelium interactions 56
Transplantation, oral tolerance therapy with alloantigens 151, 153
Trichinella spiralis, see Intestinal helminth infection
Trichuris muris, see Intestinal helminth infection
Tumor necrosis factor-α
epithelium interactions 55
induction of Th-1 responses in gut 131, 132
organogenesis of Peyer’s patches 211, 213

Pathogenic T cell responses
organogenesis of Peyer’s patches 211, 213
failure of regulation 125±127
initiation of responses 127–134

Ulcerative colitis
lamina propria T cell cytokine profile 106, 107
mouse models
bone marrow reconstitution of Tgα26 mice 120–122, 127
CD45RBhi transfer model 121, 122

classification of models 119
lamina propria T cells 108–110
overview 108–110, 119
pathogenic T cell responses
cytokine pathways and inhibition 124, 125
failure of regulation 125–127
initiation of responses 127–134
T cell phenotypes 122
T cell phenotypes 16, 17
receptor repertoire 34, 35

Uveitis, oral tolerance therapy with S antigen 149, 150, 152
